### INSTITUTE VISION

To emerge as an Institute of Excellence by imparting value-based education aided with Research, Innovation and Entrepreneurial skills.

### INSTITUTE MISSION

|    |   |
|----|---|
| 1. | To impart the holistic engineering education of highest quality & prepare socially responsible professionals with entrepreneurial skills.       |
| 2. | To prepare value-aided engineering professionals to meet up global industry requirements by imparting cutting edge professional education.      |
| 3. | To inculcate the attitude of research and innovation among the stake holders through experiential and project-based teaching-learning pedagogy. |
| 4. | To acquire global talent pool by providing world class amenities for teaching, learning & research.   |

Graduates will demonstrate ability to:

| PEO No | PROGRAMME EDUCATIONAL OBJECTIVES   |
|--------|--|
| PEO 1  | Solve real-world engineering problems, design and develop innovative and cost-effective solutions exhibiting engineering skills/fundamentals to cater needs of society.      |
| PEO 2  | Excel in Industry/technical profession, higher studies, and entrepreneurship exhibiting comprehensive competitiveness.   |
| PEO 3  | Exhibit professional ethics & values, effective communication, teamwork, multidisciplinary approach, and ability to relate engineering issues to broader societal framework. |

| PO No | PROGRAMME OUTCOMES   |
|-------|--|
| PO 1  | Engineering knowledge:<br>Apply knowledge of engineering fundamentals, science, mathematics & engineering specialization for the solution of complex engineering problems.           |
| PO 2  | Problem analysis:<br>Identify, formulate and analyze complex engineering problems leading to substantial conclusions using basic principles of mathematics, science and engineering. |
| PO 3  | Design/development of solutions:   |

| PO No | PROGRAMME OUTCOMES   |
|-------|--|
|       | Develop solutions for complex engineering problems and design system components or processes meeting specified needs having due consideration for the safety and societal & environmental considerations.  |
| PO 4  | Conduct investigations of complex problems:<br>Use research-based knowledge & methods like design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid & viable conclusions.   |
| PO 5  | Modern tool usage:<br>Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools for prediction and modeling of complex engineering activities with an understanding of the limitations.   |
| PO 6  | The engineer and society:<br>Apply cognitive learning by the contextual knowledge to assess societal, health, safety, legal and cultural issues and following responsibilities relevant to the professional engineering practice.  |
| PO 7  | Environment and sustainability:<br>Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge & skill needed for sustainable development.   |
| PO 8  | Values & Ethics:<br>Apply basic moral values & ethical principles and pledge to professional ethics/norms and responsibilities of the engineering practice.  |
| PO 9  | Individual and team work:<br>Function effectively as an individual/as a team member or as a leader in diverse teams, and in multidisciplinary settings.  |
| PO 10 | Communication:<br>Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |
| PO 11 | Project management and finance:  |

| <b>PO No</b> | <b>PROGRAMME OUTCOMES</b>   |
|--------------|---|
|              | Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects in multidisciplinary environments. |
| PO 12        | Life-long learning:<br>Recognize the need, do necessary preparation and ability to engage in independent and life-long learning in the broadest context of technological change.                                |

| <b>PSO No</b>               | <b>PROGRAMME SPECIFIC OUTCOMES (PSO)</b>   |
|-----------------------------|--|
| <b>COMPUTER ENGINEERING</b> |  |
| PSO 1                       | Apply the knowledge of programming languages, data structures and Algorithms, data science, networks and software engineering principles for software product development. |
| PSO 2                       | Analyse and formulate solutions to real world and socially relevant problems over multi-disciplinary domains by using latest technologies.                                 |
| PSO 3                       | Prepare technically competent employee, researcher, entrepreneur, and excel in competitive exams, and increase passion for higher studies.                                 |

| <b>Credit Guidelines (General)</b> |                  |               |                             |
|------------------------------------|------------------|---------------|-----------------------------|
| <b>Component</b>                   | <b>Hour/Week</b> | <b>Credit</b> | <b>Total Hours/Semester</b> |
| Theory                             | 1                | 1             | 15                          |
| Practical                          | 2                | 1             | 30                          |
| Tutorial                           | 1                | 1             | 15                          |

Note: In specific cases; extra credits can be granted for specific/important subjects.

| <b>CO-PO Mapping Guidelines</b> |                      |                                  |
|---------------------------------|----------------------|----------------------------------|
| <b>Mapping Level</b>            | <b>% age Mapping</b> | <b>Indicator</b>                 |
| 0                               | 0                    | No Mapping                       |
| 1                               | 0-33                 | Low Level (Slightly Mapped)      |
| 2                               | 33-66                | Medium Level (Moderately Mapped) |
| 3                               | >66                  | High Level (Strongly Mapped)     |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the course:**

To help learners to

- summarize concept of calculus to enhance ability of analysing mathematical problems.
- acquire knowledge and ability to work with differentiation and integration for applications of mathematical techniques in engineering.
- develop the tool of convergence or divergence of any infinite series and power series for learning advanced Engineering Mathematics.
- acquire knowledge of partial differentiation and ability to work with applications to advanced Engineering Mathematics.
- application of concavity of graph and find out points of inflection.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | <b>Calculus</b><br>Limits, Continuity, Types of Discontinuity, Successive Differentiation, Rolle's Theorem, LMVT, CMVT, Maxima and Minima.                                   | 9     | 20             |
| 2.                | <b>Sequence and Series-I</b><br>Convergence and Divergence, Comparison Test, Integral Test, Ratio Test, Root Test, Alternating Series, Absolute and Conditional Convergence. | 9     | 20             |
| 3.                | <b>Sequence and Series-II</b><br>Power series, Taylor and Macluarin series, Indeterminate forms and L'Hospitals Rule.  | 5     | 10             |
| <b>Section II</b> |  |       |                |

| Module No. | Content   | Hours | Weightage in % |
|------------|---|-------|----------------|
| 4.         | <b>Partial Derivatives</b><br>Function of several variables, Partial differentiation, Applications, Chain rule, Linear approximations, Maxima and Minima, Euler's theorem, Lagrange multiplier. | 11    | 30             |
| 5.         | <b>Curve tracing</b><br>Tracing of Cartesian Curves, Polar Coordinates, Polar and Parametric Form of Standard Curves, Areas and Length in Polar co-ordinates                                    | 11    | 20             |
|            | <b>TOTAL</b>  | 45    | 100            |

#### List of Tutorials:

| Sr. No. | Name of Tutorial      | Hours     |
|---------|-----------------------|-----------|
| 1.      | Calculus-1            | 4         |
| 2.      | Calculus-2            | 4         |
| 3.      | Calculus-3            | 2         |
| 4.      | Sequence and Series-1 | 4         |
| 5.      | Sequence and Series-2 | 2         |
| 6.      | Sequence and Series-3 | 2         |
| 7.      | Partial Derivatives-1 | 4         |
| 8.      | Partial Derivatives-2 | 2         |
| 9.      | Curve tracing-1       | 4         |
| 10.     | Curve tracing-2       | 2         |

## Course Evaluation:

### Theory:

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

### Tutorial:

- Continuous Evaluation consists of performance of tutorial which will be evaluated out of 10 marks for each tutorial and average of the same will be converted to 50 marks
- Continuous Evaluation consists of self-performance assignment to 20 marks.
- Internal Viva consists of 30 marks.

## Course Outcome(s):

After the completion of the course, the student will be able to

| <b>SESH1110</b> | <b>CALCULUS</b>  |
|-----------------|--|
| CO 1            | Recall the concepts of limit, continuity and differentiability for analysing mathematical problems.                |
| CO 2            | Analyze the series for its convergence and divergence to solve real world problems.                                |
| CO 3            | Evaluate various limit problems using L' Hospital's rule.  |
| CO 4            | Identify the ordinary differentials and partial differentials and solve the maximum and minimum value of function. |
| CO 5            | Construct the graphs for function with intervals and identify more application for function.                       |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- analyse and solve system of linear equations and understand characteristics of Matrices.
- learn about and work with vector space, linear transformation and inner product space.
- apply concepts of linear algebra for solving science and engineering problems.
- introduce the concept of improper integral and Beta-Gamma Function.

**Course Content:**

| <b>Section I</b>  |   |       |                |
|-------------------|---|-------|----------------|
| Module No.        | Content   | Hours | Weightage in % |
| 1.                | <b>Matrix Algebra</b><br>Elementary Row and Column operations, Inverse of matrix, Rank of matrix, System of Linear Equations, Characteristic Equation, Eigen values and Eigen vector, Diagonalization, Cayley Hamilton Theorem. | 12    | 30             |
| 2.                | <b>Vector Space</b><br>Concept of vector space, Subspace, Linear Combination, Linear Dependence and Independence, Span, Basis and Dimension, Row Space, Column Space and Null Space, Rank and Nullity.                          | 11    | 20             |

CE: Continuous Evaluation, ESE: End Semester Exam

Objective(s) of the Course:

To help learners to

- learn about the safety measures required to be taken while using working in workshop.
- learn about how to select the appropriate tools required for specific operation.
- learn about different manufacturing technique for production out of the given raw material.
- understand applications of machine tools, hand tools, power tools and welding process.

Course Content:

| Module No. | Contents  | Weightage in % |
|------------|---|----------------|
| 1.         | <p><b>Introduction:</b><br/>Introduction to Various Shops / Sections and Workshop Layouts, Safety Norms to be Followed in a Workshop.</p> <p><b>Fitting Shop:</b><br/>Introduction of Fitting Shop; Safety; Making a Job as per Drawing including Marking and other Performing Operations.</p> <p><b>Carpentry and Drilling Shop:</b><br/>Introduction of Carpentry Shop; Preparation of Job as per Drawing including Marking and other Performing Operations.</p> <p><b>Introduction to Machine Tools:</b><br/>Introduction and Demonstration of various Machine Tools like Lathe, Drilling, Grinding, Hack Saw Cutting etc.</p> <p><b>Introduction to Welding &amp; Plumbing:</b><br/>Introduction and Demonstration of Welding process. Introduction and Demonstration of Plumbing Shop.</p> | 25             |
| 2.         | <p><b>Introduction to Computer Hardware</b><br/>Computer hardware structure, Identify and understand hardware components: CPU, Motherboard, RAM, HDD, SSD, Keyboard, Ports, Mouse, Monitor, Printer, UPS/SMPS, etc.</p>   |                |

|    |  |    |
|----|--|----|
|    | <b>Hardware Maintenance and Troubleshooting</b><br>Assembling and disassembling a PC, connectors and cables, BIOS setup, Disk management, Device manager, Task manager, Network management, Backup/recovery disk.  | 25 |
| 3. | <b>Electrical and Electronic Skill:</b> Use of Multimeter. Soldering of electrical circuits having discrete components (R, L, C & diode) and ICs on PCB, connections on Breadboard   | 25 |
| 4. | <b>Logic Gates:</b> Digital Electronics, Symbol and truth table of Logic gates (OR, AND, NOT, NAND, NOR and EX-OR gate), De morgan's theorem.<br><b>Cathode Ray Oscilloscope:</b> Block diagram of basic CRO. Construction of CRT, Electron gun, electrostatic focusing and acceleration (Explanation only- no mathematical treatment), brief discussion on screen phosphor, visual persistence & Use of CRO for the measurement of voltage (dc or ac frequency, time period. Special features of dual trace. Digital storage Oscilloscope: Block diagram and principle of | 25 |

#### List of Practical:

| Sr. No. | Name of Practical  | Hours |
|---------|--|-------|
| 1.      | Introduction and Demonstration of Safety Norms. Different Measuring Instruments. Introduction and Demonstration of Machine Shop. To Perform a Job of Fitting Shop. | 12    |
| 2.      | To Perform a Job of Carpentry Shop. Introduction and Demonstration of Plumbing Shop & Welding Process.   | 15    |
| 3.      | (I)Identify computer hardware layout and components<br>(II)Perform assembling and disassembling of PC  | 08    |
| 4.      | Configure BIOS, disk, network and other hardware management  | 05    |
| 5.      | Understanding the electronic components and study of Soldering and Desoldering of electronic components on PCB Board.  | 04    |
| 6.      | Understanding the connection on Breadboard and study of Alternate Flashing LED Lights using Breadboard.  | 06    |
| 7.      | Verify the truth table of Logic gates and De morgan's theorem on IC trainer board.   | 04    |
| 8.      | Study of Cathode Ray Oscilloscope.   | 06    |
|         | <b>TOTAL</b>   | 60    |

| Digital Electronics           | Subrata Ghoshal               | Cengage Learning |

## Course Evaluation:

### Practical:

- Continuous Evaluation consists of Performance of Practical/Tutorial which will be evaluated out of 10 for each practical/Tutorial and average of the same will be converted to 30 Marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator
- Internal Viva consists of 30 Marks.
- Practical performance/quiz/drawing/test will consist of 30 Marks.

### Course Outcome(s):

After the completion of the course, the following course outcomes will be able to:

| SEME1110 | HARDWARE WORKSHOP   |
|----------|---|
| CO 1     | Apply the application of mechanical workshop such as fitting, drilling and carpentry.<br>Understand various tools of mechanical workshop and understand its applications.   |
| CO 2     | Identify and inspect hardware components and interpret latest development of the field.   |
| CO 3     | Make students capable of analysing and solving the varieties of problems coming up in the electrical measurements and also enable the students to design as well as trouble shoots the circuits and networks through hands-on mode. |
| CO 4     | Develop skill to build, and troubleshoot digital circuits.  |

### Mapping of CO with PO-PSO

| SEME1110 | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO 1     | 2   | 1   | 2   | 1   |     | 3   | 3   |     | 3   | 3    | 1    | 3    |
| CO 2     | 2   | 1   | 1   | 2   | 2   | 2   |     |     | 2   | 2    | 1    | 2    |
| CO 3     | 3   | 2   | 2   | 2   | 2   | 2   | 2   | 3   | 2   | 2    | 3    | 3    |
| CO 4     | 2   | 3   | 2   | 3   | 3   |     | 3   | 3   | 1   | 2    | 1    | 2    |

### Mapping of CO with PSO

| SEME1110 | PSO1 | PSO2 | PSO3 |
|----------|------|------|------|
| CO 1     | 3    | 1    | 1    |
| CO 2     | 1    | 1    | 2    |
| CO 3     | 1    | 3    | 3    |
| CO 4     | 2    | 2    | 2    |

### Level of Bloom's Revised Bloom's Taxonomy in Assessment

|             |               |           |
|-------------|---------------|-----------|
| 1: Remember | 2: Understand | 3: Apply  |
| 4: Analyze  | 5: Evaluate   | 6: Create |

| Module No | Content | RBT Level |
|-----------|---------|-----------|
|-----------|---------|-----------|

|   |  |             |
|---|--|-------------|
| 1 | Introduction, Fitting Shop, Carpentry Shop and Drilling Shop,<br>Introduction to Machine Tools, Welding and Plumbing | 2,3,4,6     |
| 2 | Introduction to Computer Hardware, Hardware Maintenance<br>and Troubleshooting                                       | 1,2,3,4,5,6 |
| 3 | Understand and designing of Electrical circuit   | 2,3,5       |
| 4 | Cathode ray oscilloscope and Digital Electronics   | 1,2,3,5     |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Provide a comprehensive knowledge of overall basic computer software tools and technology.
- Providing hands-on experience related to basic software installation, usage of Operating systems, and various essential software utilities.

**Course Content:**

| <b>Section I</b>  |   |                |
|-------------------|---|----------------|
| Module No.        | Content   | Weightage in % |
| 1.                | <b>Software Fundamentals</b><br>Introduction to Software, Types of software, Applications of software, Web based software, Understand Software specific requirements, Installation of Software  | 10             |
| 2.                | <b>Operating System</b><br>Introduction of OS, Functions of Operating System, Types of OS, Installation of Windows and Linux OS, Linux architecture, Role of Device Drivers in OS, Shell scripting, Command structure, and general-purpose utility. | 25             |
| 3.                | <b>DOS Commands</b><br>Getting Started with DOS, Introduction to Command Prompt, System Files and Command, Creating directories, Traversing through directories, Deleting directories, Viewing Files within a directory.                            | 15             |
| <b>Section II</b> |   |                |
| Module No.        | Content   | Weightage in % |
| 4.                | <b>Application Software</b><br>Introduction to Application Software, Types of Application Software, Installation of Application Software, Logo Designing, Creating Flowcharts and diagrams, Introduction To Google Apps.                            | 10             |

|    |  |    |
|----|--|----|
| 5. | <b>Data Analysis using Application Software</b><br>Introduction to Spreadsheets, Spreadsheet Functions to Organize Data, Introduction to Filtering, Pivot Tables, and Charts, VlookUp and HlookUp in Spreadsheets.                               | 15 |
| 6. | <b>Website Creation</b><br>Creating a website using Google Sites, Creating Web Pages, Working with Images, Working with Documents on Web Pages. Introduction to Wordpress, Installing Web Server and Wordpress, Creating Web pages in Wordpress. | 25 |

#### List of Practical:

| Sr. No. | Name of Practical   | Hours |
|---------|---|-------|
| 1.      | Study of Different Software.  | 2     |
| 2.      | Installation of any 2 software with required plugins and libraries.                                 | 4     |
| 3.      | Study of Different Operating Systems.   | 2     |
| 4.      | Creation of Bootable Pen drive.   | 2     |
| 5.      | Installation of Windows OS.   | 2     |
| 6.      | Installation of Linux OS using VMWare.  | 2     |
| 7.      | Study of Basic commands of Linux/UNIX.  | 4     |
| 8.      | Study of Basic commands of DOS.   | 4     |
| 9.      | Design logo using Canva.  | 2     |
| 10.     | Draw a Flowchart to find maximum of two numbers in either draw.io or Microsoft Visio or LucidChart. | 2     |
| 11.     | Study of different Google Apps.   | 4     |
| 12.     | Create a Google Doc and Google sheet and share with 2 classmates.                                   | 2     |
| 13.     | Demonstrate working of HlookUp and VlookUp in Excel.  | 2     |
| 14.     | Create different types of charts in Excel.  | 4     |
| 15.     | Demonstrate Data Analysis in Excel.   | 4     |
| 16.     | Create a Google Website with minimum two pages showing your personal details.                       | 4     |
| 17.     | Demonstrate embedding of a youtube video and pdf document on a web page in google site.             | 4     |
| 18.     | Demonstrate placing Map and hyperlinks on web page in Google Site.                                  | 4     |
| 19.     | Create a wordpress site and create minimum three web pages and menu to navigate between the pages.  | 4     |
| 20.     | Demonstrate the use of Accordion in wordpress.  | 2     |
|         | <b>TOTAL</b>  | 60    |

#### Text Book(s):

#### Course Evaluation:

##### Practical:

- Continuous Evaluation consists of performance of practical, which should be evaluated out of 10 marks per each practical and average of the same will be converted to 10 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during Internal practical Exam.
- Mini Project performance consists of 40 marks during End Semester Exam.

#### Course Outcome(s):

After the completion of the course, the student will be able to

| SECE1110 | Software Workshop   |
|----------|---|
| CO 1     | Understand the types of computer software with their requirements and how to use as per the need.                         |
| CO 2     | Install different Operating Systems and learn commands used in the OS.  |
| CO 3     | Get familiar with the application software and different applications of application software                             |
| CO4      | Achieve some useful information from data through analysis and represent it with different views like charts, graphs etc. |
| CO 5     | Learn the designing and development of website to have a global communication.  |

#### Mapping of CO with PO:

| SECE1110 | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to,

- understand governance, regulatory, legal, economic, environmental, social, and ethical context of cyber security.
- equip students with the technical knowledge and skills needed to protect and defend against cyber threats.
- help students to protect the one's data, systems, and networks from malicious attacks and cyber threats.

**Course Content:**

| <b>Section I</b>  |   |       |                |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

#### Course Outcome(s):

After completion of the course, the students will be able to,

| SEIT1110 | Cyberspace Awareness  |
|----------|---|
| CO 1     | Understand Concepts of Cyber space.                                   |
| CO 2     | Analyze the Concepts of Cyber Threats.                                |
| CO 3     | Elaborate the overview of social media and understanding cybercrimes. |
| CO 4     | Identify cyber laws and cyber acts in India.                          |
| CO 5     | Explore different case studies based on cyber-Forensics.              |

#### Mapping of CO with PO:

| SEIT1110 | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
|----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|

|      |   |   |  |  |   |   |  |   |   |   |  |   |
|------|---|---|--|--|---|---|--|---|---|---|--|---|
| CO 1 | 3 | 2 |  |  |   | 3 |  |   |   |   |  | 2 |
| CO 2 | 2 | 3 |  |  |   | 3 |  |   |   |   |  | 2 |
| CO 3 | 3 | 2 |  |  |   | 3 |  |   | 2 |   |  | 3 |
| CO 4 |   | 3 |  |  |   | 3 |  | 3 |   | 2 |  | 3 |
| CO 5 |   | 2 |  |  | 2 |   |  | 2 |   | 3 |  | 3 |

### Mapping of CO with PSO:

| SEIT1110 | PSO1 | PSO2 | PSO3 |
|----------|------|------|------|
| CO 1     | 3    | 2    | 2    |
| CO 2     | 2    | 3    | 2    |
| CO 3     | 3    | 2    | 3    |
| CO 4     | 2    | 3    | 2    |
| CO 5     | 3    | 3    | 2    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- identify appropriate approach to computational problems.
- develop logic building and problem-solving skills.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | <b>Motivation of Programming:</b><br>Use of Programming, Importance of Programming, Discussion of different Case Study   | 5     | 14             |
| 2.                | <b>Welcome to Programming:</b><br>Introduction of Programming, Flow Charts and Algorithms, Debugging, Tracing the execution of the Program, Watching Variables Values in Memory, Character Set, Keyword and Identifiers, Constants and Variables, Data Types - Declaration and Initialization, Basic Input, and Output Operations, Symbolic Constants, Overflow and Underflow of Data. | 9     | 18             |
| 3.                | <b>Conditional Statements and Looping Statements:</b><br>Decision Making & Branching: Decision Making with If and If - else Statements, Nesting of If-else Statements, The Switch and go-to statements. Looping: The while Statement, The Break Statement &The Do While loop, The FOR loop, Jump within loops - Programs.  | 9     | 18             |
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |
| 4.                | <b>Collection of Data:</b><br>Introduction, One-dimensional Arrays, Two-dimensional Arrays, Concept of Multidimensional Arrays, Declaring and Initializing String Variables, Arithmetic Operations on Characters, Putting Strings Together, Comparison of Two  | 10    | 20             |

|    |  |    |     |
|----|--|----|-----|
|    | Strings, String Handling Functions, Dictionary, List, Tuples and Sets.   |    |     |
| 5. | <b>Functions</b><br>Introduction to Functions, defining a Function, Calling a Function, Types of Functions, Function Arguments, Anonymous Functions, Global and Local Variables, Recursion | 6  | 15  |
| 6. | <b>Building Desktop Application</b><br>Exploring the Tkinter Library in Python, creating basic Desktop application using Tkinter   | 6  | 15  |
|    | <b>TOTAL</b>   | 45 | 100 |

### List of Practical:

| Sr. No. | Name of Practical  | Hours |
|---------|--|-------|
| 1.      | Working with basic elements of C languages (different input functions, different output functions, different data types, and different operators). | 2     |
| 2.      | Working with control structures (if statement, if-else statement, nested if-else statement, switch statement, break statement, goto statement).    | 2     |
| 3.      | Working with array and strings in C.   | 4     |
| 4.      | Introduction to Python (Introduction to IDLE, different data types, Input Output in Python, Operators, Operator precedence).                       | 2     |
| 5.      | Implementation of Dictionaries, Sets, Tuples and Lists and its various methods in Python.  | 6     |
| 6.      | Working with functions in C/Python.  | 2     |
| 7.      | Working with recursive function in C/Python.   | 2     |
| 8.      | Building desktop application of your own calculator in Python.   | 4     |
| 9.      | Case Study:<br>a. Sorting : Arrange the books<br>b. Searching : Find in seconds<br>c. Recursion : Tower of Hanoi                                   | 6     |
|         | <b>TOTAL</b>   | 30    |

*# Use of different libraries will be covered in Practical Assignments.*

## Course Evaluation:

### Theory:

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

### Practical:

- Continuous Evaluation consists of the performance of practical which will be evaluated out of 10 for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva/oral performance consists of 30 marks during End Semester Exam.

