

Report on Supporting Land Ecosystems through Education

University as a body offer educational programmes on ecosystems for local or national communities

Year 2024-25

SDG-15

LIFE ON LAND

University as a body offer educational programmes on ecosystems for local or national communities

Ecosystem education at the University runs through its academic programmes and through programmes for the community. The degree programmes and