## Course Outcomes:

After completion of the course, the students will be able to

| SECE1120 | JOY OF PROGRAMMING  |
|----------|---|
| CO 1     | Immediately analyze the syntax and semantics of the computer languages and apply it in programs.  |
| CO 2     | Implement computing solutions using logic building and problem-solving skills of a given programming language.  |
| CO 3     | Interpret the fundamental language syntax, semantics and fluent in the use of python or any computer language control flow statements.                      |
| CO 4     | Determine the methods to create and manipulate programs by utilizing the data structures like lists, dictionaries, tuples and sets with emphasis on Python. |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand the basic concepts of chemistry, including atoms, molecules, and chemical processes.
- Apply the scientific method to examine chemical phenomena, including the design and execution of experiments, data analysis, and evidence-based conclusion drawing.
- Evaluate the causes and consequences of environmental problems and propose solutions based on scientific evidence.
- Integrate knowledge from multiple disciplines to analyze environmental problems and propose effective solutions.

| Module No.       | Content  | Hours | Weightage in % |
| 1.               | <b>Introduction to Chemistry</b><br>Overview of the scientific method and chemistry as a science, Basic concepts of matter, including atoms, molecules, and the periodic table, Introduction to chemical bonding and intermolecular forces, Basic principles of chemical reactions, including stoichiometry and reaction types | 6     | 15             |
| 2.               | <b>Chemical Thermodynamics and Kinetics</b><br>Introduction to thermodynamics and the laws of thermodynamics, Energy and enthalpy changes in chemical reactions, Introduction to chemical kinetics and reaction rates, Factors affecting reaction rates, including temperature, concentration, and catalysts                   | 6     | 15             |
| 3.               | <b>Properties of Matter and Solutions</b><br>Physical properties of matter, including states of matter and phase changes, Solutions and their properties, including solubility and colligative properties, Introduction to acids and   | 5     | 10             |

|    |   |   |    |
|----|---|---|----|
|    | bases and their properties, Chemical equilibrium and the equilibrium constant   |   |    |
| 4. | <b>Organic Chemistry</b><br>Introduction to organic chemistry and the basics of carbon chemistry, Functional groups and their properties, Nomenclature and isomerism in organic compounds, Introduction to organic reactions and mechanisms | 6 | 10 |

| <b>Section II</b> |   |       |                |
|-------------------|---|-------|----------------|
| Module            | Content   | Hours | Weightage in % |
| 5.                | <b>Introduction to Environment</b><br>Definition, principles and scope of Environmental Science, Impacts of development on Environment, Environmental Degradation, The interdisciplinary nature of environmental science, Concept of 4R's   | 06    | 10             |
| 6.                | <b>Environmental Pollution</b><br>a) Water Pollution: Introduction – Water Quality Standards, Sources of Water Pollution, Classification of water pollutants, Effects of water pollutants.<br>b) Air Pollution: Composition of air, Structure of atmosphere, Ambient Air Quality Standards, Classification of air pollutants, Sources of common air pollutants like PM, SO <sub>2</sub> , NO <sub>x</sub> , Auto exhaust, Effects of common air pollutants<br>c) Noise Pollution: Introduction, Sound and Noise, Noise measurements, Causes and Effects.<br>d) Solid Waste: Generation and management<br>e) Bio-medical Waste: Generation and management<br>f) E-waste: Generation and management | 08    | 20             |
| 7.                | <b>Social Issues and Environment</b><br>Sustainable Development, Equitable use of Resources for sustainable lifestyle and it's benefits, Water conservation, Climate Change, Global Warming and Green House Effect, Acid Rain, Depletion of Ozone layer, Carbon Footprint   | 08    | 20             |
|                   | <b>TOTAL</b>  | 45    | 100            |

#### List of Practical:

| Sr. No | Name of Practical   | Hours |
|--------|---|-------|
| 1.     | Acid-base titration adding a base of known concentration to an acid of unknown concentration until the reaction is complete, and the concentration of the acid is determined. | 02    |
| 2.     | Determination of the boiling point of a liquid heating a sample of a liquid and observing the temperature at which it boils.  | 02    |
| 3.     | Determination of the density of a liquid weighing a known volume of a liquid and calculating its density.   | 04    |
| 4.     | Determination of the pH of a solution using a pH meter to measure the acidity or basicity of a solution.  | 04    |

|     |  |           |
|-----|--|-----------|
| 5.  | Flame test: burning a sample of a substance and observing the color of the flame to identify the presence of certain elements.                                   | 04        |
| 6.  | Preparation of a salt reacting an acid and a base to form a salt and observing the reaction products.  | 02        |
| 7.  | Testing of soil acidity  | 02        |
| 8.  | Studying the effect of temperature on the solubility of a solid in water at different temperatures to see how temperature affects solubility.                    | 02        |
| 9.  | Studying the properties of acids and bases: Students can test the properties of different acids and bases (e.g., pH, conductivity) and compare their properties. | 04        |
| 10. | Investigating the reaction between an acid and a metal and measure the amount of gas produced.   | 04        |
|     | <b>TOTAL</b>   | <b>30</b> |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

##### Practical:

- Continuous Evaluation consists of performance of Practical which will be evaluated out of 10 marks for each practical and average of the same will be converted to 20 marks.
- Internal Viva consists of 20 marks.
- Practical performance/quiz/drawing/test of 30 marks during End Semester Exam.

- Viva/Oral presentation consists of 30 marks during End Semester Exam.

### Course Outcome(s):

After completion of the course, the student will be able to

| SECH1110 | Fundamental Chemistry & Environmental Science  |
|----------|--|
| CO 1     | Develop a fundamental understanding of the principles and concepts of chemistry, including atomic structure, chemical reactions, and chemical bonding. |
| CO 2     | Demonstrate an ability to apply chemical knowledge to real-world problems, such as calculating reaction yields and predicting chemical properties.     |
| CO 3     | Identify the types of pollution in society along with their sources.   |
| CO 4     | Realize the global environmental issues.   |

### Mapping of CO with PO:

| SECH1110 | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO 1     | 2   | 2   | 1   | 1   |     |     | 2   |     |     | 2    |      | 1    |
| CO 2     | 1   | 1   | 2   | 3   |     | 1   | 2   |     |     | 1    |      | 1    |
| CO 3     | 1   | 2   | 2   | 3   | 3   | 3   |     | 2   | 1   | 1    | 3    |      |
| CO 4     | 3   | 3   | 2   | 2   | 1   | 1   |     |     |     | 3    |      | 1    |

### Mapping of CO with PSO:

| SECH1110 | PSO1 | PSO2 | PSO3 |
|----------|------|------|------|
| CO 1     | 1    | 2    | 3    |
| CO 2     | 3    | 1    | 1    |
| CO 3     | 2    |      | 2    |
| CO 4     | 1    |      |      |

### Level of Bloom's Revised Bloom's Taxonomy in Assessment

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Know conventions and the methods of engineering drawing.
- Interpret engineering drawings using fundamental technical mathematics.
- Construct basic and intermediate geometry.
- Improve their visualization skills so that they can apply these skills in developing new products.
- Improve their technical communication skill in the form of communicative drawings.
- Comprehend the theory of projection.
- Basic knowledge of computer-aided drawing using AutoCAD.

**Course Content:**

| <b>Section I</b> |  |           |                |
|------------------|--|-----------|----------------|
| Module No.       | Contents   | Lab Hours | Weightage in % |
| 1.               | <b>Introduction:</b><br>Importance of the Course; Use of Drawing Instruments and accessories; BIS – SP – 46; Lettering, Dimensioning, and Lines; Representative Fraction; Types of Scales (Plain and Diagonal Scales); Construction of Polygons.   | 03        | 05%            |
| 2.               | <b>Engineering Curves:</b><br>Classification and Application of Engineering Curves; Construction of Conics, Cycloidal Curves, Involute, Spiral, and Normal & Tangent to each curve.  | 12        | 15%            |
| 3.               | <b>Projections of points, lines &amp; planes:</b><br>Types of Projections; Introduction of Principle Planes of Projections; Projection of Points in all four Quadrants; Projection of Lines inclined to one Referral Plane & two Referral Planes. True length and inclination with reference plane; Projection of Planes (Circular and Polygonal) with | 15        | 30%            |

|                   | inclination to one Referral Plane and two Referral Planes;<br>Concept of Auxiliary Projection Method.   |       |                |
|-------------------|---|-------|----------------|
| <b>Section II</b> |   |       |                |
| Module No.        | Content   | Hours | Weightage in % |
| 4.                | <b>Orthographic Projection and Isometric Projections</b><br>Types of Projections: Principle of First and Third Angle Projection Applications & Difference; Projection from Pictorial view of Object, View from Front, Top, and Sides; Full Section View. Isometric Scale, Conversion of Orthographic views into Isometric Projection, Isometric View, or Drawing of simple objects. | 18    | 30%            |
| 5.                | <b>Residential Building Planning:</b><br>Introduction to buildings, Classification of buildings, Principles of building planning, Principles of architecture composition, Detail drawing, Line Plan, plan, elevation, section, Preparing working drawing of residential building.   | 06    | 10%            |
| 6.                | <b>Computer-Aided Drawing:</b><br>Introduction to AutoCAD, Basic commands for 2D drawing (Line, Circle, Polyline, Rectangle, Hatch, Fillet, Chamfer, Trim, Extend, Offset, Dim style, etc.)   | 06    | 10%            |

**List of Practical:**

| Sr. No. | Name of Practical  | Hours     |
|---------|--|-----------|
| 1.      | Introduction sheet (dimensioning methods, different types of lines, construction of various polygons, dividing the line and angle into parts, use of stencil, lettering), plane scale and diagonal scale | 03        |
| 2.      | Engineering curves   | 12        |
| 3.      | Projection of points, lines & planes   | 15        |
| 4.      | Orthographic projection  | 10        |
| 5.      | Isometric projection   | 10        |
| 6.      | Residential building drawing (Line plan, Plan, Elevation, Section, Schedule opening)   | 04        |
| 7.      | Computer-Aided Drawing   | 06        |
|         | <b>TOTAL</b>   | <b>60</b> |

#### Web Material Link(s):

- <http://nptel.ac.in/courses/105104148/>

#### Course Evaluation:

##### Practical:

- Continuous evaluation consists of performance of practical/tutorial which will be evaluated out of 20 marks for each practical/tutorial and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical test will consist of 30 marks and viva will consist of 30 marks during end semester exam.

#### Course Outcome(s):

After the completion of the course, the following course outcomes will be able to:

| SEME1120 | FUNDAMENTALS OF TECHNICAL DRAWING   |
|----------|---|
| CO 1     | Apply BIS standards of building planning and conventions while drawing Lines, printing Letters, and showing dimensions. |
| CO 2     | Explore the various methods to draw various engineering curves and their applications.                                  |
| CO 3     | Classify the orthographic projection systems concerning the observer, object, and reference planes.                     |
| CO 4     | Develop 3D Isometric views in relation to 2D orthographic views.  |
| CO 5     | Software application in engineering drawing.  |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Study the basic fundamentals of construction planning and material.
- Study significance of mechanical engineering systems in different fields of engineering.
- Study the basic concepts of electrical and electronics engineering.

**Course Content:**

| Section I  |   |       |                |
|------------|---|-------|----------------|
| Module No. | Content   | Hours | Weightage in % |
| 1.         | <b>Basics of Construction material and techniques</b><br>Common materials used in construction, Aggregate, Sand, Cement, Bricks, Timber, Steel, Paints. Bonds in brick masonry techniques, Foam works, Curing, Compaction of concrete, Water proofing, Fire safety norms and requirement.   | 08    | 18             |
| 2.         | <b>Building planning and Bye laws</b><br>Building by laws as per national building code, building by laws as per local authority, standards for residential, public, commercial, industrial and institutional buildings planning, planning of earth quake resistance building, overview of RERA and ODPS, Green building and LEED certification, general layout, maps and plan used at construction site. | 08    | 18             |
| 3.         | <b>Basic Electricity Principles</b><br>Concept of Charge, Potential Difference and Current, Resistor, capacitor, Inductor, Ohm's law, effect of Temperature on resistance, temperature coefficient, Series  | 07    | 14             |

|                   | and parallel combinations of Resistors and capacitors, Lenz and Faraday's laws for electromagnetic induction, AC Electricity and DC Electricity.<br><b>Electrical Wiring:</b> Different types of conductors and cables. Basics of wiring-Star and delta connection. Voltage drop and losses across cables and conductors.  |       |                |
|-------------------|--|-------|----------------|
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |
| 4.                | <b>Basics of I.C Engines:</b><br>Construction and working of 2 Stroke & 4 Stroke Petrol and Diesel Engines, Difference Between 2-Stroke - 4 Stroke Engine & Petrol-Diesel Engine, Efficiency of I. C. Engines.   | 08    | 18             |
| 5.                | <b>Power Transmission Elements:</b><br>Construction and Applications of Couplings, Clutches and Brakes, Difference Between Clutch and Coupling, Types of Belt Drive and Gear Drive   | 08    | 18             |
| 6.                | <b>DC Circuits and AC Circuits</b><br>DC Circuits:<br>Introduction of Electrical circuit elements (prerequisites), voltage and current sources, Kirchoff's current and voltage laws, Thevenin and Norton Theorems. Time-domain analysis of first-order RL and RC circuits.<br>AC Circuits:<br>Representation of sinusoidal waveforms, peak and RMS values, Phasor representation of AC quantities, real power, reactive power, apparent power, power factor, Analysis of single-phase ac circuits consisting of R, L, C, RL, RC, RLC combinations (series and parallel), Series and parallel resonance. Three phase balanced circuits, voltage and current relations in star and delta connections, Power measurement in three phase circuits. | 06    | 14             |
| 7.                | <b>Basics of Steam Generators:</b><br>Introduction, Classification, Cochran, Lancashire and Babcock and Wilcox Boiler, Functioning of Different Mountings and Accessories  | LAB   | 08             |
|                   | <b>TOTAL</b>   | 45    | 100            |

**List of Practical:**

| Sr. No. | Name of Practical                                   | Hours |
|---------|---|-------|
| 1.      | Preparation of drawing sheet showing various bonds. | 04    |
| 2.      | Preparation of Basic plan of Construction site.     | 04    |

|    |  |    |
|----|--|----|
| 3. | Preparation sketch of various building component.                            | 04 |
| 4. | Verify the series and parallel connections of resistors and capacitors.      | 04 |
| 5. | To understand construction and working of various types of boilers.          | 04 |
| 6. | To understand construction and working of mountings and accessories.         | 04 |
| 7. | To verify the Kirchoff's current and voltage laws and Network theorems.      | 02 |
| 8. | To understand construction and working 2 -stroke & 4 -stroke Petrol engines. | 02 |
| 9. | To understand construction and working 2 -stroke & 4 -stroke Diesel engines. | 02 |
|    | <b>TOTAL</b>   | 30 |

#### **Web Material Link(s):**

- <http://nptel.ac.in/course.php>

#### **Course Evaluation:**

##### **Theory:**

- Continuous evaluation consists of two tests each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by Course Coordinator.
- End Semester Examination will consist of 60 marks.

##### **Practical:**

- Continuous Evaluation consists of performance of practical which will be evaluated out of 20 marks for each practical and average of the same will be converted to 10 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/drawing/test of 30 marks during End Semester Exam.
- Viva/Oral performance of 30 marks during End Semester Exam.

#### **Course Outcome(s):**

After the completion of the course, the following course outcomes will be able to:

| <b>SECV1110</b> | <b>Core Engineering Concepts</b>                                  |
|-----------------|---|
| CO 1            | Understand basic properties of various construction materials.    |
| CO 2            | Understand the general rules and regulation of building planning. |
| CO3             | Apply the principles of basic mechanical engineering.             |

|     |   |
|-----|---|
| C04 | Comprehend the importance of mechanical engineering equipment's like IC engine and power transmission elements.   |
| C05 | Understand working of various instruments and equipment's used for the measurement of various electrical engineering parameters like voltage, current, power, phase etc in industry as well as in power generation. |

#### Mapping of CO with PO:

| SECH1110 | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO 1     | 2   | 3   | 3   | 1   | 2   | 1   | 2   | 1   | 1   | 2    | 1    | 1    |
| CO 2     | 3   | 3   | 3   | 2   | 2   | 2   | 2   | 1   | 2   | 2    | 1    | 1    |
| CO 3     | 3   | 2   | 2   | 2   | 2   | 2   | 2   | 1   | 2   | 2    | 2    | 1    |
| CO 4     | 3   | 2   | 2   | 2   | 3   | 2   | 2   | 1   | 2   | 2    | 2    | 1    |
| CO 5     | 3   | 3   | 3   | 2   | 3   | 2   | 2   | 1   | 2   | 2    | 2    | 1    |

#### Mapping of CO with PSO:

| SECH1110 | PSO1 | PSO2 | PSO3 |
|----------|------|------|------|
| CO 1     | 2    | 2    | 2    |
| CO 2     | 2    | 3    | 2    |
| CO 3     | 3    | 3    | 3    |
| CO 4     | 3    | 2    | 3    |
| CO 5     | 3    | 3    | 2    |

#### Level of Bloom's Revised Bloom's Taxonomy in Assessment

|             |               |           |
|-------------|---------------|-----------|
| 1: Remember | 2: Understand | 3: Apply  |
| 4: Analyze  | 5: Evaluate   | 6: Create |

| Module No | Content  | RBT Level |
|-----------|--|-----------|
| 1         | Basics of Construction material and techniques | 1, 2, 3   |
| 2         | Building planning and Bye laws                 | 1, 2      |
| 3         | Basic Electricity Principles                   | 1,2,3     |
| 4         | Power Transmission Elements                    | 1, 2      |
| 5         | Basics of I.C Engines                          | 2         |
| 6         | DC Circuits and AC Circuits                    | 2,3,4     |
| 7         | Basics of Steam Generators                     | 1, 2      |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- extend concepts of set theory by the study of relation and lattice.
- illustrate mathematical logic with various techniques of program verification.
- apply knowledge of discrete mathematics for problem-solving skills necessary to succeed in the design and analysis of algorithms, database management, software engineering, and computer networks.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | <b>Set, Relation &amp; Function</b><br>Sets, Set operations, Introduction of Relations, Relations of Sets, Types of Relations, Properties of Relations, Equivalence Relation, Partial Ordering, Hasse Diagram, GLB & LUB, Functions, Classification of functions, Types of functions | 08    | 17             |
| 2.                | <b>Lattices</b><br>Definition & properties of Lattice, Lattices as Algebraic System, Sublattices, Types of lattices, Distributive lattices, Modular lattices, Complemented lattices, Bounded lattices, Complete lattices, Finite Boolean algebra                                     | 07    | 16             |
| 3.                | <b>Group Theory</b><br>Binary operations, Properties of Group, Groupoid, semigroup & monoid, Abelian group, Subgroup, Cosets, Normal subgroup, Lagrange's theorem, Cyclic group, Permutation group, Homomorphism & Isomorphism of groups.  | 08    | 17             |
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |
| 4.                | <b>Mathematical Logic and Proof</b><br>Propositions, logical operators, Algebra of proposition, Predicates & quantifiers, Nested Quantifiers, Rules of Inference, Proof Methods, Program Correctness techniques.   | 06    | 14             |
| 5.                | <b>Graph Theory</b>  |       |                |

|    |  |    |     |
|----|--|----|-----|
|    | Graphs and Graph Models, Graph Terminology and Types of graphs, Representing graphs and Isomorphism, Connectivity, Euler and Hamilton Paths-Circuits, Applications of weighted graphs.     | 08 | 18  |
| 6. | <b>Tree</b><br>Introduction to Trees, Rooted Tree, Properties of tree, Binary tree, Tree Traversal, Spanning Tree, DFS, BFS, Minimum Spanning Tree, Prim's Algorithm, Kruskal's Algorithm. | 08 | 18  |
|    | <b>TOTAL</b>   | 45 | 100 |

#### List of Tutorial(s):

| Sr. No. | Name of Practical                              | Hours |
|---------|--|-------|

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

#### Tutorial:

- Continuous Evaluation consists of the performance of tutorial which will be evaluated out of 10 marks for each tutorial and average of the same will be converted to 50 marks.
- Assignment consists of 20 marks.
- Internal viva consists of 30 marks.

#### Course Outcome(s):

After completion of the course, the students will be able to

| <b>SESH2130</b> | <b>DISCRETE STRUCTURES &amp; GRAPH THEORY</b>   |
|-----------------|---|
| CO 1            | Summarize the concepts of set theory for understanding & fetching data from a database using query.                           |
| CO 2            | Classify the basic concepts of spanning tree algorithms namely DFA, BFS, prim's and Kruskal's in the design of networks.      |
| CO 3            | Construct the algorithm of group theory for data encryption.  |
| CO 4            | Combine the design, foundational concepts of notations and results of graph theory used for better understanding of problems. |

#### Mapping of CO with PO

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- learn the basic concept of database design and development of database management system.
- understand Query processing of SQL.
- understand the importance of back-end design and relational database management System (RDBMS).

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | <b>Introduction to DBMS</b><br>Introduction and applications of DBMS, Purpose of DBMS, File system versus DBMS, Advantages of DBMS, Database System architecture, Database users, DBA  | 04    | 10             |
| 2.                | <b>Entity-Relationship model</b><br>Basic concepts, Design process: Attributes, Entity and Relationship, E-R constraints, weak entity sets, extended E-R features: generalization, specialization, aggregation, conversion of E-R diagram into database schema.  | 07    | 15             |
| 3.                | <b>SQL Concepts</b><br>Basics of SQL, Types of SQL language, Using DDL statements to create and manage tables, defining constraints: primary key, foreign key, unique key, Not null, check, Manipulating data using DML statements, Retrieving data using SQL select statement, SQL conditions in where clause, Built-in functions: numeric, date, string functions, Displaying data from multiple tables using Joins, Aggregate functions with group by and having clause, Subqueries with operators, SQL views, TCL commands: Commit, Rollback, Savepoint, DCL commands: Grant, revoke, query processing steps | 12    | 25             |
| <b>Section II</b> |  |       |                |

| Module No.   | Content  | Hours | Weightage in % |
|--------------|--|-------|----------------|
| 4.           | <b>Relational Model</b><br>Structure of relational databases, Domains, Relations, Relational algebra: fundamental operators and syntax, inner join, outer join, relational algebra queries   | 05    | 12             |
| 5.           | <b>Normalization</b><br>Functional Dependency: Definition, trivial and non-trivial FD, closure of attributes, closure of FD set, irreducible set of FD, Decomposition using FD, dependency preservation, Database design anomalies, Normalization: 1NF, 2NF, 3NF, BCNF, Multi-valued dependency, 4NF.  | 07    | 15             |
| 6.           | <b>Transaction Management</b><br>Transaction concepts, ACID property of transactions, concurrent executions of transactions and related problems, serializability of transactions, testing for serializability, deadlock, solution to concurrency related problems: Locking mechanism, two-phase locking protocol, System recovery, Log-based recovery, Two- phase commit protocol | 07    | 15             |
| 7.           | <b>Basics of PL/SQL</b><br>Programming structure of PL/SQL, Datatypes, Exception Handling, Cursor, Stored Procedure, Function, Trigger   | 03    | 08             |
| <b>TOTAL</b> |  | 45    | 100            |

#### List of Practical:

| Sr. No.      | Name of Practical   | Hours |
|--------------|---|-------|
| 1.           | Draw E-R Diagram of any management system with the use of any tools.  | 02    |
| 2.           | Installation of database management system e.g MYSQL, ORACLE, etc.  | 02    |
| 3.           | Introduction to SQL, DDL, DML, DCL, database and table creation, alteration, defining constraints, primary key, foreign key, unique, not null, check. | 06    |
| 4.           | Implement different operators and inbuilt SQL functions.  | 02    |
| 5.           | Implement different types of join operations and relevant features of SQL.  | 04    |
| 6.           | Implement aggregate functions with group by, having, order by features of SQL.  | 04    |
| 7.           | Implement the sub-queries and views in SQL.   | 04    |
| 8.           | Study and use of Transaction control commands, Commit, Rollback, Save point features of SQL.  | 02    |
| 9.           | Introduction to PL/SQL concepts and implementation of Cursors.  | 02    |
| 10.          | Study and Implementation of stored procedures, stored function and triggers.  | 02    |
| <b>TOTAL</b> |   | 30    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand the fundamentals of programming such as variables, conditional and iterative execution, methods, etc.
- Understand the fundamentals of object-oriented programming in Java, including defining classes, invoking methods, using class libraries, etc.
- Be aware of the important topics and principles of object-oriented software development.
- Be able to use the Java SDK environment to create, debug and run core Java programs.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | <b>Fundamental of Object-Oriented Programming:</b><br>History of Java, Basic overview of java, Bytecode, JVM, Buzz-words, Application and applets, Constants, Variables, Data Types, Comments, Operators, Control Flow   | 04    | 06             |
| 2.                | <b>Class Fundamentals:</b><br>General form of class, Creating class Overloading methods, Constructor, Declaring Object, Returning objects, using objects as parameters, assigning object reference variables, Introducing Access control, understanding static, introducing final, the finalize () method, This keyword, Garbage collection.   | 06    | 17             |
| 3.                | <b>Array &amp; String Handling:</b><br>Array basics, String Array, String class, String Buffer class, String Tokenizer Class and Object Class.   | 06    | 10             |
| 4.                | <b>Inheritance, Interfaces &amp; Packages:</b><br>Inheritance: Using super creating multilevel Hierarchy, method overriding, Dynamic method dispatch, abstract classes, using final with Inheritance, Using Package: Defining package, finding package and CLASSPATH, Access protection, importing package, Interface: Defining Interface, Implementing Interface, Variables in Interface. | 06    | 17             |
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |

|              |  |    |     |
|--------------|--|----|-----|
| 5.           | <b>Exceptions Handling:</b><br>Exception types, Try...Catch...Finally, Throw, Throws, creating your own exception subclasses.  | 06 | 14  |
| 6.           | <b>Multithreaded Programming:</b><br>Life cycle of thread, thread methods, thread priority, thread exceptions, Implementing Runnable interface, Synchronization.   | 08 | 18  |
| 7.           | <b>GUI Programming &amp; Lambdas and Streams:</b><br>Introduction to Annotation, Byte streams and character streams, Wrapper classes, Why Lambda Expression, Lambda Expression Syntax, where to use lambda expression, Adopting Patterns like matching, finding and filtering, Swing overview, Swing component classes: AbstractButton, ButtonGroup, ImageIcon, JApplet, JButton, JCheckBox, JComboBox, JLabel, JRadioButton, JScrollPane, JTabbedPane, JTable, JTextField, JTree. | 09 | 18  |
| <b>TOTAL</b> |  | 45 | 100 |

#### List of Practical:

| Sr. No.      | Name of Practical   | Hours |
|--------------|---|-------|
| 1.           | Introduction to Java Environment and NetBeans   | 02    |
| 2.           | Implementation of Java programs with classes and objects  | 02    |
| 3.           | Implementation of Java programs to create functions, constructors with overloading and overriding                 | 02    |
| 4.           | Implementation of Java programs to demonstrate different access specifiers  | 02    |
| 5.           | Implementation of Java programs for variables, data types, operators  | 02    |
| 6.           | Implementation of Java programs to use arrays and string  | 02    |
| 7.           | Implementation of Java programs for inheritance (single, multilevel, hierarchical)                                | 02    |
| 8.           | Implementation of Java programs to demonstrate the use of super keyword   | 02    |
| 9.           | Implementation of Java programs for Interface   | 02    |
| 10.          | Implementation of Java programs to demonstrate Java packages  | 02    |
| 11.          | Implementation of Java programs for exception handling using all keywords (try, catch, throw, throws and finally) | 02    |
| 12.          | Implementation of Java programs to demonstrate the life cycle of thread   | 02    |
| 13.          | Implementation of Java programs for the concepts of thread priority, synchronization, inter-thread communication  | 04    |
| 14.          | Implementation of Java AWT programs to Create Registration Form   | 02    |
| <b>TOTAL</b> |   | 30    |

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of practical performance which should be evaluated out of 10 for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva-voce consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SEIT2210 | Object Oriented Programming with Java  |
|----------|--|
| CO 1     | Implement Object Oriented programming concept using basic syntaxes of control Structures, strings, and function for developing skills of logic building activity.  |
| CO 2     | Use of a variety of basic control structures including selection and repetition; classes and objects in a tiered architecture (user interface, controller, and application logic layers)   |
| CO 3     | Demonstrates how to achieve reusability using inheritance, interfaces, and packages and describes faster application development that can be achieved.   |
| CO 4     | Demonstrate understanding and use of different exception handling mechanisms and concepts of multithreading for robust faster and efficient application development.   |
| CO 5     | Identify and describe common abstract user interface components to design GUI in Java using Swing along with a response to events. Identify, Design & develop complex Graphical user interfaces using principal Java Swing classes based on MVC architecture |

**Mapping of CO with PO**

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Study the pioneer of Software Development Life Cycle, Development models, and Agile Software Development.
- Study fundamental concepts in software testing, including software testing objectives, processes, criteria, strategies, and methods.
- Discuss various software testing issues and solutions in software unit tests; integration, regression, and system testing.
- Learn the process of improving the quality of software work products.

**Course Content:**

| <b>Section I</b>  |   |       |                |
|-------------------|---|-------|----------------|
| Module No.        | Content   | Hours | Weightage in % |
| 1.                | <b>Introduction to Software and Software Engineering</b><br>The Evolving Role of Software, A Crisis on the Horizon and Software Myths, Layered Technologies, Processes, Methods and Tools, Generic View of Software Engineering, Study of Different Models-Waterfall model, Incremental model, Evolutionary process models- Prototype, Spiral, and RAD model. | 06    | 15             |
| 2.                | <b>Agile Development</b><br>Agility and Agile Process model, Extreme Programming, Other process models of Agile Development and Tools.  | 04    | 10             |
| 3.                | <b>Requirement Analysis and Specification</b><br>Problem Recognition, Understanding the Requirement, Requirement Modelling, Requirement Specification (SRS), Requirement Analysis and Requirement Elicitation, Requirement Engineering.   | 05    | 10             |
| 4.                | <b>Structured Software Design</b><br>Design Concepts, Design Model, Software Architecture, Data Design, Architectural Design, Component Level Design (Function Oriented Design, Object Oriented Design), User Interface Design, Web Application Design.   | 08    | 20             |
| <b>Section II</b> |   |       |                |

| Module No.   | Content  | Hours | Weightage in % |
|--------------|--|-------|----------------|
| 5.           | <b>Software Coding &amp; Testing</b><br>Programming principles, Coding Standards and coding Guidelines, Unit testing; Metrics, Software testing fundamentals, Black-box and white box testing, Basis path testing, Control structure testing, Black-box testing - Graph-based testing method, Boundary value analysis; Testing strategies - A strategic approach to software testing, Test strategies for conventional and object-oriented software, test case generation and tool support, Metrics - Coverage analysis-reliability. | 08    | 20             |
| 6.           | <b>Quality Assurance</b><br>Quality Control, Assurance, Cost, Reviews, Software Quality Assurance, Approaches to SQA, Reliability, Quality Standards-ISO9000 and 9001.   | 04    | 08             |
| 7.           | <b>Software Project Management</b><br>Scope and Feasibility, Effort Estimation, Schedule and staffing, Quality Planning, Risk management- identification, assessment, control, project monitoring plan, Detailed Scheduling. Six Sigma for SE, Management Spectrum, People - Product - Process- Project, W5HH Principle, Importance of Team Management.  | 06    | 10             |
| 8.           | <b>Software Maintenance and Configuration Management</b><br>Types of Software Maintenance, Re-Engineering, Reverse Engineering, Forward Engineering, The SCM Process, Identification of Objects in the Software Configuration, Version Control and Change Control.   | 04    | 07             |
| <b>TOTAL</b> |  | 45    | 100            |

#### List of Tutorials:

| Sr. No.      | Name of Tutorial  | Hours |
|--------------|---|-------|
| 1.           | To select the project title and apply requirement engineering to it.              | 01    |
| 2.           | To perform the system analysis: Requirement analysis, SRS.                        | 01    |
| 3.           | To perform the function-oriented diagram: DFD and Structured chart.               | 01    |
| 4.           | To perform the user's view analysis: Use case diagram.                            | 01    |
| 5.           | To draw the structural view diagram: Class diagram.                               | 01    |
| 6.           | To draw the behavioral view diagram: Sequence diagram, Activity diagram.          | 02    |
| 7.           | To study various testing tools.   | 01    |
| 8.           | To design test cases.   | 01    |
| 9.           | To study cost estimation and preparation of timeline chart.                       | 01    |
| 10.          | To study the different types of performance testing.                              | 01    |
| 11.          | To study the usage of regression testing.   | 01    |
| 12.          | To understand the usage of software metrics.                                      | 01    |
| 13.          | Project Work: Understand the importance of the SDLC approach & various processes. | 02    |
| <b>TOTAL</b> |   | 15    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- recall existing knowledge of calculus and apply it for solving engineering problems involving differential equations.
- introduce partial differential equations with different methods of solution.
- understand periodic functions expressed as a Fourier series and applications of Fourier series to odes.
- introduce the basic statistical data analysis and probability distribution.

**Course Content:**

| <b>Section I</b>  |   |       |                |
|-------------------|---|-------|----------------|
| Module No.        | Content   | Hours | Weightage in % |
| 1.                | <b>Ordinary Differential Equation-I</b><br>First order ODEs, Formation of differential equations, Solution of differential equation, Solution of equations in separable form, Exact first order ODEs, Linear first order ODEs, Bernoulli Equation<br><b>Ordinary Differential Equation-II</b><br>ODEs of Second and Higher order, Homogeneous linear ODEs, Linear Dependence and Independence of Solutions, Homogeneous linear ODEs with constant coefficients, Nonhomogeneous ODEs, Variation of Parameters. | 10    | 20             |
| 2.                | <b>Partial Differential Equation</b><br>Formation of First and Second order equations, Solution of First order equations, Linear and Non-linear equations of first, Higher order equations with constant coefficients, Complementary function, Particular Integrals.  | 07    | 18             |
| 3.                | <b>Fourier Series</b><br>Periodic function, Euler Formula, Arbitrary Period, Even and Odd function, Half-Range Expansions   | 05    | 12             |
| <b>Section II</b> |   |       |                |
| Module No.        | Content   | Hours | Weightage in % |
| 4.                | <b>Basics of Statistics</b>   | 07    | 15             |

|              |  |    |     |
|--------------|--|----|-----|
|              | Elements, Variables, Observations, Quantitative and Qualitative data, Cross-sectional and Time series data, Frequency distribution, Dot plot, Histogram, Cumulative distribution, Measure of location, Mean, Median, Mode, Percentile, Quartile, Measure of variability, Range, Interquartile Range, Variance, Standard Deviation, Coefficient of Variation. |    |     |
| 5.           | <b>Correlation &amp; Regression Analysis</b><br>Regression Analysis, Regression line and regression coefficient, Karl Pearson's method.  | 07 | 15  |
| 6.           | <b>Probability Distribution</b><br>Introduction, Conditional probability, independent events, independent experiments, Theorem of TOTAL probability and Bayes' theorem, Probability distribution, Binomial distribution, Poisson distribution, Normal distribution, Hypothesis.  | 09 | 20  |
| <b>TOTAL</b> |  | 45 | 100 |

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

**Tutorial:**

- Continuous Evaluation consists of the performance of tutorial, which will be evaluated out of 10 per each tutorial and average of the same will be converted to 50 marks.
- Assignment consists of 20 marks.
- Internal viva consists of 30 marks.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SESH2140 | DIFFERENTIAL EQUATIONS & STATISTICS   |
|----------|---|
| CO 1     | Describe 1 <sup>st</sup> and 2 <sup>nd</sup> order ODEs and PDEs.   |
| CO 2     | Classify differential equations and evaluate linear & non-linear partial differential equations.  |
| CO 3     | Demonstrate Fourier series to study the behavior of periodic functions and their applications in system communications, digital signal processing and field theory. |
| CO 4     | Elaborate analysis of categorical data and quantitative data.   |
| CO 5     | Adapt the knowledge of various probability distribution and their applications in mathematical models, sport strategies and insurance.                              |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- understand the communication network design.
- understand state-of-the-art in network protocols, architectures.
- learn to develop an understanding of different components of computer networks, various protocols, technologies and their applications.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | <b>Introduction</b><br>Overview of network and data communication, types of Networks, Network Topology, Protocol hierarchies, and design issues of layers Interfaces, and services. Reference Model: The OSI reference model, TCP/IP reference model, network standards.                         | 04    | 10             |
| 2.                | <b>Physical Layer</b><br>Transmission media, Data and transmission techniques, Multiplexing, Asynchronous Communication, Wireless transmission, ISDN, ATM, Cellular Radio, Switching techniques issues.  | 07    | 15             |
| 3.                | <b>Data Link Layer</b><br>Layer design issues, services provided to network layers, Framing, Error control, and Flow control, Data link control and protocols – Simplex protocol, sliding window protocol, Utopia, Stop N Wait, Automatic Repeat Request. Go Back N, Selective Repeat Protocols. | 07    | 15             |
| 4.                | <b>Medium Access Sub Layer</b><br>Channel Allocations, Multiple Access protocols- ALOHA, CSMA, CSMA/CD protocols, Collision-free protocols, Limited contention protocols, LAN architectures, IEEE 802 and OSI, Ethernet (CSMA/CD), Bus, Token Ring, DQDB, FDDI, Bridges and recent developments. | 05    | 10             |
| <b>Section II</b> |  |       |                |

| Module No.   | Content   | Hours | Weightage in % |
|--------------|---|-------|----------------|
| 5.           | <b>Network Layer</b><br>A network Layer design issue, Routing algorithms, and protocols – OSPF, BGP, RIP, Congestion Control Algorithms, Internetworking – IPV4 & IPV6, Addressing, N/W Layer Protocols, and subnets. | 09    | 20             |
| 6.           | <b>Transport Layer</b><br>Transport services, Design issues, transport layer protocols – TCP & UDP, Congestion Control, QOS and its improvement.  | 07    | 15             |
| 7.           | <b>Application Layer</b><br>Client-Server Model, WWW, HTTP, DNS, DHCP, FTP, and Email Protocol – IMAP, POP3, SMTP   | 06    | 15             |
| <b>TOTAL</b> |   | 45    | 100            |

#### List of Practical:

| Sr. No.      | Name of Practical  | Hours |
|--------------|--|-------|
| 1.           | To study and prepare LAN cables (cross and straight) using crimping tool, to configure LAN.                          | 02    |
| 2.           | To study and Physical examine different network device and their usage.  | 02    |
| 3.           | Configure switch and router in small network and identify the difference.  | 02    |
| 4.           | To Study of network IP – IPv4 & IPv6.  | 02    |
| 5.           | Configure Network Topology using Cisco Packet tracer.  | 04    |
| 6.           | To monitor network traffic using Wire Shark  | 02    |
| 7.           | To get the MAC or Physical Address of the system Using Address Resolution Protocol.                                  | 02    |
| 8.           | To Configure network using Routing Information Protocol (RIP)  | 04    |
| 9.           | To configure network state routing protocol (OSPF).  | 02    |
| 10.          | To configure Border Gateway Protocol.  | 02    |
| 11.          | To configure Application Layer protocols: DHCP and DNS and understand its functionality in Wireshark/ Packet tracer. | 02    |
| 12.          | Understand functionality of TCP & UDP using Wireshark/ Packet Tracer.  | 02    |
| 13.          | Understand functionality of HTTP & FTP using Wireshark/ Packet Tracer.   | 02    |
| <b>TOTAL</b> |  | 30    |

### Course Evaluation:

#### Theory:

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

#### Practical:

- Continuous Evaluation consists of practical performance which should be evaluated out of 10 for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva-voce consists of 30 marks during End Semester Exam.

### Course Outcome(s):

After completion of the course, the students will be able to

| SECE2240 | COMPUTER NETWORKS   |
|----------|---|
| CO 1     | Distinguish the working of network protocols, application and OSI reference model and TCP/IP reference model. |
| CO 2     | Comprehend functionality of various protocols and algorithms with various architecture layer.                 |
| CO 3     | Design computer network configuration.  |
| CO 4     | Recognize the technological trends of Computer Networking   |

### Mapping of CO with PO

**Objective(s) of the Course:**

To help learners to

- To provide a fundamental understanding of the operating system functions, architecture, services, and interconnections among services within operating systems.

**Course Content:**

| <b>Section I</b>  |   |       |                |
|-------------------|---|-------|----------------|
| Module No.        | Content   | Hours | Weightage in % |
| 1.                | <b>Introduction to Operating System</b><br>Basics of Operating System: Definition, Types of Operating System, Operating System Structure, Operating System Services, Concept of Virtualization.   | 03    | 07             |
| 2.                | <b>Processes and Threads Management</b><br>Concept of Process: Definition, Process State, Process State Transition, Process Control Block, CPU Scheduling: CPU-I/O Burst Cycle, Types of Schedulers, Context Switching, Preemptive and Non- Preemptive Scheduling, Scheduling Criteria, Process Scheduling Algorithms: FCFS, SJF, Priority, Round- Robin, Multilevel Queue, and Lottery Scheduling; Threads, Types of Threads, Multithreading | 09    | 20             |
| 3.                | <b>Inter Process Communication</b><br>Race Conditions, Critical Regions, Mutual Exclusion with Busy Waiting, Sleep and Wakeup, Semaphores, Mutexes, Monitors, Message Passing, Classical IPC Problems: The Dining Philosopher Problem, The Readers and Writers Problem  | 07    | 15             |
| 4.                | <b>Deadlocks</b><br>Resources, Conditions for Deadlocks, Deadlock Modelling, , Deadlock Detection and Recovery, Deadlock Avoidance, Deadlock Prevention.  | 04    | 08             |
| <b>Section II</b> |   |       |                |
| 5.                | <b>Memory Management</b><br>Main memory: Background, Swapping, Contiguous Memory Allocation, Segmentation, Paging: Introduction to Paging, Translation look-aside buffer (TLB), Structure of Page Table, Virtual memory: Background, Demand Paging, Page  | 11    | 25             |

|              |  |    |     |
|--------------|--|----|-----|
|              | Replacement Algorithms: FIFO, Optimal Page Replacement, Least Recently Used, Not Recently Used, Second Chance Page Replacement, Thrashing.   |    |     |
| 6.           | <b>File Management</b><br>File Concepts: File Types, File Attributes, File Access Methods, File Operations, Directories: Directories Structure, Path Types, Directory Operations; File Allocation Methods: Contiguous, Linked, Indexed Allocation. | 05 | 12  |
| 7.           | <b>Disk Management</b><br>Disk structure, Disk Scheduling Algorithms: FCFS, SSTF, SCAN, C-SCAN, LOOK, C-LOOK, Disk Free Space Management, RAID Levels.   | 06 | 13  |
| <b>TOTAL</b> |  | 45 | 100 |

### List of Practical:

| Sr. No.      | Name of Practical   | Hours |
|--------------|---|-------|
| 1.           | Study of basic commands of Linux.   | 02    |
| 2.           | Study of Advance commands and filters of Linux/UNIX.  | 02    |
| 3.           | Write shell scripts to perform several computations like add numbers, subtract numbers, find average, percentage. Also find factorial of a given number. Generate Fibonacci series etc. | 04    |
| 4.           | Simulate any two CPU scheduling algorithms. (E.g. FCFS, SJF, Round Robin etc.)  | 04    |
| 5.           | Simulate any two contiguous memory allocation techniques. (E.g. Worst-fit, Best-fit, Next-fit, First-fit)   | 04    |
| 6.           | Simulate banker's algorithm for deadlock avoidance.   | 04    |
| 7.           | Simulate any two page replacement algorithms. (E.g. FIFO, LRU, Optimal)   | 04    |
| 8.           | Simulate any two disk scheduling algorithms. (E.g. FCFS,SCAN,C-SCAN)  | 04    |
| 9.           | Case studies: OS in Industries, Protection and Role-based Access Controls of OS.  | 02    |
| <b>TOTAL</b> |   | 30    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand life cycle of an application/activity.
- Learn design of responsive mobile applications.
- Develop mobile application using open-source technologies.

**List of Practical:**

| Sr. No.      | Name of Practical  | Hours     |
|--------------|--|-----------|
| 1.           | Create Hello World Application.  | 02        |
| 2.           | Create an application to perform addition, subtraction, multiplication, division operation on given two numbers entered by user.   | 02        |
| 3.           | Create an application to convert temperature from Fahrenheit to Celsius.   | 02        |
| 4.           | Create a login application to validate Email ID and Password. Display Toast Message on successful login or error message if not login.   | 04        |
| 5.           | Create an application UI component: Image Button, Toggle button, Progress Bar, Spinner, Date Picker, Time Picker, Seek Bar , Switch, Rating Bar.                                       | 08        |
| 6.           | Create an application that will change color of the screen, based on selected options from the menu.   | 04        |
| 7.           | Create an UI such that, one screen have list of all friends. On selecting of any name, next screen should show details of that friend like Name, Image, Interest, Contact details etc. | 04        |
| 8.           | Create an android app to draw red color circle & blue color rectangle using paint & canvas class.  | 04        |
| 9.           | Create an app to send SMS and email.   | 06        |
| 10.          | Create an application that will play a media file from the memory card.  | 04        |
| 11.          | Create application using Google speech API.  | 06        |
| 12.          | Create an application to make Insert, Update, and Delete operation on the database.  | 04        |
| 13.          | Android Studio Setup for flutter Development   | 04        |
| 14.          | Create an application to demonstrate Dialogs & Expansion tile card in a flutter  | 06        |
| <b>TOTAL</b> |  | <b>60</b> |

**Text Book(s):**

| Title | Author/s | Publication |
|-------|----------|-------------|
|-------|----------|-------------|

|   |   |                   |
|---|---|-------------------|
| Introduction to Android Application Development | Joseph Annuzzi Jr., Lauren Darcey, Shane Conder | Pearson Education |
| Beginning Android 4 Application Development     | Wei Meng Lee                                    | Wrox              |

### Reference Book(s):

| Title  | Author(s)   | Publication       |
|--|-------------|-------------------|
| Android Application Development for Dummies, 3 <sup>rd</sup> Edition | Donn Felker | Wiley Publication |

### Web Material Link(s):

- <https://nptel.ac.in/courses/106106156/>

### Course Evaluation:

#### Practical:

- Continuous Evaluation consists of practical performance which should be evaluated out of 10 for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva-voce consists of 30 marks during End Semester Exam.

### Course Outcome(s):

After completion of the course, the students will be able to

| SEIT2241 | MOBILE APPLICATION DEVELOPMENT   |
|----------|--|
| CO 1     | Develop user friendly mobile applications by implementing different practicals.                            |
| CO 2     | Understand the concepts of front-end development using various technologies                                |
| CO 3     | Analyze and implement frameworks, database and design patterns in mobile applications.                     |
| CO 4     | Create a small but realistic working mobile application using different application programming interface. |

### Mapping of CO with PO

| SEIT2241 | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO 1     | 1   | 2   | 1   | 1   | 3   | 2   |     |     | 1   | 2    | 1    | 1    |
| CO 2     | 2   | 1   | 2   | 2   | 3   | 2   | 1   |     | 1   | 1    | 1    | 2    |
| CO 3     |     | 2   | 3   | 2   | 3   | 2   |     | 1   | 1   | 2    | 2    | 3    |
| CO 4     | 3   | 3   | 3   | 2   | 3   | 3   |     |     | 3   | 3    | 3    | 3    |

### Mapping of CO with PSO

| SEIT2241 | PSO1 | PSO2 | PSO3 |
|----------|------|------|------|
| CO 1     | 2    | 1    | 1    |
| CO 2     | 2    | 3    | 1    |
| CO 3     | 3    | 3    | 3    |
| CO 4     | 3    | 3    | 3    |

### Level of Revised Bloom's Taxonomy in Assessment

|             |               |           |
|-------------|---------------|-----------|
| 1: Remember | 2: Understand | 3: Apply  |
| 4: Analyze  | 5: Evaluate   | 6: Create |

| Practical No | Content  | RBT Level |
|--------------|--|-----------|
| 1.           | Introduction of Android                                    | 1,2,3     |
| 2.           | Android Application Design and Resource                    | 2,3,4     |
| 3.           | Exploring User Interface Screen Elements                   | 2,3,4     |
| 4.           | Designing User Interfaces with Layouts                     | 2,3,6     |
| 5.           | Working with Widgets & Control                             | 2,4,5,6   |
| 6.           | Drawing & Working with Animation                           | 3,4,6     |
| 7.           | Designing Application , Working with Android Manifest file | 2,6       |
| 8.           | Canvas & Paint Class, Multimedia APIs.                     | 1,2,6     |
| 9.           | Networking APIs, Android Web APIs.                         | 1,2,5,6   |
| 10.          | Working with Media Controller.                             | 2,3       |
| 11.          | Working with Speech to Text & Text to Speech.              | 3,6       |
| 12.          | Storage APIs, Working with Database.                       | 4,3,6     |
| 13.          | Cross Platform Mobile Application using flutter.           | 2,3       |
| 14.          | Demonstrate UI Components in flutter                       | 2,3,6     |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand the Relationship between Models and Formal Languages as part of concept of Automata.
- Employ finite state machines to solve complex problems in computing and classify machines based on their capabilities to recognize and process different languages.
- Develop and Implement Lexical and Syntax Analysis Skills for the implementation of the tools like compiler.

**Course Content:**

| <b>Section I</b> |  |       |                |
|------------------|--|-------|----------------|
| Module No.       | Content  | Hours | Weightage in % |
| 1.               | <b>Introduction to Automata</b><br>Languages, definitions, Regular Expressions, Regular Grammars, Acceptance of Strings and Languages, Finite Automaton Model, DFA, NFA, conversion of NFA to DFA, Conversion of Regular Expression to NF.   | 06    | 10             |
| 2.               | <b>Stages of Compilation and Lexical Analysis and Top Down Parsing</b><br>Chomsky hierarchy of Languages, Phases of compilation overview, Pass, Phase, Interpretation, Bootstrapping. Context free grammars, Top Down Parsing: Parse Trees, Ambiguous Grammars, Backtracking, LL (1), Recursive Descent parsing, Predictive parsing, pre-processing steps for predictive processing.               | 08    | 18             |
| 3.               | <b>Bottom Up Parsing and Semantic Analysis and Symbol Table Organization</b><br>Bottom-up parsing and handle pruning, LR (k) grammar parsing, LALR (k) Grammars, Error Recovery in parsing, parsing ambiguous grammars, YACC parser generator. Intermediate source program forms - AST, polish notation and 3 address code, Attribute Grammars, Syntax Directed Translation, Conversion of popular | 09    | 22             |

|                   | programming constructs into intermediate code forms, Inherited Grammars, Type Checking, Equivalence of type expressions.   |       |                |
|-------------------|--|-------|----------------|
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |
| 4.                | <b>Data Structure Support</b><br>Symbol table format, organization, Block structured languages, hashing, Block structure and non-block structure storage allocation: static, runtime and heap allocation for arrays, strings and records.  | 05    | 10             |
| 5.                | <b>Code Optimization</b><br>Consideration for optimization, Scope of optimization, DAG representation, Basic blocks, partitioning into basic blocks, Compile Time Evaluation, Common Subexpression elimination, dead code elimination, Strength Reduction, Code Movement, Loop Invariant Method, Loop Fusion, Loop Unrolling, Induction Variables and Reduction in Strength. | 08    | 18             |
| 6.                | <b>Code Generation</b><br>Absolute Code, Re-locatable Machine Code, Assembler Code, Register and Address Descriptors, Implementing Global Register Allocation, Usage Counts, Using DAG for register allocation, Simple Code generation Algorithm, Generic Code generation Algorithm, Generating code from DAG.   | 09    | 22             |
| <b>TOTAL</b>      |  | 45    | 100            |

**List of Case Study:**

| Sr. No. | Case Study topic  | Hours |
|---------|---|-------|
| 1.      | <b>Designing a Regular Expression Matcher:</b> Implement a regular expression matcher using finite automata.                | 01    |
| 2.      | <b>Converting NFA to DFA:</b> Convert a given NFA to an equivalent DFA and compare their performance.                       | 01    |
| 3.      | <b>Regular Grammar to Regular Expression:</b> Convert a regular grammar to a regular expression and vice versa.             | 01    |
| 4.      | <b>Lexical Analyzer Design:</b> Design a lexical analyzer for a simple programming language.                                | 01    |
| 5.      | <b>Top-Down Parsing:</b> Implement a top-down parser for a given grammar and analyze its efficiency.                        | 01    |
| 6.      | <b>Bottom-Up Parsing:</b> Implement a bottom-up parser using LR(k) grammar and handle pruning techniques.                   | 01    |
| 7.      | <b>Semantic Analysis:</b> Perform semantic analysis on a given source code and generate a symbol table.                     | 01    |
| 8.      | <b>Code Optimization Techniques:</b> Apply various code optimization techniques like loop fusion and dead code elimination. | 01    |
| 9.      | <b>Register Allocation:</b> Implement a simple code generation algorithm with global register allocation.                   | 01    |
| 10.     | <b>Attribute Grammars:</b> Use attribute grammars for syntax-directed translation and type checking.                        | 01    |
| 11.     | <b>YACC Parser Generator:</b> Use YACC to generate a parser for a given grammar and handle error recovery.                  | 01    |
| 12.     | <b>Intermediate Code Generation:</b> Convert popular programming constructs into intermediate code forms.                   | 01    |

|              |  |    |
|--------------|--|----|
| 13.          | <b>Type Checking:</b> Implement type checking for a given set of type expressions.                     | 01 |
| 14.          | <b>Symbol Table Organization:</b> Design and implement a symbol table for a block-structured language. | 01 |
| 15.          | <b>Code Generation from AST:</b> Generate machine code from an abstract syntax tree (AST).             | 01 |
| <b>TOTAL</b> |  | 15 |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

##### Practical:

- Continuous Evaluation consists of practical performance which should be evaluated out of 10 for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva-voce consists of 30 marks during End Semester Exam.

#### Course Outcome(s):

After completion of the course, the students will be able to

| <b>SECE3210</b> | <b>Automata Theory and Compiler Design</b>  |
|-----------------|---|
| CO 1            | Understand and apply the concepts of automata, regular expressions, and grammars.                   |
| CO 2            | Design and implement finite automata, including DFA and NFA.  |
| CO 3            | Convert regular expressions to finite automata and vice versa.                                      |
| CO 4            | Design and implement lexical analyzers and parsers using top-down and bottom-up parsing techniques. |
| CO 5            | Perform code optimization and generate intermediate code from abstract syntax trees.                |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- understand the fundamental concepts and technologies underlying the Internet of Things (IoT).
- develop the practical skills to design, develop, and implement simple IoT systems using hardware and software tools.
- gain knowledge of IoT communication protocols, networking concepts, and cloud computing platforms relevant to IoT.
- analyze and evaluate the security, ethical, and societal implications of IoT technologies.

**Course Content:**

| <b>Section I</b> |  |       |                  |
|------------------|--|-------|------------------|
| Module No.       | Content  | Hours | Weightage in %   |
| 1.               | <b>Introduction to IoT:</b><br>Overview of IoT: Definition, scope, and applications, End-to-End IoT Architecture, Challenges and opportunities in IoT adoption. IoT Trends: Edge computing, AI integration, digital twins, fog computing, 5G for IoT, IoMT, IIoT, smart cities                         | 03    | 10               |
| 2.               | <b>Embedded IoT Devices:</b><br>Overview of embedded systems and selection criteria for IoT hardware. Comparison: Microcontroller (MCU) vs. Microprocessor (MPU) devices. Introduction to development boards: Arduino UNO, ESP8266, and ESP32. GPIO basics and interfacing with sensors and actuators. | 05    | 17               |
| 3.               | <b>Sensors and Actuators:</b><br>Overview of sensors: Types and working principles. Actuators: Types, functionality and applications. Programming and interfacing of analog, digital, and protocol-based sensors. Case study   | 04    | 13               |
| 4.               | <b>IoT Networking and Gateway Devices:</b><br>Networking Fundamentals: addresses, subnets, routing, Common network protocols: TCP/IP, UDP, HTTP, Introduction  | 04    | 13 <sup>79</sup> |

|                   | to IoT Gateways: Definition, functions, Types, Introduction to Raspberry Pi and its capabilities in IoT, Setting up the Raspberry Pi development environment  |       |                |
|-------------------|---|-------|----------------|
| <b>Section II</b> |   |       |                |
| Module No.        | Content   | Hours | Weightage in % |
| 5.                | <b>IoT Communication Protocols:</b><br>IoT Network Layer Protocols: RPL, 6LoWPAN, LoRaWAN, Wireless Connectivity Options: Wi-Fi, Bluetooth/BLE, Zigbee, Cellular, NFC, Communication Protocols: MQTT, HTTP, CoAP          | 06    | 20             |
| 6.                | <b>IoT Cloud and IoT Applications:</b><br>Cloud computing models, Cloud services for IoT, IoT Cloud Platforms, IoT data management, Importance of data analytics in IoT, IoT Applications: RFID, iBeacon, Industry 4.0    | 05    | 17             |
| 7.                | <b>IoT Security:</b><br>Security Concerns in IoT: Data privacy, device vulnerabilities, best practice to Secure IoT: Authentication, authorization, encryption, access control, secure boot, firmware updates, Case study | 03    | 10             |
| <b>TOTAL</b>      |   | 30    | 100            |

**List of Practical:**

| Sr. No. | Name of Practical  | Hours |
|---------|--|-------|
| 1.      | Understand the fundamentals of IoT hardware and software, including electronics basics, Arduino IDE setup, and Tinkercad circuit simulation and IoT career pathways.                         | 04    |
| 2.      | Explore GPIO interfacing with Arduino to control digital and analog devices using sensors, LEDs, buttons, and PWM techniques for motor and brightness control.                               | 04    |
| 3.      | Interface temperature, obstacle/motion, distance measure sensors with Arduino to acquire real-world data and develop mini-projects like temperature monitoring and motion-activated systems. | 06    |
| 4.      | Set up and program NodeMCU/ESP8266 for IoT applications with Wi-Fi connectivity and build basic HTTP offline/online web servers for data communication.                                      | 04    |
| 5.      | Develop IoT applications with NodeMCU, integrating sensors like DHT22 to log data using offline http server and MPU6050 to control devices such as LEDs through gesture recognition.         | 06    |
| 6.      | Implement MQTT protocol for IoT communication by setting up a broker and exchanging data between devices for tasks like sensor logging and actuator control.                                 | 06    |
| 7.      | Set up Raspberry Pi environment, utilize it for GPIO control, sensor and actuator interfacing, and developing basic home automation systems.   | 04    |
| 8.      | Visualize IoT data and control actuators using Node-RED by creating data acquisition flows, charts, and integrating with NodeMCU for interactive control.                                    | 06    |

|              |  |           |
|--------------|--|-----------|
| 9.           | Integrate IoT devices with cloud platforms to publish, visualize, and control data using dashboards and commands on platforms like ThingSpeak and Adafruit IO. | 04        |
| 10.          | Design an Android app using MIT App Inventor or Android Studio to control IoT devices via MQTT or HTTP, enabling real-time monitoring and operation.           | 06        |
| 11.          | Capstone Project   | 10        |
| <b>TOTAL</b> |  | <b>60</b> |

**Text Book(s):**

| Title  | Author/s   | Publication                 |
|--|--|-----------------------------|
| Introduction to IoT  | Sudip Misra, Anandarup Mukherjee, Arijit Roy                   | Cambridge University Press  |
| Internet of Things   | Shriram K. Vasudevan, Abhishek S. Nagarajan, R. M. D. Sundaram | Wiley India                 |
| The Internet of Things Enabling Technologies, Platforms, and Use Cases | Pethuru Raj, Anupama C. Raman                                  | CRC Press, Taylor & Francis |

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of practical performance which should be evaluated out of 10 for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva-voce consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

|                 |                           |    |
|-----------------|---------------------------|----|
| <b>SECE3221</b> | <b>INTERNET OF THINGS</b> | 81 |
|-----------------|---------------------------|----|

|      |   |
|------|---|
| CO 1 | Explain the core concepts, architecture, and applications of the Internet of Things.        |
| CO 2 | Select and interface appropriate sensors, actuators, and microcontrollers for IoT projects. |
| CO 3 | Develop and implement simple IoT applications using Arduino, NodeMCU, and Raspberry Pi.     |
| CO 4 | Understand and apply IoT communication protocols and network concepts.                      |
| CO 5 | Evaluate the security, ethical, and societal implications of IoT technologies.              |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- develop logic building and problem-solving skills.
- understand how to calculate time complexity and space complexity of any algorithm.
- demonstrate and teach various methods for performance analysis of different types of algorithms.
- compare major algorithmic design techniques and demonstrate their application using suitable examples.

**Course Content:**

| <b>Section I</b> |   |       |                |
|------------------|---|-------|----------------|
| Module No.       | Content   | Hours | Weightage in % |
| 1.               | <b>Introduction to Algorithms</b><br>Definition of the Algorithm, Characteristics of algorithms, Types of algorithm designs technique, Recursive Algorithms, Need of Analysis   | 02    | 02             |
| 2.               | <b>Analysis of Algorithms</b><br>The efficient algorithm, Asymptotic Notations, Analyzing control statement and Loop invariant, Analysis of different algorithms for best, worst and average case: sequential search, bubble sort, insertion sort, selection sort, heap sort, Concept of Internal & External sorting.   | 04    | 13             |
| 3.               | <b>Divide and Conquer Algorithmic Design Method</b><br>Divide and conquer: basic algorithm and characteristics, Recurrence and different methods to solve recurrence, Binary Search: method and analysis of binary search for best, worst and average case for searches, Quick Sort, Merge Sort: method and analysis of algorithms, Finding the largest and smallest number in a list, Matrix Multiplication. | 06    | 15             |
| 4.               | <b>Greedy Method</b><br>The Greedy Method: basic algorithm and characteristics, Problem solving using Greedy technique- Fractional Knapsack   | 06    | 10 83          |

|                   | Problem, Optimal merge patterns, Job sequencing with deadlines, Huffman Coding, Minimum cost spanning trees: Prim's and Kruskal's Algorithm, Single source shortest path.   |              |                       |
|-------------------|---|--------------|-----------------------|
| 5.                | <b>Dynamic Programming Method</b><br>Dynamic Programming Method: basic algorithm and characteristics, Problem solving using Dynamic Programming technique- 0/1 Knapsack Problem, Making Change Problem, Multistage graphs, Optimal binary search trees, Travelling salesperson problem.               | 05           | 10                    |
| <b>Section II</b> |   |              |                       |
| <b>Module No.</b> | <b>Content</b>  | <b>Hours</b> | <b>Weightage in %</b> |
| 6.                | <b>Backtracking and Branch and Bound technique</b><br>Backtracking Method: basic algorithm and characteristics, Problem solving using Backtracking technique- N-Queens problem, Sum of subsets problem, Graph coloring, Hamiltonian cycle (TSP).  | 06           | 15                    |
| 7.                | <b>Branch and Bound technique</b><br>Branch and bound: basic algorithm and characteristics, FIFO Branch and Bound & Least Cost Branch & Bound, Problem solving using Branch and Bound technique- N-Queens using branch & bound, Least Cost Search, 15-puzzle, Solving Travelling salesperson problem. | 08           | 15                    |
| 8.                | <b>String Matching</b><br>Introduction, The naive string-matching algorithm, The Rabin-Karp algorithm, String Matching with finite automata, The Knuth-Morris-Pratt algorithm.  | 04           | 12                    |
| 9.                | <b>Introduction to NP-Completeness</b><br>Definition of P and NP classes, Relation between complexity classes, Examples of problems in various classes.   | 04           | 08                    |
| <b>TOTAL</b>      |   | 45           | 100                   |

**List of Practical:**

| <b>Sr. No.</b> | <b>Name of Practical</b>                                 | <b>Hours</b> |
|----------------|--|--------------|
| 1.             | Implementation and Time analysis of Bubble sort.         | 02           |
| 2.             | Implementation and Time analysis of Selection sort.      | 02           |
| 3.             | Implementation and Time analysis of Insertion sort.      | 02           |
| 4.             | Implementation and Time analysis of Merge sort.          | 02           |
| 5.             | Implementation and Time analysis of Quick sort.          | 02           |
| 6.             | Implementation and Time analysis of searching algorithm. | 04           |
| 7.             | Implementation of greedy algorithm.                      | 04           |
| 8.             | Implementation of a dynamic programming.                 | 04           |
| 9.             | Implementation of graph traversal technique.             | 02           |
| 10.            | Implementation of Minimum Cost Spanning Tree.            | 02           |
| 11.            | Implementation of backtracking.                          | 04           |

|              |   |           |
|--------------|---|-----------|
| 12.          | Implementation of Rabin-Karp algorithm. | 02        |
| <b>TOTAL</b> |   | <b>30</b> |

**Text Book(s):**

| Title                      | Author/s  | Publication  |

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of practical, which will be evaluated out of 10 marks per each practical and average of the entire practical will be converted to 10 marks.
- Internal viva consists of 10 marks.
- Practical performance consists of 15 marks during End Semester Exam.
- External viva consists of 15 marks in End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SEIT3211 | DESIGN & ANALYSIS OF ALGORITHMS  |
|----------|--|
| CO 1     | Illustrate various concept of algorithms.  |
| CO 2     | Analyze and design algorithms to appreciate the impact of algorithm design in practice.  |
| CO 3     | Compute how asymptotic notation is used to provide a rough classification of algorithms. |
| CO 4     | Design time and space efficient algorithms using different techniques.                   |

### Mapping of CO with PO

| SEIT3211 | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of the performance of practical which will be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal viva consists of 10 marks.
- Practical performance/quiz/test consists of 15 marks during End Semester Exam.
- Viva/oral performance consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SEIT3221 | ADVANCE JAVA TECHNOLOGY   |
|----------|---|
| CO 1     | Implement Networking and Data base connectivity in Java for given application.  |
| CO 2     | Design and implement webpage with dynamic content and server-side web application using Servlet and JSP.                |
| CO 3     | Apply the different web services on dynamic web-based applications.   |
| CO 4     | Analyze and Implement database independent application using ORM (Object Relation Mapping) Hibernate.                   |
| CO 5     | Use web application framework and apply Model-View-Controller architecture to build complex client-server applications. |

**Mapping of CO with PO**

### Mapping of CO with PSO

| SEIT3920 | PSO1 | PSO2 | PSO3 |
|----------|------|------|------|
| CO 1     |      | 2    |      |
| CO 2     | 2    | 3    |      |
| CO 3     |      | 2    | 2    |
| CO 4     |      | 1    | 2    |

### Report Writing Guidelines

#### A. Report Format:

1. Title Page (to be provided by the respective supervisor)

The title page of the project shall give the following information in the order listed:

- Full title of the project as approved by the Mentor;
- The full name of the student/Group of students with enrollment number;
- The qualification for which the project is submitted;
- The name of the institution to which the project is submitted;
- The month and year of submission.

2. Project Certification Form

[The form should be duly filled signed by the supervisors.]

3. Acknowledgements

[All persons (e.g. supervisor, technician, friends, and relatives) and organization/authorities who/which have helped in the preparation of the report shall be acknowledged.]

4. Table of Contents/Index with page numbering

5. List of Tables, Figures, Schemes

6. Summary/abstract of the report.

7. Introduction/Objectives of the identified problem

8. Data Analysis and Finding of Solution

9. Application of the identified solution

10. Future Scope of enhancement of the Project and Conclusion

11. "Learning during Project Work", i.e. "Experience of Journey during Project Duration"

12. References(must)

13. Bibliography

14. Annexures (if any)

#### B. Guideline for Report Formatting:

- Use A4 size page with 1" margin all sides

- Header should include Project title and footer should contain page number and enrollment numbers
- Chapter Name should be of Cambria font, 20 points, Bold
- Main Heading should be of Cambria font, 14 points, Bold
- Sub Heading should be of Cambria font, 12 points, Bold
- Sub Heading of sub heading should be of Cambria font, 12 points, Bold, Italic
- Paragraph should be of Cambria font, 12 points, no margin at the start of the paragraph
- Line spacing for all content – 1.15, before - 0, after - 0
- No chapter number for references
- Before chapter 1, give page numbers in roman letter

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- understand the principles and paradigm of Cloud Computing
- understand the Service Model with reference to Cloud Computing
- appreciate the role of Virtualization Technologies
- gain ability to design and deploy Cloud Infrastructure
- understand cloud security issues and solutions

**Course Content:**

| <b>Section I</b> |   |       |                |
|------------------|---|-------|----------------|
| Module No.       | Content   | Hours | Weightage in % |
| 1.               | <b>Introduction to Cloud Computing</b><br>Overview, Roots of Cloud Computing, Layers and Types of Cloud, Desired Features of a Cloud, Benefits and Disadvantages of Cloud Computing, Cloud Infrastructure Management, Infrastructure as a Service Providers, Platform as a Service Providers, Challenges and Risks  | 05    | 10             |
| 2.               | <b>Cloud Architecture, Services and Applications</b><br>Exploring the Cloud Computing Stack, connecting to the Cloud, Infrastructure as a Service, Platform as a Service, SaaS Vs. PaaS, Using PaaS Application Frameworks, Software as a Service, Cloud Deployment Models, Public vs Private Cloud, Cloud Solutions, Cloud ecosystem, Service management, Identity as a Service, Compliance as a Service | 05    | 10             |
| 3.               | <b>Virtualization, Abstraction and Cloud Platform</b><br>Introduction to Virtualization Technologies, Load Balancing and Virtualization, Understanding Hypervisors, Understanding Machine Imaging, Porting Applications, Virtual Machines Provisioning and Manageability Virtual Machine Migration Services, Virtual Machine Provisioning and Migration in Action, Provisioning in the Cloud Hypervisors  | 07    | 15             |
| 4.               | <b>Cloud Infrastructure and Cloud Resource Management</b>   | 06    | 15             |
|                  |   |       | 94             |

|                   | Architectural Design of Compute and Storage Clouds, Layered Cloud Architecture Development, Design Challenges, Inter Cloud Resource Management, Resource Provisioning and Platform Deployment, Global Exchange of Cloud Resources. Administrating the Clouds, Cloud Management Products, Emerging Cloud Management Standards  |       |                |
|-------------------|---|-------|----------------|
| <b>Section II</b> |   |       |                |
| Module            | Content   | Hours | Weightage in % |
| 5.                | <b>Cloud Security</b><br>Security Overview, Cloud Security Challenges and Risks, Software-as-a- Service Security, Cloud computing security architecture: Architectural Considerations, General Issues Securing the Cloud, Securing Data, Data Security, Application Security, Virtual Machine Security, Identity and Presence, Identity Management and Access Control, Autonomic Security Establishing Trusted Cloud computing, Secure Execution Environments and Communications, , Identity Management and Access control Identity management, Access control, Autonomic Security Storage Area Networks, Disaster Recovery in Clouds | 06    | 15             |
| 6.                | <b>AWS Programming, Management Console and Storage</b><br>Basic Understanding APIs - AWS programming interfaces, Web services, AWS URL naming, Matching interfaces and services, Elastic block store - Simple storage service, Define the AWS Cloud and its value proposition, Identify aspects of AWS Cloud economic, List the different cloud architecture design principles, Security and Compliance, Define the AWS shared responsibility model, Define AWS Cloud security and compliance concepts, Identify AWS access management capabilities, Identify resources for security support  | 09    | 20             |
| 7.                | <b>AWS Technology, Billing and Pricing</b><br>Define methods of deploying and operating in the AWS Cloud, Define the AWS global infrastructure, Identify the core AWS services, identify resources for technology support, Compare and contrast the various pricing models for AWS, Recognize the various account structures in relation to AWS billing and pricing, Identify resources available for billing support   | 07    | 15             |
| <b>TOTAL</b>      |   | 45    | 100            |

**List of Practical:**

| Sr. No. | Name of Practical                    | Hours |
|---------|--------------------------------------|-------|
| 1       | Cloud Concepts Overview              | 02    |
| 2       | Cloud Economics and Billing          | 02    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- understand cryptography theories, algorithms and systems.
- understand the various key distribution and management schemes.
- understand how to deploy hashing techniques to secure data in transits across different networks.

**Course Content:**

| <b>Section - I</b> |   |       |                |
|--------------------|---|-------|----------------|
| Module No.         | Content   | Hours | Weightage in % |
| 1.                 | <b>Introduction</b><br>Symmetric Cipher Model, Confidentiality, Integrity, and Availability, Cryptography and Cryptanalysis, Types of Security, Security Services, Security Attacks and Security Mechanisms   | 04    | 10             |
| 2.                 | <b>Crypto Basics</b><br>Introduction, Substitution and Transposition techniques, Cryptanalysis of a Simple Substitution, Definition of Secure, Double Transposition Cipher  | 06    | 15             |
| 3.                 | <b>Symmetric Key Crypto</b><br>Block Cipher structure, Data Encryption standard (DES) with example, strength of DES, Triple DES, Design principles of block cipher, AES with Structure, its Transformation Functions, Key Expansion, Example and Implementation, Block Cipher Modes | 08    | 15             |
| 4.                 | <b>Public Key Crypto</b><br>Introduction, RSA algorithm with example, Diffie-Hellman algorithm, Man-in-Middle attack, Uses for Public Key Crypto, Public Key Infrastructure   | 05    | 10 98          |

| <b>Section – II</b> |   |              |                       |
|---------------------|---|--------------|-----------------------|
| <b>Module No.</b>   | <b>Content</b>  | <b>Hours</b> | <b>Weightage In %</b> |
| 5.                  | <b>Hash Functions</b><br>Introduction, Cryptographic Hash Function, The Birthday Problem, A Birthday Attack, Non-Cryptographic Hashes, Uses for Hash Functions                              | 03           | 10                    |
| 6.                  | <b>Message Authentication Codes</b><br>Requirements of MAC and security, MACs based on Hash Functions, Macs based on Block Ciphers  | 05           | 12                    |
| 7.                  | <b>Simple Authentication Protocols</b><br>Introduction, Authentication Using Symmetric Keys, Authentication Using Public Keys, Session Keys, Perfect Forward Secrecy, Mutual Authentication | 07           | 14                    |
| 8.                  | <b>Real-World Security Protocols</b><br>Introduction, SSH, SSL and the Man-in-the-Middle, SSL Connections, Digital Signature, Symmetric Key, Public Key Encryption                          | 04           | 08                    |
| 9.                  | <b>Advanced Topics</b> – Intruders, Virus, Trojans, Malware, Ransomware, Requirements of Security in Various area of Computer Science   | 03           | 06                    |
| <b>TOTAL</b>        |   | 45           | 100                   |

**List of Practical:**

| <b>Sr. No</b> | <b>Name of Practical</b>  | <b>Hours</b> |
|---------------|---|--------------|
| 1.            | Implement the Caesar Cipher technique.                            | 2            |
| 2.            | Implement Monoalphabetic Cipher techniques.                       | 2            |
| 3.            | Implement Rail Fence techniques.                                  | 2            |
| 4.            | Implement Columnar Transposition techniques.                      | 2            |
| 5.            | Perform frequency analysis to break a Simple Substitution Cipher. | 2            |
| 6.            | Simulate the Diffie-Hellman Key Exchange process.                 | 4            |
| 7.            | Write a program to implement DES Cipher                           | 4            |
| 8.            | Write a program to implement AES Cipher                           | 4            |
| 9.            | Write a program to implement RSA Cryptosystem                     | 4            |
| 10.           | Demonstration of Wireshark for Packet Capturing                   | 4            |
| <b>TOTAL</b>  |   | 30           |

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of practical which will be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal viva consists of 10 marks.
- Practical performance/quiz/drawing/test consists of 15 marks during End Semester Exam.
- Viva/ Oral performance consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SEIT3230 | INFORMATION SECURITY   |
|----------|--|
| CO 1     | Identify information security goals, classical encryption techniques and acquire fundamental knowledge on the concepts of symmetric cipher models.   |
| CO 2     | Understand, compare and apply different encryption and decryption techniques to solve problems related to confidentiality and authentication.        |
| CO 3     | Apply the knowledge of cryptographic techniques and different digital signature algorithms to achieve authentication and create secure applications. |
| CO 4     | Apply the knowledge of cryptographic utilities and authentication mechanisms to design secure applications.  |

**Objective(s) of the Course:**

To help learners to

- Develop Interactive web applications with both front-end and back-end technologies.
- Understanding of various aspects of web technologies with various data operation with MongoDB.

**Course Content:**

| <b>Section I</b> |   |       |                |
|------------------|---|-------|----------------|
| Module No.       | Content   | Hours | Weightage in % |
| 1.               | <b>Introduction and Web Design</b><br>Introduction to Internet, WWW and Web 2.0, Web protocols and Web servers, Web Design Principles and Web site structure  | 04    | 10             |
| 2.               | <b>HTML5</b><br>Introduction to HTML, Browsers and HTML, Editor's Offline and Online, Tags, Attribute and Elements Doctype Element, Comments, Headings, Paragraphs and Formatting Text, Lists and Links, Images and Tables.   | 05    | 15             |
| 3.               | <b>CSS3</b><br>Introduction CSS, Applying CSS to HTML, Selectors, Properties and Values, CSS Colors and Backgrounds, CSS Box Model, CSS Margins, Padding, and Borders, CSS Text and Font Properties, CSS General Topics   | 06    | 10             |
| 4.               | <b>JavaScript and jquery</b><br>Introduction to JavaScript, Applying JavaScript (internal and external), Understanding JS Syntax, Introduction to Document and Window Object, Variables and Operators, Data Types and Num Type Conversion, Math and String Manipulation, Objects and Arrays, Date and Time, Conditional Statements, Switch Case, Looping in JS, Functions, JavaScript Objects, JavaScript Forms, JavaScript HTML DOM, JavaScript BOM, JavaScript Type Conversion, JavaScript RegExp, JavaScript Errors, JavaScript Debugging, JavaScript Hoisting, JavaScript Strict Mod, Basics of | 08    | 15             |
|                  |   |       | 102            |

|                   | jQuery, jQuery syntaxes, jQuery selectors, events, effects, Access/Manipulate web browser elements using jQuery, jQuery HTML, jQuery Traversing, jQuery AJAX & Misc.   |       |                |
|-------------------|--|-------|----------------|
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |
| 5.                | <b>Bootstrap</b><br>Introduction to Bootstrap, Bootstrap Basics, Bootstrap Grids, Bootstrap Themes, Bootstrap CSS, Bootstrap JS  | 04    | 05             |
| 6.                | <b>Frontend with ReactJS</b><br>Introduction, Templating using JSX, Components, State and Props, Lifecycle of Components, Rendering List and Portals, Error Handling, Routers, Redux and Redux Saga, Immutable.js, Service Side Rendering, Unit Testing, Webpack | 07    | 20             |
| 7.                | <b>Backend with NodeJS</b><br>Introduction to Node.js, Node Package Manager, REPL Terminal, Node.js Webserver – Server and Clients, Creating a simple server, Rendering HTML, Rendering JSON Data, Routing   | 06    | 15             |
| 8.                | <b>MongoDB</b><br>SQL and NoSql Concepts, Create and Manage MongoDB, Migration of Data into MongoDB, MongoDB with PHP, MongoDB with NodeJS, Services Offered by MongoDB  | 05    | 10             |
| <b>TOTAL</b>      |  | 45    | 100            |

**List of Practical:**

| Sr. No.      | Name of Practical   | Hours |
|--------------|---|-------|
| 1.           | Design Wireframes for your project based on Web Design Principles.  | 02    |
| 2.           | Formatting web pages with CSS (Inline CSS, Document level CSS and External CSS).  | 04    |
| 3.           | Browser interaction and form validations (Web browser environments, forms and validations, image sliders) [Image slider plugins of jQuery, Client-side validation of Registration & Login | 04    |
| 4.           | Design web application using Bootstrap principles.  | 04    |
| 5.           | Make interactive web pages with reactJS concepts.   | 04    |
| 6.           | Design web application with back end of NodeJS.   | 04    |
| 7.           | Implement basic data operations in web application with MongoDB.  | 04    |
| 8.           | Develop Complete Web application as a mini project.   | 04    |
| <b>TOTAL</b> |   | 30    |

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted out of 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of practical, which should be evaluated out of 10 marks per each practical and average of the same will be converted to 10 marks.
- Internal viva consists of 10 marks.
- Mini Project Contains of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva/Oral performance consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SEIT3241 | FULL STACK DEVELOPMENT  |
|----------|---|
| CO1      | Understand and compare the fundamentals of Web hosting and domain name services.  |
| CO2      | Understand various non-browser specific web design principles.  |
| CO3      | Understand the need and be able to develop HTML/XHTML and CSS pages with valid structure as well as content.                |
| CO4      | Understand and be able to develop JavaScript/jQuery code to access the DOM structure of web document and object properties. |
| CO5      | Develop dynamic web pages with usage of server-side scripting NodeJS and MongoDB.   |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- understand the current trend or technology.
- aware of future technologies.
- try to learn new technologies and apply them as much as possible.

**Outline of the Project-I**

| S. No. | Task                                 | Weightage in % |
|--------|--------------------------------------|----------------|
| 1.     | Group Formation                      | -              |
| 2.     | Title Approval and Mentor Allocation | -              |
| 3.     | First Progress Report                | 5              |
| 4.     | First Review                         | 10             |
| 5.     | Second Progress Report               | 5              |
| 6.     | Third Progress Report                | 5              |
| 7.     | Second Review                        | 10             |
| 8.     | Fourth Progress Report               | 5              |
| 9.     | Fifth Progress report                | 10             |
| 10.    | Final Report Evaluation              | 25             |
| 11.    | Final Presentation                   | 25             |
|        | <b>TOTAL</b>                         | <b>100</b>     |

**Detailed Guideline(s):**

| Sr. No. | Content  | Weightage in % |
|---------|--|----------------|
| 1.      | <b>Group Formation:</b><br>Group formation requires a minimum of one member and allows for a maximum of three members per group.   | -              |
| 2.      | <b>Title Approval and Mentor Allocation:</b><br>In the initial week of the semester, students are tasked with submitting a preliminary review of their project with a suitable title. This submission includes a comprehensive synopsis and outline, accompanied by a discussion on the anticipated project outcomes. This | -<br>106       |

|    |  |    |
|----|--|----|
|    | early review acts as the foundation for the project, laying the groundwork and establishing the direction for subsequent work. Additionally, during this stage, mentors are allocated to provide guidance and support throughout the project development process.  |    |
| 3. | <b>First Progress Report:</b><br>Within the initial weeks of commencing the project, students are required to submit a detailed report outlining their progress, achievements, and any challenges encountered.   | 5  |
| 4. | <b>First Review:</b><br>This report serves as an early checkpoint, allowing for an assessment of whether the project is on track with the proposed timeline and objectives. Students should highlight key accomplishments, provide insights into the methodologies employed, and address any deviations from the initial plan.   | 10 |
| 5. | <b>Second Progress Report:</b><br>This report explores into the details of the progress made since the First Progress Report and First Review, offering a comprehensive overview of achievements, setbacks, and adaptations to the project plan. Students should reflect on the effectiveness of their methodologies, address any unforeseen obstacles, and demonstrate a proactive approach to overcoming challenges.   | 5  |
| 6. | <b>Third Progress Report:</b><br>At this stage, students provide a comprehensive update on the continuous evolution of their projects, demonstrating the resilience and adaptability required for successful project development. In the Third Progress Report, students delve into the nuances of their progress since the Second Progress Report, showcasing not only achievements but also a reflective analysis of the journey thus far.                         | 5  |
| 7. | <b>Second Review:</b><br>During this stage, internal evaluators and expert panels engage in a comprehensive assessment of the project's overall development and achievements. The Second Review provides students with an opportunity to present their progress, methodologies, and outcomes to a panel of experts.  | 10 |
| 8. | <b>Fourth Progress Report:</b><br>In this report, students provide an updated justification of their progress, building on the insights gained from the Second Review. The Fourth Progress Report encapsulates the continuous refinement and optimization of project strategies. Students delve into the accomplishments achieved post-Second Review, addressing any recommendations made by external evaluators.  | 5  |
| 9. | <b>Fifth Progress report:</b><br>At this stage, students present a comprehensive overview of the project's evolution, encapsulating the lessons learned, achievements attained, and challenges overcome. The Fifth Progress Report serves as a reflection on the entire project lifecycle, providing insights into the iterative process of development. <b>The students should submit the final report to the mentor which will be further sent for evaluation.</b> | 10 |

|              |  |            |
|--------------|--|------------|
| 10.          | <p><b>Final Report Evaluation &amp; Final Presentation:</b><br/>During this phase, students present their comprehensive Final Report, encapsulating the entire project lifecycle, methodologies employed, outcomes achieved, and lessons learned.</p> <p><b>Final Report Evaluation:</b><br/>The Final Report undergoes a thorough evaluation by faculty members and external experts. This evaluation scrutinizes the depth of content, adherence to project objectives, and the overall quality of documentation.</p> <p><b>Final Presentation:</b><br/>Students present their projects to a panel of faculty members, peers, and potentially external stakeholders. This presentation offers an opportunity to showcase the project's significance, innovation, and impact.</p> | 50         |
| <b>TOTAL</b> |  | <b>100</b> |

### Course Evaluation:

| S. No. | Evaluation criteria     | Marks       |
|--------|-------------------------|-------------|
| 1.     | First Progress Report   | 50          |
| 2.     | First Review            | 100         |
| 3.     | Second Progress Report  | 50          |
| 4.     | Third Progress Report   | 50          |
| 5.     | Second Review           | 100         |
| 6.     | Fourth Progress Report  | 50          |
| 7.     | Fifth Progress report   | 100         |
| 8.     | Final Report Evaluation | 250         |
| 9.     | Final Presentation      | 250         |
|        | <b>TOTAL</b>            | <b>1000</b> |

**The entire evaluation will be converted equivalent to 100 Marks.**

### Course Outcome(s):

After completion of the course, the students will be able to

| SEIT3560 | PROJECT-I   |
|----------|---|
| CO 1     | Analyze user requirements and implement innovative ideas for social and environmental benefits.   |
| CO 2     | Apply new technologies and design techniques concerned for devising a solution for a problem statement.   |
| CO 3     | Apply project management skills like task scheduling, teamwork, working in confine deadlines etc., for successfully development of the project. |
| CO 4     | Prepare reports and presentations to communicate technical information.   |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understanding .NET Framework and Programming Concepts
- Develop Object-Oriented and Event-Driven Applications
- Implement Database Connectivity and State Management

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | <b>Introduction To .Net Technology:</b><br>Introduction to .NET Framework Architecture, Program Execution in .NET, CLR structure, CTS, CLS, CLR, Cross language Integration, Garbage Collection, DLL Hell, Assemblies, Name spaces, Versioning and deployment, Side by Side Execution, Debugging                                   | 05    | 20             |
| 2.                | <b>Basics of C# language using Console Application:</b><br>Namespace, Variables, Data Types, Operators, Type Conversion, Decision making statements, Conditional Loops, Arrays, String Builder   | 03    | 08             |
| 3.                | <b>Object Oriented Programming in C#.NET:</b><br>Language Features and Creating .NET Projects, Creating Class, declaring variables and methods, Access Modifiers, Constructors, Access Modifier, Inheritance, Interface, method overloading, method overriding, Anonymous method, Debugging and Error Handling, Exception Handling | 07    | 22             |
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |
| 4.                | <b>Windows Forms and Controls:</b><br>Basics of Windows Forms, Properties and Events of Windows Forms, Properties and Events of Controls, Button, Label, TextBox, NumericUpDown, Checkbox, Radio Button,   | 06    | 22<br>110      |

|              |   |    |     |
|--------------|---|----|-----|
|              | DateTimePicker, Group Box, ListBox, ListView, ComboBox, TabControl, PictureBox, ProgressBar, ToolTips, RichTextbox, Timer, DatagridView, etc., Execution flow, Event Driven programming   |    |     |
| 5.           | <b>Web Application using ASP .NET &amp; ADO.NET:</b><br>Introduction to ASP.NET, Working with Web and HTML Controls, Using Rich Server Controls, Login controls, Overview of ASP.NET Validation Controls, Using the Simple Validations, Overview of ADO.Net framework, working with SQL server database, Managed Provider, Dataset, working with data source, Connected and disconnected architecture, Binding data with DataGrid | 06 | 20  |
| 6.           | <b>Routing &amp; State Management:</b><br>Preserving State in Web Applications and Page-Level State, Using Cookies to Preserve State, ASP.NET Session State, Storing Objects in Session State, Configuring Session State, Setting Up an Out-of-Process State Server, Storing Session State in SQL Server.   | 03 | 08  |
| <b>TOTAL</b> |   | 30 | 100 |

#### List of Practical:

| Sr. No.      | Name of Practical  | Hours |
|--------------|--|-------|
| 1.           | Create a console application to demonstrate the use of CLR and CTS.                            | 02    |
| 2.           | Write a console application to demonstrate data types, variables, and operators.               | 02    |
| 3.           | Create a program to sort an array of integers and find the largest/smallest element.           | 02    |
| 4.           | Demonstrate inheritance, interface implementation, and method overloading/overriding using C#. | 02    |
| 5.           | Create a C# program that implements try-catch-finally blocks for exception handling.           | 02    |
| 6.           | Create a Windows Forms application with controls like TextBox, Button, and Label.              | 02    |
| 7.           | Build a form with controls like ListBox, ComboBox, and DateTimePicker.                         | 02    |
| 8.           | Create a form to display data using a DataGridView control.                                    | 04    |
| 9.           | Design a web page with HTML and ASP.NET server controls with validation.                       | 04    |
| 10.          | Create a database in SQL Server and perform CRUD operations using ADO.NET.                     | 04    |
| 11.          | Bind data to a DataGrid in an ASP.NET application.   | 02    |
| 12.          | Configure session state using SQL Server and demonstrate its usage in an ASP.NET application.  | 02    |
| <b>TOTAL</b> |  | 30    |

#### Text Book(s):

### Course Evaluation:

#### Theory:

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

#### Practical:

- Continuous Evaluation consists of practical performance which should be evaluated out of 10 for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva-voce consists of 30 marks during End Semester Exam.

### Course Outcome(s):

After completion of the course, the students will be able to

| SECE3610 | Programming with .NET   |
|----------|---|
| CO 1     | Understand the .NET Framework Architecture and Key Components                 |
| CO 2     | Develop Console Applications Using C# Programming Language                    |
| CO 3     | Apply Object-Oriented Programming Concepts in C# to Build Robust Applications |
| CO 4     | Design and Develop Windows and Web Applications Using .NET Technologies       |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- familiarize with the stages of the SDLC and its importance in system development.
- develop analytical thinking for identifying system requirements and proposing effective solutions.
- provide the ability to design logical and physical systems, focusing on usability, efficiency, and scalability.
- improve interpersonal and communication skills required for effective collaboration with stakeholders.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | Introduction to Information System: What is System? Types of System, Types of information – operational, tactical, strategic, and statutory; why do we need information systems? System that solves business problems, Management structure; Requirements of information at different levels of management.        | 05    | 16             |
| 2.                | System Analyst & SDLC: Activities of Each SDLC Phase, system evaluation, system modification. Define System Analyst, Role of systems analyst, attributes of a systems analyst, tools used in system analysis.  | 05    | 16             |
| 3.                | Investigating System Requirements: Strategies, methods, case study, documenting study, system requirements specification – from narratives of requirements to classification of requirements as strategic, tactical, operational, and statutory, Requirements Elicitation Techniques, Validating the requirements. | 05    | 18             |
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |

|              |   |    |     |
|--------------|---|----|-----|
| 4.           | Feasibility Analysis: Deciding project goals, examining alternative solutions, cost-benefit analysis, quantification of costs and benefits, payback period, system proposal preparation for managements, parts and documentation of a proposal, tools for prototype creation. | 04 | 14  |
| 5.           | Processes with Use Case & Process Models: What is Use Case? Use case Elements, Creating Use Cases, Data flow diagrams, Elements of DFD, case study for use of DFD, good conventions, leveling of DFDs, leveling rules, logical and physical DFDs.                             | 04 | 12  |
| 6.           | Data-Oriented Systems Design: Entity relationship model, E-R diagrams, relationships, cardinality and participation, normalizing relations, various normal forms and their need, examples of relational database design.  | 04 | 14  |
| 7.           | Structured Systems Analysis and Design: Procedure specifications in structured English, examples and cases, decision tables for complex logical specifications, specification-oriented design vs procedure-oriented design, Transition to the new system.                     | 03 | 10  |
| <b>TOTAL</b> |   | 30 | 100 |

**List of Practical:**

| Sr. No.      | Name of Practical   | Hours |
|--------------|---|-------|
| 1.           | To conduct interviews, surveys with stakeholders (such as doctors, nurses, hospital administrators, and patients) to gather system requirements for a Hospital Management System (HMS), ensuring the identification of key user needs and functional specifications. [Comparative Study can also be accomplished] | 03    |
| 2.           | Prepare a Data Flow Diagram that is drawn for a Food Ordering System. It should contain a process that represents the system. It should also show the participants who will interact with the system  | 06    |
| 3.           | Prepare an E-R Diagram for Library Management System showing the relationships one-to-one, one-to-many and many-to-many listing assumptions to justify your answer.   | 03    |
| 4.           | To design and develop a Restaurant Management System (RMS) by utilizing UML (Unified Modeling Language) diagrams to represent the various components and their interactions within the system.  | 06    |
| 5.           | Prepare a questionnaire of your own choice i.e. open, closed, bipolar, etc. to gather feedback from customers. [Real-Time Order Tracking Feature, Real-Time Fitness Tracking App, Real-Time Inventory Management System for Retail Stores , Real-Time Public Transportation Tracking System etc..]                | 03    |
| 6.           | Create a Decision Table for a Restaurant Management System that handles order approval based on certain conditions like payment status, availability of items, and customer membership status.  | 03    |
| 7.           | Case Study on feasibility analysis.   | 06    |
| <b>TOTAL</b> |   | 30    |

#### **Course Evaluation:**

##### **Theory:**

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

##### **Practical:**

- Continuous Evaluation consists of practical performance which should be evaluated out of 10 for each practical and average of the same will be converted to 30 marks.
- Internal submission consists of viva and presentation of the case study document/report prepared as per guidelines of the course coordinator to be evaluated out of 20 marks

#### **Course Outcome(s):**

After completion of the course, the students will be able to

| <b>SEIT3610</b> | <b>System Analysis and Design</b>  |
|-----------------|--|
| CO 1            | Understand the different types of information at various levels of Organization.                           |
| CO 2            | Understand the role of a systems analyst, and apply the SDLC to develop an efficient and effective system. |
| CO 3            | Apply modern tools and methodologies such as UML to create dynamic and scalable system solutions.          |
| CO 4            | Utilize appropriate methodologies & tools to implement, and modify systems effectively.                    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand Core Concepts – Learn the fundamentals of data visualization and its importance in data analysis and decision-making.
- Develop Technical Skills – Gain hands-on experience with tools and libraries for creating effective visualizations.
- Prepare and Transform Data – Learn techniques for cleaning, processing, and integrating data for visualization purposes.
- Explore Advanced Visualization Techniques – Create interactive, geospatial, and high-dimensional visualizations
- Enhance Storytelling and Presentation – Build data-driven narratives and dashboards to communicate insights effectively.

**Course Content:**

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of the performance of practical which will be evaluated out of 10 marks for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva/oral performance consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, the following course outcomes will be able to:

| SEIT3620 | DATA VISUALIZATION  |
|----------|---|
| CO 1     | Demonstrate an understanding of fundamental concepts, principles, and importance of data visualization in data analysis and decision-making.                          |
| CO 2     | Develop proficiency in using modern visualization tools and programming libraries like Tableau, Power BI, Matplotlib, and Seaborn to create effective visualizations. |
| CO 3     | Apply data preprocessing techniques, including cleaning, transformation, and handling different data formats, to prepare datasets for visualization.                  |
| CO 4     | Design and implement advanced visualizations such as interactive dashboards, geospatial maps, and time-series analyses to gain insights from complex datasets.        |

|      |  |
|------|--|
| CO 5 | Create compelling data stories and dashboards to effectively communicate insights and support data-driven decision-making. |
|------|--|

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to,

- understand the fundamentals of image processing.
- Apply various processes on the image for image understanding.
- Design and implement algorithms that perform basic image processing

**Course Content:**

| <b>Section I</b>  |   |       |                |
|-------------------|---|-------|----------------|
| Module No.        | Content   | Hours | Weightage in % |
| 1.                | <b>Introduction to Digital Image Fundamentals</b><br>Fundamentals steps in digital Image Fundamentals, Human visual system, Image as a 2D data, Image representation – Grayscale and Color images, image sampling and quantization, Some basic relationships between pixels.  | 04    | 10             |
| 2.                | <b>Image Enhancements</b><br>In spatial domain: Basic gray level transformations, Histogram processing, Using arithmetic/Logic operations, smoothing spatial filters, Sharpening spatial filters.<br>In Frequency domain: Introduction to the Fourier transform and frequency domain concepts, smoothing frequency-domain filters, Sharpening frequency domain filters. | 07    | 15             |
| 3.                | <b>Image Restoration and Reconstruction</b><br>Image Degradation Models: Noise and Blur.<br>Noise Removal Techniques: Mean, Median, and Adaptive Filters.<br>Inverse Filtering and Wiener Filtering.  | 04    | 10             |
| <b>Section II</b> |   |       |                |
| Module No.        | Content   | Hours | Weightage in % |
| 4.                | <b>Color Image Processing</b><br>Basics of color Models (RGB, CMY, HIS), Pseudocolor image processing.  | 02    | 12             |
| 5.                | <b>Image Compression</b>  | 03    | 10             |
|                   |   |       | 122            |

|              |   |    |     |
|--------------|---|----|-----|
|              | Introduction, coding Redundancy, Inter-pixel redundancy, image compression methods, Lossy and Lossless compression, Huffman coding, Arithmetic coding, LZW coding, IPEG compression standard. |    |     |
| 6.           | <b>Image Segmentation</b><br>point, line and edge detection, Thresholding, Regions Based segmentation, Edge linking and boundary detection, Hough transform.                                  | 03 | 10  |
| 7.           | <b>Morphological Image Processing</b><br>Erosion, dilation, opening, closing, Basic Morphological Algorithms: hole filling, connected components, thinning, skeleton.                         | 03 | 08  |
| 8.           | <b>Case Studies</b><br>Object representation, description, and recognition, Application of Image processing in various field.   | 04 | 10  |
| <b>TOTAL</b> |   | 30 | 100 |

**List of Practical:**

| Sr. No. | Name of Practical  | Hours            |
|---------|--|------------------|
| 1.      | Introduction to Image Processing Toolbox.  | 04               |
| 2.      | Read the image and perform<br>1. RGB to Gray image<br>2. RGB to Indexed image and<br>3. Gray to Indexed image  | 04               |
| 3.      | Read an 8bit image and then apply different image enhancement techniques:<br>(a) Brightness improvement<br>(b) Brightness reduction<br>(c) Thresholding<br>(d) Negative of an image<br>(e) Log transformation<br>(f) Power Law transformation. | 04               |
| 4.      | Implement different interpolation techniques using MATLAB.   | 04               |
| 5.      | Read an image, plot its histogram then do histogram equalization and comment about the result.   | 04               |
| 6.      | (a) Implement Gray level slicing (intensity level slicing) in to read cameraman image. (b) Read an 8bit image and to see the effect of each bit on the image. (c) Read an image and to extract 8 different planes i.e. 'bit plane slicing.'    | 06               |
| 7.      | Implement various Smoothing spatial filter   | 04               |
| 8.      | Read an image and apply (1) Gaussian 3x3 mask for burring (2) High pass filter mask with different masks (3) Laplacian operator with center value positive and negative (4) High boost filtering.  | 06               |
| 9.      | Write a program to implement various low and high pass filters in the frequency domain.  | 04               |
| 10.     | Write a program for erosion and dilation, opening & closing using inbuilt and without inbuilt functions.   | 04 <sub>23</sub> |

|              |  |           |
|--------------|--|-----------|
| 11.          | Implement and study the effect of Different Mask (Sobel, Prewitt, and Roberts) | 04        |
| 12.          | Implement various noise models and their Histogram                             | 04        |
| 13.          | Implement inverse filter and Wiener filter over image and comment on them      | 04        |
| 14.          | Implement Image compression using DCT Transform                                | 04        |
| <b>TOTAL</b> |  | <b>60</b> |

**Web Material Link(s):**

- <https://nptel.ac.in/courses/106105032/>

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of practical performance which should be evaluated out of 10 for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva-voce consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SEIT3630 | IMAGE PROCESSING   |
|----------|--|
| CO 1     | Immediate understanding of the concept of digital image.                           |
| CO 2     | Understand the basic image enhancement techniques in spatial & frequency domains   |
| CO 3     | Apply image filtering to solve image restoration, reconstruction, and compression. |

|      |  |
|------|--|
| CO 4 | Create image segmentation and devise object recognition with the help of different case studies. |
|------|--|

#### Mapping of CO with PO

**Objective(s) of the Course:**

To help learners to

- explain the underlying principles of Service Oriented Architecture.
- describe and understand different terminologies used in Service Oriented Architecture.
- apply the different concepts of SOA to build different applications.

**Course Content:**

| <b>Section I</b>  |   |       |                |
|-------------------|---|-------|----------------|
| Module No.        | Content   | Hours | Weightage in % |
| 1.                | <b>Introduction</b><br>Introduction to distributed Computing and Web services architectures and standards, Fundamental SOA, Key Principles of SOA. Monolithic vs SOA vs Microservices   | 04    | 15             |
| 2.                | <b>Enterprise architectures</b><br>Integration versus interoperation, J2EE, .NET, Model Driven Architecture, Concepts of Distributed Computing, XML.  | 04    | 15             |
| 3.                | <b>Basic Concepts</b><br>Web services framework, Services (Web services: Definition, Architecture, and standards), Service descriptions with WSDL, Messaging with SOAP, UDDI.   | 07    | 20             |
| <b>Section II</b> |   |       |                |
| Module No.        | Content   | Hours | Weightage in % |
| 4.                | <b>Principles of Service-Oriented Architecture</b><br>Message Exchange Pattern, Coordination, Atomic Transactions, Business Activities, Orchestration, Choreography, WS-Addressing, WS-Reliable Messaging, WS-Policy (including WS-Policy Attachments and WS-Policy Assertions), WS-Metadata Exchange, WS-Security (including XML-Encryption, XML-Signature, and SAML). | 07    | 20             |
| 5.                | <b>Principles of Service-Oriented Computing</b>   | 08    | 30             |

|  |   |    |     |
|--|---|----|-----|
|  | RPC versus Document Orientation, Service Life Cycle, Service Creation, Service Design and Build, Service Deployment, Publish Web service using UDDI, Service Discovery, Service Selection, Service Composition, Service Execution, and Monitoring, Service Termination. |    |     |
|  | <b>TOTAL</b>  | 30 | 100 |

#### List of Practical:

| Sr. No. | Name of Practical  | Hours |
|---------|--|-------|
| 1.      | Develop DTD and XSD for University Information System having Exam Enrolment from the beginning of Semester, along with Exam Registration and Marks submission by Teachers to University from Various Colleges and Results in Sheets Generation by University on Online Report. | 02    |
| 2.      | Develop Mark sheet XML Document and display Mark sheet based on CSS and XSL presentation Format.   | 04    |
| 3.      | Develop Java Based Program using JAXP or XML API in reading XML file for Students Information and Display HTML Table.  | 02    |
| 4.      | Develop Java Based Web Service using REST and SOAP-Based web service in NetBeans for University Course List and Search Course based Course Title and Course ID.  | 04    |
| 5.      | Create DTD file for student information and create a valid well-formed XML document to store student information against this DTD file.  | 02    |
| 6.      | Create XMS schema file for student information and create a valid well-formed XML document to store student information against this DTD file.   | 04    |
| 7.      | Create web calculator service in .NET Beans and create Java client to consume this web service.  | 02    |
| 8.      | Develop same web service using JX-WS.  | 04    |
| 9.      | Create web calculator service in .NET and Create java client to consume web service developed using Apache AXIS.   | 02    |
| 10.     | Using WS –GEN and WS-Import develop the java web service & call it by Java Client.   | 04    |
|         | <b>TOTAL</b>   | 30    |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of the performance of practical which will be evaluated out of 10 marks for each practical and average of the same will be converted to 20 marks.
- Internal Viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva/oral performance consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SECE3620 | SERVICE ORIENTED COMPUTING  |
|----------|---|
| CO 1     | Explain the difference between monolithic architecture versus service-oriented architecture (soa).                |
| CO 2     | Practice real life examples and identify the underlying principles of soa.  |
| CO 3     | Implement and integrate service-oriented architecture in the development cycle of web service-based applications. |
| CO 4     | Understand advanced concepts such as service composition, orchestration and choreography.                         |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Explain the terminology, principles, architectures, protocols, and methodologies used in Wireless Communication and Mobile Computing Networks.
- Understand the basics of wireless communication technologies, including 3G, 4G, 5G, IoT, and WiMAX.
- Build knowledge of Mobile Computing Algorithms, network layers, and transport protocols for wireless communication.
- Develop skills in designing and implementing wireless applications using modern tools, mobile OS, and Wireless Application Protocols.

**Course Content:**

| <b>Section I</b> |  |       |                |
|------------------|--|-------|----------------|
| Module No.       | Content  | Hours | Weightage in % |
| 1.               | <b>Mobile Computing Architecture</b><br>Types of Networks, <b>Architecture for Mobile Computing:</b> 3-tier Architecture and Design Considerations, Applications. <b>Wireless Transmission:</b> Signals, Antennas, Signal propagation, Multiplexing, Modulation, Cellular Systems. <b>Medium Access Control:</b> Motivation for a specialized MAC, SDMA, FDMA, TDMA, CDMA. | 04    | 05             |
| 2.               | <b>Wireless Networks – 1</b><br><b>GSM and SMS:</b> Global Systems for Mobile Communication (GSM and Short Service Messages SMS), GSM Architecture, Protocols, Call routing in GSM, Handover, Security. Introduction to SMS, SMS Architecture, SM MT, SM MO, SMS as Information bearer, applications.  | 04    | 15             |
| 3.               | <b>Wireless Networks – 2</b><br><b>Advanced Data Network Technologies</b>  | 04    | 15             |

|                   | <b>GPRS:</b> GPRS and Packet Data Network, GPRS Network Architecture, GPRS Network Operations, Data Services in GPRS, Applications for GPRS, Introduction to WiMAX.   |       |                |
|-------------------|---|-------|----------------|
| 4.                | <b>Wireless Networks –3</b><br>3G,4G, and 5G Networks: Third Generation Networks, Fourth Generation Networks, Vision of 5G. 3G vs. 4G vs. 5G: Features and Challenges and Applications. Introduction to Emerging Wireless Technologies: Wi-Fi 6, Li-Fi, NB-IoT.   | 04    | 15             |
| <b>Section II</b> |   |       |                |
| Module No.        | Content   | Hours | Weightage in % |
| 5.                | <b>Mobile network layer</b><br>Mobile IP, Dynamic Host Configuration protocol, Mobile ad-hoc networks (MANETs). <b>Mobile Transport layer:</b> Traditional TCP, classical TCP improvements, TCP over 3G/4G wireless networks  | 04    | 10             |
| 6.                | <b>Mobile OS and Computing Environment</b><br><b>Smart Client Architecture:</b><br><b>The Client:</b> User Interface, Data Storage, Performance, Data Synchronization, Messaging. <b>The Server:</b> Data Synchronization, Enterprise Data Source, Messaging. <b>Mobile Operating Systems:</b> Android, iOS, Introduction to Wearable Device OS. Development Process: Key Considerations for Mobile Applications. | 03    | 15             |
| 7.                | <b>Building Mobile Internet Applications</b><br>Thin client Architecture: the client, Middleware, Messaging Servers, Processing a Wireless request. Wireless Applications Protocol (WAP) Overview. Wireless Languages: Markup Languages (HDML, WML, HTML, cHTML, XHTML, VoiceXML).  | 04    | 15             |
| 8.                | <b>Emerging and Future Technologies:</b> The architecture of future Networks, Wireless Sensor Network (WSN), IoT, <b>Edge Computing, Fog Computing,</b> and their role in mobile networks.  | 03    | 10             |
| <b>TOTAL</b>      |   | 30    | 100            |

#### List of Practical:

| Sr. No.      | Name of Practical   | Hours |
|--------------|---|-------|
| 1.           | Setup & Configuration of Wireless Access Point (AP)   | 04    |
| 2.           | Implementation of Wireless Network with a number of nodes and different parameters using Simulator.   | 04    |
| 3.           | Study of WLAN: Ad Hoc & Infrastructure Mode   | 04    |
| 4.           | GSM modem study and <b>Modern Messaging Systems:</b> Implement a basic client-server messaging application using <b>MQTT</b> or push notifications. | 04    |
| 5.           | <b>Development of a Progressive Web App (PWA):</b> Build a simple PWA to demonstrate mobile-friendly design and offline capabilities.               | 04    |
| 6.           | Design and Program Income Tax and Loan EMI Calculator for Mobile Phones   | 04    |
| 7.           | Implementation of Mobile Network using Network Simulator (NS3/GNS3)   | 06    |
| <b>TOTAL</b> |   | 3031  |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of the performance of practical which will be evaluated out of 10 marks for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva/oral performance consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SECE3630 | WIRELESS NETWORK & MOBILE COMPUTING   |
|----------|---|
| CO 1     | Understand and relate the fundamentals of wireless communication and mobile computing architectures to real-world applications, including cellular and IoT systems.                               |
| CO 2     | Analyze the unique characteristics of wireless networks, including security, mobility, energy efficiency, and scalability, with practical insights into current technologies like 3G, 4G, and 5G. |
| CO 3     | Design and evaluate wireless network protocols, including MAC, TCP/IP extensions, and mobile communication systems, using simulation tools  |
| CO 4     | Develop the knowledge of TCP/IP extensions for mobile and wireless networking.  |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- identify correctness, completeness and quality of developed Software.
- identify the importance of software testing in Software Development Life-Cycle.
- gain knowledge about various types of software testing.
- train students to create good test cases and improve the quality of software.
- study software testing process and various automated software testing tools.
- develop an application and test it using any automated testing tool.

**Course Content:**

| <b>Section I</b> |   |       |                |
|------------------|---|-------|----------------|
| Moule No.        | Content   | Hours | Weightage in % |
| 1.               | <b>Introduction to Basic of software testing &amp; Terminology</b><br>Software Development & Software Testing Life Cycle- role and activities, Necessity and Objectives of testing, Quality Concepts, Quality Control, McCall's factor model, Different Software Development Model, Object- oriented testing, Web testing, Elements of Software quality assurance.  | 5     | 10             |
| 2.               | <b>Levels of Testing</b><br>Verification and Validation Model, Techniques of Verification:- Peer Review, Walkthrough, Inspection, FTR, Unit testing, Integration testing, Function Testing, System testing, Installation Testing, Usability Testing, Regression testing, Performance testing:-Load Testing, Stress Testing, Security testing, Volume testing, Acceptance testing:-Alpha testing, Beta testing, Gamma Testing. | 6     | 20             |

| 3.                | <b>Testing Methods</b><br>Black Box methods: -Equivalence partitioning, Boundary-value analysis, Error guessing, graph-based testing methods, Decision Table Testing. CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Write backend code in Python/Java, PHP languages and writing optimized front end code HTML and JavaScript.
- Understanding MVC architecture in Web based applications, with Advanced PHP concepts and Laravel Framework along with Node.js and Angular.js.
- Give basic understanding of URL methods, MVC Framework, Unit Testing, Web Services, API Node Servers, and routing.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | <b>PHP</b><br>Introduction to PHP and its syntax, combining PHP and HTML, understanding PHP code blocks like Arrays, Strings, Functions, looping and branching, file handling, processing forms on the server side, cookies, and sessions.   | 08    | 10             |
| 2.                | <b>Object-Oriented PHP</b><br>Object-Oriented Programming with PHP - Classes, Properties, Methods, Constructor, Destructor, Getters and Setters, Encapsulation, Inheritance, Data Abstraction, Polymorphism.   | 08    | 20             |
| 3.                | <b>PHP &amp; MySQL</b><br>Introduction to PHPMyAdmin, connection to MySQL server from PHP, execution of MySQL queries from PHP, receiving data from the database server, and processing it on the webserver using PHP. Web Scraping using cURL, Regular Expressions, Mail functions, Web Services, and APIs. | 06    | 20             |
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |
| 4.                | <b>PHP MVC Framework - Laravel</b>   | 09    | 15             |

|    |  |    |     |
|----|--|----|-----|
|    | Introduction to Laravel and MVC, Environment Setup, Routes, Namespaces, Controllers, Views, Blade Templates, Migrations, Request-Response cycle, Redirections, Forms, Sessions, Cookies, Database Connectivity, and CRUD operations.           |    |     |
| 5. | <b>Node.js and Angular</b><br>Basic web development, environmental setup, callbacks, node package manager (NPM) utilization, streams and buffers, Express framework basics, MongoDB basics, and REST API creation. Setup Node.js with Angular. | 08 | 15  |
| 6. | <b>Web Sockets</b><br>Introduction to Web Sockets, Web Socket URIs, Web Socket APIs, Opening Handshake, Data Framing, Sending and Receiving Data, Closing Connections, Error Handling, and Web Socket Security.                                | 06 | 20  |
|    | <b>TOTAL</b>   | 45 | 100 |

#### List of Practical:

| Sr. No | Name of Practical   | Hours     |
|--------|---|-----------|
| 1.     | Install and Configure PHP and MySQL   | 04        |
| 2.     | Develop a Simple Web Page in PHP Using Class, Object, Inheritance, and Function | 02        |
| 3.     | Develop a Web Application in PHP Using Constructor and Destructor               | 02        |
| 4.     | Write a PHP Program to Calculate Date and Time Functions                        | 02        |
| 5.     | Create a Web Page to Advertise a Product of the Company Using Images and Audio  | 02        |
| 6.     | Create a PHP Page for Login System Using Session                                | 02        |
| 7.     | Create a Web Page for a Travel Agency with Database Connectivity                | 02        |
| 8.     | Develop a Small Project Using the Laravel Framework                             | 04        |
| 9.     | Develop a Web Application as a Mini Project Using Node.js                       | 10        |
|        | <b>TOTAL</b>  | <b>30</b> |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 hour of duration and average of the same will be converted out of 30 marks.
- Faculty Evaluation consists of 10 marks as per guidelines provided by Course Coordinator.
- End Semester Examination consists of 60 marks Exam.

**Practical:**

- Continuous Evaluation Consist of Performance of Practical which will be evaluated out of 20 marks for each practical and average of the same will be converted to 20 marks.
- Internal Viva consists of 20 marks.
- Practical performance/quiz/test of 30 marks during End Semester Exam.
- Viva/Oral performance of 30 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, the following course outcomes will be able to:

| <b>SEIT3640</b> | <b>ADVANCED WEB TECHNOLOGIES</b>   |
|-----------------|--|
| CO1             | Identify the basic concepts of web & markup languages.                                       |
| CO2             | Develop web applications using scripting languages & frameworks.                             |
| CO3             | Creating controller working with and displaying in angular js and nested forms with ng-form. |
| CO4             | Working with the files in react js and constructing elements with data.                      |
| CO5             | Develop dynamic web pages with usage of server-side scripting NodeJS and MongoDB.            |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand the principles, architecture, and components of AR and VR systems and their applications in real-world scenarios.
- Design and develop basic AR/VR applications using appropriate tools and technologies for immersive user experiences.
- Analyze the challenges and limitations of AR/VR systems, including hardware, software, and user interaction considerations.

**Course Content:**

| <b>Section I</b> |  |       |                |
|------------------|--|-------|----------------|
| Module No.       | Content  | Hours | Weightage in % |
| 1.               | <b>Introduction to Augmented Reality (AR)</b><br>History of AR - Augmented reality characteristics, Difference between Augmented Reality and Virtual Reality, AR technological components, Technologies used in AR, Feature Extraction, Hardware component, AR devices, Importance of AR, Real world uses of AR - AR types, Software tools available for AR. | 03    | 12             |
| 2.               | <b>AR Hardware and Software</b><br>Sensory hardware; Limitations and interactions; AR and VR together; Introduction to AR headset and smart glasses; Various AR software available; Introduction to Spark AR; Create a face detection app  | 04    | 15             |
| 3.               | <b>Technology Integration and Implementation of AR</b><br>Technology use and integration in industrial settings, Assistive training to faculty members, Planning and administration for implementation, AR implications.   | 05    | 15             |
| 4.               | <b>Augmented Reality and Virtual Reality for Micro Learning</b><br>Micro learning techniques, Utilizing VR for learning, VR for Practical online assessment, VR info graphics, Virtual case considerations, Utilizing AR for learning, Accessible learning,  | 05    | 15             |
|                  |  |       | 142            |

|                   | sensible data elevated learner engagement, VR technology, Components of VR, VR Hardware, VR applications, Civil Engineering, Real Estate, Biology and Medicine, Virtual Mall, VR in Education, Virtual Laboratory, Factory Planning, Automobile Industry. |       |                |
|-------------------|---|-------|----------------|
| <b>Section II</b> |   |       |                |
| Module No.        | Content   | Hours | Weightage in % |
| 5.                | <b>VR Development Tools and Frameworks</b><br>Introduction to VR development platforms (Unity, Unreal Engine), Creating 3D environments for VR, Basics of VR interactions and animations, Integration of audio and spatial effects in VR                  | 04    | 16             |
| 6.                | <b>Interaction Techniques in AR/VR</b><br>Interaction design principles for AR/VR, Gesture recognition and tracking, Voice and eye-tracking in AR/VR systems  | 05    | 15             |
| 7.                | <b>AR/VR Project Implementation</b><br>Project planning and development lifecycle, Designing an end-to-end AR/VR solution, Presentation and evaluation of projects  | 04    | 12             |
| <b>TOTAL</b>      |   | 30    | 100            |

**List of Practical:**

| Sr. No.      | Name of Practical  | Hours |
|--------------|--|-------|
| 1.           | Introduction to Spark and the Fundamentals Function                    | 04    |
| 2.           | Create a Face Detection App using spark.                               | 08    |
| 3.           | Introduction to Unity and its installation.                            | 04    |
| 4.           | Introduction to AR foundation; Installing AR foundation SDK; SDK setup | 10    |
| 5.           | Introduction to C-sharp and its Basics                                 | 04    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Master the concepts of supervised and unsupervised learning, recommendation engine, and time series modeling.
- Implement models such as support vector machines, kernel SVM, naive Bayes, decision tree classifier, random forest classifier, logistic regression, K-means clustering and more in Python.
- Comprehend the theoretical concepts and how they relate to the practical aspects of Machine Learning.

**Course Content:**

| <b>Section I</b> |   |       |                |
|------------------|---|-------|----------------|
| Module           | Content   | Hours | Weightage in % |
| 1.               | <b>Introduction to Artificial Intelligence and Machine Learning</b><br>Learning Problems, designing a learning system, Issues with machine learning. Concept Learning, Version Spaces and Candidate Eliminations, Inductive bias.   | 06    | 10             |
| 2.               | <b>Supervised learning</b><br>Decision Tree Representation, Appropriate problems for Decision tree learning, Algorithm, Hypothesis space search in Decision tree learning, inductive bias in Decision tree learning, Issues in Decision tree learning, Radial Bases, Functions, Case Based Reasoning. | 08    | 20             |

| 3.                | <b>Artificial Neural networks and genetic algorithms</b><br>Neural Network Representation, Appropriate problems for Neural Network Learning, Perceptrons, Multilayer Networks and Back Propagation Algorithms, Remarks on Back Propagation Algorithms. Case Study: face Recognition.  | 09    | 20             |
|-------------------|---|-------|----------------|
| <b>Section II</b> |   |       |                |
| Module            | Content   | Hours | Weightage in % |
| 4.                | <b>Bayesian Learning</b><br>Bayes Theorem, Bayes Theorem and Concept Learning, Maximum Likelihood and Least squared Error Hypothesis, Maximum likelihood hypothesis for Predicting probabilities, Minimum Description Length, Principle, Bayes Optimal Classifier, Gibbs Algorithm, Naive Bayes Classifier.<br>Case Study: Learning to classify text. | 09    | 20             |
| 5.                | <b>Unsupervised learning</b><br>Unsupervised learning, Applications, challenges, K-means, K- Nearest Neighbour Learning Locally Weighted Regression, SVM, Apriori Algorithm, EM Algorithm.  | 07    | 20             |
| 6.                | <b>Overview</b><br>Typical application areas, such as Recommender System.   | 06    | 10             |
|                   | <b>TOTAL</b>  | 45    | 100            |

**List of Practical:**

| Sr. No | Name of Practical                        | Hours |
|--------|--|-------|
| 1.     | Introduction                             | 02    |
| 2.     | Classifying with distance measures       | 02    |
| 3.     | Constructing Decision trees              | 02    |
| 4.     | Classification using Decision Trees      | 02    |
| 5.     | K-means                                  | 02    |
| 6.     | Classification with k-Nearest Neighbours | 02    |
| 7.     | Random Forest                            | 02    |
| 8.     | Support vector machines                  | 02    |
| 9.     | Expectation Maximization                 | 02    |
| 10.    | Page Rank                                | 04    |
| 11.    | Naive Bayes Classification               | 04    |
| 12.    | CART                                     | 04    |

### Course Evaluation:

#### Theory

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, and average at the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

#### Practical

- Continuous Evaluation consists of performance of practical which will be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal viva consists of 10 marks.
- Practical performance/quiz/drawing/test consists of 15 marks during End Semester Exam.
- Viva/ Oral performance consists of 15 marks during End Semester Exam.

### Course Outcome(s):

After completion of the course, the student will be able to,

| <b>SECE4211</b> | <b>MACHINE LEARNING</b>   |
|-----------------|---|
| CO 1            | Recognize basic problem with hypothesis and version spaces.                                   |
| CO 2            | Understand and apply the features of machine learning on real world problems.                 |
| CO 3            | Identify and utilize various algorithms of supervised and unsupervised learning.              |
| CO 4            | Recall the concept of neural networks, Bayesian analysis from probability models and methods. |
| CO 5            | Illustrate fundamental concepts of genetic algorithm.   |

#### Mapping of CO with PO

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

- provide a fundamental understanding of the concepts, history, and scope of Artificial Intelligence.
- enable students to explore the role of AI in shaping future technologies and understand how machines can be designed to exhibit intelligent behaviour.
- develop the ability to design and implement AI-based solutions using appropriate techniques, tools, and algorithms.

**Course Content:**

| Module No.        | Content   | Hours | Weightage in % |
|-------------------|---|-------|----------------|
| <b>SECTION-I</b>  |   |       |                |
| 1.                | <b>What is AI?</b><br>What is an AI Technique? The AI Problems and applications, Major areas of Artificial Intelligence, Turing Test  | 04    | 10             |
| 2.                | <b>Problems, State Space Search &amp; Heuristic Search Techniques</b><br>Defining the Problems as a State Space Search, Production Systems: control & search strategies, Depth first and Breadth first search, Hill Climbing, Best first search, A* algorithm | 08    | 20             |
| 3.                | <b>Knowledge Representation Issues</b><br>Representations and Mappings, Approaches to Knowledge Representation, Using Propositional logic and Predicate Logic, Resolution, Semantic network, Frame based knowledge  | 06    | 10             |
| 4.                | <b>Representing Knowledge Using Rules</b><br>Procedural Versus Declarative Knowledge, Forward Reasoning, Backward Reasoning. Symbolic Reasoning, Under Uncertainty: Introduction to Non-monotonic Reasoning, Logics for Non-monotonic Reasoning               | 05    | 10             |
| <b>SECTION-II</b> |   |       |                |
| 5.                | <b>Uncertain Reasoning and alternatives</b>   | 08    | 20             |

|    |   |           |            |
|----|---|-----------|------------|
|    | Probability and Bayes' Theorem, Certainty Factors and Rule-Base Systems, Bayesian Networks, Dempster Shafer Theory, Fuzzy sets, Fuzzy Logic, Fuzzy systems, Hidden Markov model   |           |            |
| 6. | <b>Game Theory</b><br>Introduction to Game playing, The Minimax search procedure, Alpha-Beta procedure, Refinements, Iterative Deepening  | 05        | 10         |
| 7. | <b>Natural Language Processing</b><br>Introduction, Syntactic Processing, Semantic Analysis, Discourse and Pragmatic Processing, Spell Checking.  | 04        | 10         |
| 8. | <b>Expert Systems</b><br>Expert Systems, Architecture of Expert Systems, Roles of Expert Systems, Knowledge Acquisition, Meta Knowledge, Heuristics, Typical Expert Systems – MYCIN, DART, XOON, Expert Systems Shells. | 05        | 10         |
|    | <b>TOTAL</b>  | <b>45</b> | <b>100</b> |

#### List of Practical:

| Sr. No. | Name of Practical   | Hours     |
|---------|---|-----------|
| 1.      | Overview of Artificial Intelligence systems.  | 02        |
| 2.      | Write a program to implement BFS (for 8 puzzle problem or Water Jug problem or any AI search problem) | 02        |
| 3.      | Write a program to implement DFS (for 8 puzzle problem or Water Jug problem or any AI search problem) | 02        |
| 4.      | Write a program to Implement A* Algorithm.  | 04        |
| 5.      | Explore different python packages which are applicable in AI.   | 04        |
| 6.      | Write a program to construct a Bayesian network from given data.                                      | 04        |
| 7.      | Write a program to infer from the Bayesian network.   | 04        |

### Course Evaluation:

#### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration and average of the same will be converted to 30 marks.
- Faculty Evaluation consists of 10 marks as per the guidelines provided by Course Coordinator.
- End Semester Examination consists of 60 marks.

#### Practical/Tutorial:

- Continuous Evaluation consists of performance of Practical/Tutorial which should be evaluated out of 10 for each practical and average of the same will be converted to 20 Marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/drawing/test of 30 marks during End Semester Exam.
- Viva/Oral performance of 30 marks during End Semester Exam.

### Course Outcome(s):

After completion of the course, the students will be able to

| SECE4221 | ARTIFICIAL INTELLIGENCE  |
|----------|--|
| CO 1     | Identify ai limitations, strengths and human centered problems.        |
| CO 2     | Employ basic ai principles learning and representation of knowledge.   |
| CO 3     | Recognize the importance of ai techniques to design efficient systems. |
| CO 4     | Develop real world solutions based on artificial intelligence.         |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help students to

- understand the current trend or technology.
- aware of future technologies.
- try to learn new technologies and apply them as much as possible.

**Outline of the Project-II:**

| Sr. No | Project-II Guidelines          |
|--------|--------------------------------|
| 1.     | Selection of Title             |
| 2.     | Literature Review              |
| 3.     | Gap Identification             |
| 4.     | Proposed Scheme                |
| 5.     | Implementation of the proposal |
| 6.     | Report Writing                 |
| 7.     | Presentation & Question-Answer |

**Detailed Guideline(s):**

| Sr. No | Content  |
|--------|--|
| 1.     | <b>Selection of Title</b><br>Select a topic according to the specialization of students or future technology. After selecting the topic and proposed title, get approval from the concerned faculty. |
| 2.     | <b>Literature Review</b><br>Study of various technology or area to select a topic of the project.  |
| 3.     | <b>Gap identification and Proposal</b><br>Students must identify the gaps in the existing research and design a proposal which will help in overcome the same.                                       |
| 4.     | <b>Implementation</b><br>Students must implement their proposal in any of the programming languages.   |
| 5.     | <b>Report Writing</b><br>The report must be prepared as per suggested guidelines consisting of Preamble, Objectives, Scope, Introduction, Conclusions, Recommendations and Annexure.                 |
| 6.     | <b>Presentation &amp; Question-Answer</b><br>At the end of the semester, the student/group of students shall give a presentation of their work followed by a viva-voce examination.                  |

**Course Evaluation:**

| Sr. No.             | Evaluation criteria   | Marks      |
|---------------------|---|------------|
| 1.                  | Selection of the topic related field (Within first 30 Days of commencement of semester) | 25         |
| 2.                  | Initial Presentation of the topic (Within 31 to 40 Days of commencement of semester)    | 25         |
| 3.                  | An actual work carried out (Within 41 to 60 Days of commencement of semester)           | 25         |
| 4.                  | Report writing as per guidelines  | 25         |
| 5.                  | Final Presentation & Question-Answer session  | 25         |
| <b>Grand Total:</b> |   | <b>100</b> |

The entire evaluation will be converted equivalent to 200 Marks.

**Course Outcome(s):**

After completion of the course, the students will be able to

| SECE4560 | PROJECT-II   |
|----------|--|
| CO 1     | Distinguish and analyze the issues related to various existing system. |
| CO 2     | Experiment on problem with the help of latest technologies.            |
| CO 3     | Utilize and implement knowledge in the application development.        |
| CO 4     | Facilitate society with recent technological advancement.              |

### Report Writing Guidelines

#### A. Report Format:

1. Title Page (to be provided by the respective supervisor)

The title page of the project shall give the following information in the order listed:

- Full title of the project as approved by the Mentor;
- The full name of the student/Group of students with enrollment number;
- The qualification for which the project is submitted;
- The name of the institution to which the project is submitted;
- The month and year of submission.

Project Certification Form

[The form should be duly filled signed by the supervisors.]

Acknowledgements

[All persons (e.g. supervisor, technician, friends, and relatives) and organization/authorities who/which have helped in the preparation of the report shall be acknowledged.]

Table of Contents/Index with page numbering

List of Tables, Figures, Schemes

Summary/abstract of the report.

Introduction/Objectives of the identified problem

Data Analysis and Finding of Solution

Application of the identified solution

Future Scope of enhancement of the Project and Conclusion

“Learning during Project Work”, i.e. “Experience of Journey during Project Duration”

References(must)

Bibliography

Annexures (if any)

#### B. Guideline for Report Formatting:

- Use A4 size page with 1" margin all sides
- Header should include Project title and footer should contain page number and enrollment numbers
- Chapter Name should be of Cambria font, 20 points, Bold
- Main Heading should be of Cambria font, 14 points, Bold
- Sub Heading should be of Cambria font, 12 points, Bold

- Sub Heading of sub heading should be of Cambria font, 12 points, Bold, Italic
- Paragraph should be of Cambria font, 12 points, no margin at the start of the paragraph
- Line spacing for all content – 1.15, before - 0, after - 0
- No chapter number for references Before chapter 1, give page numbers in roman letter.

CE: Continuous Evaluation, ESE: End Semester Exam

**Outline of the Project/Training:**

**Project**

- The project will be aligned with the aims of the engineering programme and its areas of specialization and shall be based on the recent trends in technology.
- The student shall carry out a comprehensive project at relevant academic / R&D / industrial organization.
- The student is required to submit a project report based on the work carried out.

**Training**

- The aim of this course is to use the internship experience to enable students to develop their engineering skills and practices.
- The student will be placed in industry/organization for 12 to 18 weeks and assessed for academic credit.
- The students may select industry on their own or one which is offered by institute.
- Students are expected to experience a real-life engineering workplace and understand how their engineering and professional skills can be utilized in industry.
- The student is required to submit a project report based on the work carried out.

**Course Outcome(s):**

After completion of the course, the students will be able to

| <b>SECE4930</b> | <b>PROJECT/TRAINING</b>   |
|-----------------|---|
| CO 1            | Support the theoretical learning with practice and integrate knowledge for engineering applications |
| CO 2            | Adapt to real time industry exposure and experience   |
| CO 3            | Solve challenging projects for commercial, societal and environment benefit.                        |
| CO 4            | Explain the importance of planning, documentation, punctuality and work ethics.                     |
| CO 5            | Document the work which is carried out in proper format with industry standards.                    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- comprehend the key concepts of NLP which are used to describe and analyze language
- illustrate computational methods to understand language phenomena of word sense
- design and develop applications with natural language capabilities.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module            | Content  | Hours | Weightage in % |
| 1.                | <b>Introduction</b><br>Introduction to NLP, History of NLP, Advantages of NLP, Disadvantages of NLP, Components of NLP, Applications of NLP, Phases of NLP, Challenges in NLP, NLP Libraries   | 07    | 25             |
| 2.                | <b>Language Modelling and Text Representation</b><br>Unigram Language Model, Bigram, Trigram, N-gram, Applications of Language Modeling, Bag of Word Model, Skip gram, Continuous Bag-Of-Words, Embedding representations for words Lexical Semantics, Feature Weighing Techniques, Parts of Speech Tagging, Morphology.   | 08    | 25             |
| <b>Section II</b> |  |       |                |
| Module            | Content  | Hours | Weightage in % |
| 3.                | <b>Word Sense Disambiguation</b><br>Word Sense Disambiguation, Knowledge Based and Supervised Word Sense Disambiguation, Introduction to WordNet.  | 07    | 25             |
| 4.                | <b>Text Analysis, Summarization and Machine Translation</b><br>Sentiment Mining, Text Classification, Text Summarization, Information Extraction, Named Entity Recognition, Relation Extraction, Question Answering in Multilingual Setting; NLP in Information Retrieval, Cross-Lingual IR, Machine Translation, MT Approaches, Direct Machine Translations, Rule-Based Machine Translation, Knowledge Based MT System, Statistical Machine Translation (SMT) | 08    | 25             |
| <b>TOTAL</b>      |  | 30    | 100            |

**List of Practical:**

| Sr. No | Name of Practical  | Hours |
|--------|--|-------|
| 1.     | Introduction to NLP and related packages in Python                     | 02    |
| 2.     | Text Normalization   | 02    |
| 3.     | Part of Speech tagging experiments                                     | 02    |
| 4.     | Root word conversion (stemming and Lemmatization)                      | 04    |
| 5.     | Morphological analysis of text   | 02    |
| 6.     | N-gram analysis of text  | 02    |
| 7.     | Implementation of Bag of word model with different weighing techniques | 02    |
| 8.     | Implementation of word sense disambiguation models                     | 02    |
| 9.     | WordNet usage based experiment   | 04    |
| 10.    | Named Entity Recognition experiment                                    | 04    |
| 11.    | Text Classification based experiment                                   | 04    |
|        | <b>TOTAL</b>   | 30    |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

##### Practical:

- Continuous Evaluation consists of performance of practical which will be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal viva consists of 10 marks.
- Practical performance/quiz/drawing/test consists of 15 marks during End Semester Exam.
- Viva/ Oral performance consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the student will be able to,

| SECE4610 | Natural Language Processing  |
|----------|--|
| CO 1     | Extract information from text automatically using concepts and methods from natural language processing (NLP) including stemming, n-grams, POS tagging, and parsing. |
| CO 2     | Develop speech-based applications that use speech analysis (phonetics, speech recognition, and synthesis)  |
| CO 3     | Analyze the syntax, semantics, and pragmatics of a statement written in a natural language.  |
| CO 4     | Write scripts and applications in Python to carry out natural language processing using libraries such as NLTK, Gensim, and spaCY.                                   |
| CO 5     | Design NLP-based AI systems for question answering, text summarization, and machine translation.   |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

- Understand fundamentals of deep learning and neural networks.
- Learn key architectures such as CNNs, RNNs, LSTMs, and GANs.
- Develop skills to design, train, test and evaluate deep learning models.

**Course Content:**

| Module No.        | Content  | Hours     | Weightage in % |
|-------------------|--|-----------|----------------|
| <b>SECTION-I</b>  |  |           |                |
| 1.                | <b>Introduction to Deep Learning:</b><br>Neural Networks Basics, Perceptron, Activation Functions, Gradient Descent, Backpropagation | 4         | 13             |
| 2.                | <b>Deep Neural Networks:</b><br>Deep architectures, Optimization methods, Regularization, Hyperparameter tuning                      | 4         | 13             |
| 3.                | <b>Convolutional Neural Networks:</b><br>Convolution, Pooling, CNN Architectures (LeNet, AlexNet, VGG, ResNet)                       | 4         | 13             |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand Agile values, principles, and practices.
- Apply DevOps principles to shorten feedback loops and improve delivery.
- Gain practical knowledge of CI/CD, containerization, Infrastructure as Code, and monitoring.
- Build the ability to plan, execute, and improve agile–DevOps projects.

**Course Content:**

| <b>Section I</b>  |   |       |                |
|-------------------|---|-------|----------------|
| Module No.        | Content   | Hours | Weightage in % |
| 1.                | <b>Introduction to Agile &amp; DevOps</b><br>Agile Manifesto & principles<br>Scrum framework: roles, events, artifacts<br>Kanban method and Lean principles<br>DevOps culture and “Three Ways” (Flow, Feedback, Learning) | 03    | 10             |
| 2.                | <b>Agile Planning &amp; Project Management</b><br>User stories, acceptance criteria, estimation techniques Velocity, burn-down charts, backlog grooming<br>Continuous planning & team ceremonies                          | 03    | 12             |
| 3.                | <b>Version Control &amp; Collaboration</b><br>Git basics, branching strategies (GitFlow, trunk-based)<br>Code review practices<br>Collaboration tools (GitHub/GitLab, Jira, Trello)                                       | 04    | 13             |
| 4.                | <b>Continuous Integration</b><br>Build automation & test automation pyramid<br>CI servers and pipelines (GitHub Actions/GitLab CI/Jenkins)<br>Static code analysis & quality gates  | 05    | 15             |
| <b>Section II</b> |   |       |                |
| 5.                | <b>Containerization &amp; Environment Management</b><br>Docker fundamentals (images, containers, Compose)<br>Introduction to Kubernetes: Pods, Deployments, Services<br>Environment parity & reproducibility              | 05    | 15             |
| 6.                | <b>Infrastructure as Code</b>   | 03    | 10             |

|              |  |    |     |
|--------------|--|----|-----|
|              | Infrastructure provisioning (Terraform basics)<br>Configuration management (Ansible basics)<br>Secrets and config management   |    |     |
| 7.           | <b>Continuous Delivery &amp; Monitoring</b><br>Deployment strategies: Blue/Green, Canary, Rolling<br>Observability: logs, metrics, tracing<br>Monitoring tools (Prometheus, Grafana basics)  | 04 | 15  |
| 8.           | <b>DevSecOps &amp; Scaling Agile-DevOps</b><br>Security in CI/CD: SAST, DAST, dependency scanning<br>Feature toggles, trunk-based development<br>Scaling Agile (SAFe overview, value stream mapping)<br>Measuring performance (DORA metrics) | 03 | 10  |
| <b>TOTAL</b> |  | 30 | 100 |

#### List of Practical:

| Sr. No.      | Name of Practical  | Hours |
|--------------|--|-------|
| 1.           | Introduction to Agile tools – create Scrum board with backlog and sprint planning. | 02    |
| 2.           | Git & GitHub – branching, pull requests, merge conflicts.                          | 02    |
| 3.           | CI setup using GitHub Actions/Jenkins – build & test automation.                   | 02    |
| 4.           | Containerize a sample app with Docker & run with Docker Compose.                   | 02    |
| 5.           | Deploy microservice on Minikube with Kubernetes Deployments & Services.            | 04    |
| 6.           | Provision simple VM/cluster using Terraform.                                       | 02    |
| 7.           | Apply Ansible playbook for app configuration.                                      | 02    |
| 8.           | Implement Blue/Green deployment with containers.                                   | 02    |
| 9.           | Monitor service with Prometheus & visualize metrics in Grafana.                    | 02    |
| 10.          | Integrate security scanning in CI/CD pipeline.                                     | 02    |
| 11.          | Implement feature toggles in a small project.                                      | 02    |
| 12.          | Capstone mini-project: End-to-end Agile-DevOps pipeline for a sample web app.      | 06    |
| <b>TOTAL</b> |  | 30    |

#### Text Book(s):

| Title                             | Author/s  | Publication           |
|-----------------------------------|---|-----------------------|
| The DevOps Handbook (2nd Edition) | Gene Kim, Jez Humble, Patrick Debois, John Willis, Nicole Forsgren, | IT Revolution (2021). |

#### Reference Book(s):

| Title   | Author(s)                              | Publication        |
|---|--|--------------------|

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of practical performance which should be evaluated out of 10 for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva-voce consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After completion of the course, the students will be able to

| <b>SEIT4610</b> | <b>DevOps and Agile Foundation</b>   |
|-----------------|--|
| CO 1            | Explain Agile and DevOps principles and their role in modern software development. |
| CO 2            | Apply Agile project management techniques (Scrum/Kanban) for team-based projects.  |
| CO 3            | Implement CI/CD pipelines using industry-standard tools.                           |
| CO 4            | Containerize, deploy, and monitor applications in a DevOps environment.            |
| CO 5            | Integrate security and scaling practices into Agile-DevOps workflows.              |

**Mapping of CO with PO**

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

- To understand the fundamentals and architecture of blockchain systems.
- To analyze cryptographic methods, consensus mechanisms, and smart contracts.
- To evaluate blockchain applications, security issues, and emerging trends.

**Course Content:**

| Module No. | Content   | Hours | Weightage in % |
|------------|---|-------|----------------|
| 1.         | <b>Introduction to Blockchain Technology</b><br>Genesis & evolution of blockchain systems (Bitcoin origin) , What is a blockchain? ledger, blocks, immutability, decentralization , Public vs permissioned blockchains, Applications beyond cryptocurrency: e-governance, supply-chain, identity management | 04    | 13             |
| 2.         | <b>Cryptographic Primitives &amp; Blockchain Components</b><br>Cryptographic hash functions, digital signatures, Merkle trees, Block structure, transaction life-cycle, P2P networks, distributed ledger basics, decentralization model, Trust models and adversarial considerations                        | 04    | 12             |
| 3.         | <b>Consensus Mechanisms &amp; Blockchain Architecture</b><br>Proof-of-Work (PoW), Proof-of-Stake (PoS) and other consensus models, Permissionless vs permissioned consensus, Architecture of enterprise blockchains, Hyperledger, state-machine replication   | 05    | 15             |
| 4.         | <b>Smart Contracts, DApps &amp; Platforms</b><br>Smart contract fundamentals: Solidity, EVM, deployment on Ethereum, Permissioned smart contract platforms: Hyperledger Fabric architecture, Decentralised applications (DApps) and tooling overview  | 04    | 13             |
| 5.         | <b>Blockchain Security, Privacy &amp; Interoperability</b><br>Security threats in blockchain: forks, 51% attack, double spending, Privacy concerns: anonymity, pseudonymity , Blockchain interoperability: cross-chain, sidechains, bridges   | 03    | 10             |
| 6.         | <b>Standards, Regulation &amp; Legal Aspects</b>  | 03    | 10             |

|    |   |           |            |
|----|---|-----------|------------|
|    | Regulatory frameworks for blockchain and cryptocurrencies , Data protection, compliance issues in distributed ledger systems, Standards in blockchain systems and enterprise adoption   |           |            |
| 7. | <b>Blockchain Use-Cases &amp; Industry Applications</b><br>Financial services: cross-border payments, trade finance, Supply chain, provenance, healthcare, identity management, Emerging domains: IoT + blockchain, energy sector                     | 04        | 15         |
| 8. | <b>Emerging Trends &amp; Future Directions</b><br>Blockchain + AI/ML, IoT integration, Decentralised identity, tokenisation of assets, Challenges & research directions: scalability, quantum-resilience, Case study on recent blockchain Application | 03        | 12         |
|    | <b>TOTAL</b>  | <b>30</b> | <b>100</b> |

#### List of Tutorial:

| Sr. No | Name of Practical  | Hours     |
|--------|--|-----------|
| 1.     | Study of blockchain concepts and Ethereum installation.          | 02        |
| 2.     | Implement hashing and Merkle tree operations using Python.       | 02        |
| 3.     | Analyze Bitcoin block data and transaction structure.            | 02        |
| 4.     | Implement Proof-of-Work using Python (simple simulation).        | 02        |
| 5.     | Explore Ethereum wallet creation and account management.         | 02        |
| 6.     | Introduction to Solidity: Syntax, data types, basic contract.    | 02        |
| 7.     | Write and deploy a simple smart contract on Remix IDE.           | 02        |
| 8.     | Implement events and functions in Solidity contracts.            | 02        |
| 9.     | Develop a token-based smart contract (ERC-20 basics).            | 02        |
| 10.    | Case study: Supply chain tracking on blockchain.                 | 02        |
| 11.    | Case study: Blockchain for healthcare data management.           | 02        |
| 12.    | Study of Hyperledger Fabric architecture and components.         | 02        |
| 13.    | Comparison of public vs private blockchain with examples.        | 02        |
| 14.    | Mini Project: Build and present a blockchain use-case prototype. | 04        |
|        | <b>TOTAL</b>   | <b>30</b> |

#### Text Book(s):

| Title   | Author/s     | Publication |
|---|--------------|-------------|
| Mastering Blockchain: Deeper Insights into Decentralization, Cryptography, Bitcoin, and Popular Blockchain Frameworks | Mohan Bashir | Apress      |

#### Reference Book(s):

### Course Evaluation:

#### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration and average of the same will be converted to 30 marks.
- Faculty Evaluation consists of 10 marks as per the guidelines provided by Course Coordinator.
- End Semester Examination consists of 60 marks.

#### Practical/Tutorial:

- Continuous Evaluation consists of performance of Practical/Tutorial which should be evaluated out of 10 for each practical and average of the same will be converted to 20 Marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/drawing/test of 30 marks during End Semester Exam.
- Viva/Oral performance of 30 marks during End Semester Exam.

### Course Outcome(s):

After completion of the course, the student will be able to

| SECE4630 | Blockchain Technology  |
|----------|--|
| C01      | Understand the fundamental concepts, architecture, and components of blockchain technology.      |
| C02      | Describe cryptographic techniques and consensus mechanisms used in blockchain systems.           |
| C03      | Develop and deploy basic smart contracts and decentralized applications on blockchain platforms. |
| C04      | Analyze blockchain security issues, privacy concerns, and performance challenges..               |
| C05      | Assess real-world blockchain applications, legal frameworks, and emerging technological trends.  |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- To provide students with a solid understanding of data science concepts, including data exploration, analysis, and visualization.
- To teach students data manipulation, cleaning, and preprocessing techniques.
- To introduce machine learning algorithms and their applications in real-world problems.
- To equip students with the skills to handle large datasets using Python and relevant libraries.
- To train students in data storytelling and decision-making based on data insights.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module No.        | Content  | Hours | Weightage in % |
| 1.                | <b>Introduction to Data Science</b> Definition, scope, lifecycle, data types & sources, data ethics, reproducibility, roles of data scientists, applications in business, health, and social domains.                                  | 03    | 10%            |
| 2.                | <b>Tools for Data Science</b> Introduction to R and Python environments, Jupyter Notebook, RStudio, Anaconda, Git/GitHub, data frames, basic commands, package management, overview of libraries (pandas, numpy, matplotlib, ggplot2). | 03    | 10%            |
| 3.                | <b>Data Wrangling and Pre-Processing</b> Data collection & integration, handling missing values, outliers, data transformation, encoding, scaling, normalization, feature engineering.   | 04    | 12%            |
| 4.                | <b>Exploratory Data Analysis &amp; Visualization</b> Descriptive statistics, data summaries, correlation analysis, graphical techniques (histograms, scatter, pairplots, heatmaps), data storytelling.                                 | 04    | 15%            |
| <b>Section II</b> |  |       |                |
| Module No.        | Content  | Hours | Weightage in % |
| 5.                | <b>Dimensionality Reduction &amp; Association Rules</b> Correlation matrix, PCA, feature selection, Apriori algorithm, support, confidence, lift, market-basket analysis.  | 04    | 13%            |

|              |   |    |      |
|--------------|---|----|------|
| 6.           | <b>Supervised Learning – Regression &amp; Classification</b> Linear regression, logistic regression, decision trees, random forest, model evaluation (metrics, cross-validation).   | 05 | 15%  |
| 7.           | <b>Unsupervised Learning – Clustering</b> K-Means, hierarchical clustering, DBSCAN overview, cluster evaluation, visualization of clusters.   | 03 | 15%  |
| 8.           | <b>Text Analytics and Recent Trends in Data Science</b> Text processing, tokenization, stopword removal, TF-IDF, sentiment analysis, overview of Generative AI and Large Language Models (LLMs), Responsible AI, MLOps, data governance and ethics. | 04 | 10%  |
| <b>TOTAL</b> |   | 30 | 100% |

#### List of Practical:

| Sr. No       | Name of Practical   | Hours |
|--------------|---|-------|
| 1            | Explore data science workflow and basic data operations in Python/R.                          | 02    |
| 2            | Install and configure R, Python, Jupyter Notebook & RStudio; use libraries (pandas, ggplot2). | 02    |
| 3            | Data cleaning – handle missing values and outliers; apply feature scaling and encoding.       | 04    |
| 4            | Perform EDA and visualization on a real dataset (Iris/Titanic); generate EDA report.          | 04    |
| 5            | Apply PCA on a multivariate dataset and perform association rule mining (Apriori).            | 04    |
| 6            | Implement linear and logistic regression; decision tree and random forest models.             | 04    |
| 7            | Apply K-Means and hierarchical clustering; evaluate and visualize results.                    | 02    |
| 8            | Perform text pre-processing and sentiment analysis; demonstrate LLM/GenAI API usage.          | 04    |
| 9            | Case study project on data visualization and storytelling.                                    | 04    |
| <b>TOTAL</b> |   | 30    |

### Course Evaluation:

#### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

#### Practical:

- Continuous Evaluation consists of the performance of practical which will be evaluated out of 10 marks for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 20 marks.
- Practical performance/quiz/test consists of 30 marks during End Semester Exam.
- Viva/oral performance consists of 30 marks during End Semester Exam.

### Course Outcome(s):

After the completion of the course, the following course outcomes will be able to:

| SEIT4620 | DATA SCIENCE  |
|----------|---|
| CO 1     | Understand the Data Science lifecycle, ethical considerations, and apply fundamental programming tools (Python/R, libraries) for data exploration.        |
| CO 2     | Implement advanced data wrangling, cleaning, and preprocessing techniques to prepare raw, incomplete, and noisy datasets for modeling.                    |
| CO 3     | Analyze and apply supervised machine learning models (Regression and Classification) and critically evaluate their performance using appropriate metrics. |
| CO 4     | Apply unsupervised learning techniques like clustering and dimensionality reduction (PCA) to extract patterns and structure from unlabeled data.          |
| CO 5     | Examine advanced topics like Text Analytics, Generative AI, and Responsible AI, and effectively communicate data-driven conclusions.                      |

### Mapping of CO with PO

| SEIT4620 | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

- To introduce the fundamentals of cyber security concepts and challenges.
- To understand common cyber threats, attacks, and defense mechanisms.
- To provide students with a comprehensive understanding of cryptography, network, and web security concepts, along with insights into cyber laws, ethical practices, and modern security advancements.

**Course Content:**

| Module No. | Content  | Hours | Weightage in % |
|------------|--|-------|----------------|
| 1.         | <b>Introduction to Cyber Security</b><br>Overview of Cybersecurity: Importance, Scope, Challenges, and Careers, Cybersecurity Goals: Confidentiality, Integrity, Availability (CIA), Understanding Threat Actors: Hackers, Hacktivists, Cybercrime, Cyberspace, Importance of Cybersecurity in Modern Society: Cyber Security Jobs and Industry Trends   | 04    | 13             |
| 2.         | <b>Cyber Attack &amp; Defense Mechanism</b><br>Security Challenges in Modern Computing Environments, Common Cyber Threats and Vulnerabilities, Overview of Cyber Defense Mechanisms: Security layered approach, firewalls, antivirus, and intrusion detection/prevention systems (IDS/IPS), Principles of least privilege and access control, Security monitoring and incident response basics | 04    | 12             |
| 3.         | <b>Foundation of Cryptography</b><br>Introduction to Cryptography, Symmetric key Cryptography, Asymmetric key Cryptography, Message Authentication, Digital Signatures, Applications of Cryptography.  | 05    | 15             |
| 4.         | <b>Network Security</b><br>Network Security Basics: OSI Layers, Firewalls, IDS/IPS, Secure Protocols: VPNs, SSL/TLS, HTTPS, SFTP, SCP, Network Threats: DDoS, ARP/DNS/DHCP Spoofing,   | 04    | 13             |

|    |  |           |            |
|----|--|-----------|------------|
|    | Network Scanning Tools: Nmap, Wireshark, Case Study: Real-World Network Attack Analysis.   |           |            |
| 5. | <b>Web and Application Security</b><br>Web-based attacks: SQL Injection, Cross-Site Scripting (XSS), CSRF OWASP Top 10 vulnerabilities, Secure web design and coding principles, Role of authentication and session management, Overview of vulnerability assessment and penetration testing   | 03        | 10         |
| 6. | <b>Cyberspace Standards, Compliance and the Law</b><br>Introduction, Cyber Security Regulations, Cybersecurity Standards: ISO 27001, NIST, GDPR, HIPAA, PCI-DSS, Roles of International Law, the state and Private Sector in Cyberspace, Cyber Security Standards. The INDIAN Cyberspace, National Cyber Security Policy 2013  | 03        | 10         |
| 7. | <b>Digital Forensics and Incident Response</b><br>Basics of digital forensics: scope and objectives, Stages of forensic investigation: identification, preservation, analysis, reporting, Tools used in forensics: EnCase, FTK, Autopsy (overview), Concepts of incident response lifecycle, Log analysis and tracing attacks, Role of Computer Emergency Response Teams (CERT-In) | 04        | 15         |
| 8. | <b>Emerging Areas and Future Trends</b><br>Cloud security challenges and best practices, Internet of Things (IoT) vulnerabilities and mitigation, Artificial Intelligence and Machine Learning in cyber defense, Blockchain security concepts, Quantum cryptography overview, Recent global cyber incidents and lessons learned  | 03        | 12         |
|    | <b>TOTAL</b>   | <b>30</b> | <b>100</b> |

#### List of Tutorial:

| Sr. No | Name of Practical  | Hours |
|--------|--|-------|
| 1.     | Study of cybersecurity fundamentals, vulnerabilities & threat types.                                     | 02    |
| 2.     | Perform malware analysis using online sandbox tools.   | 02    |
| 3.     | Network scanning using Nmap and Zenmap.  | 02    |
| 4.     | Packet capture and analysis using Wireshark.   | 02    |
| 5.     | Configure basic firewall rules on a system or VM.  | 02    |
| 6.     | Demonstrate hashing & encryption algorithms using Python/online tools.                                   | 02    |
| 7.     | Explore SSL/TLS certificate analysis for websites.   | 02    |
| 8.     | Establish a Secure Connection using VPN or SSH.  | 02    |
| 9.     | Perform SQL Injection & Cross-Site Scripting (XSS) attack testing on a sample vulnerable website (DVWA). | 02    |
| 10.    | Perform disk image acquisition and metadata analysis using Autopsy or FTK Imager.                        | 02    |
| 11.    | Conduct email header analysis for phishing detection.  | 02    |
| 12.    | Network forensics: Extract metadata from pcap files.   | 02    |
| 13.    | Study of digital evidence collection and chain of custody.   | 02    |
| 14.    | Case study: Analysis of a major cyber-attack in industry.  | 02    |

|     |   |           |
|-----|---|-----------|
| 15. | Mini Project: Vulnerability analysis and reporting. | 02        |
|     | <b>TOTAL</b>  | <b>30</b> |
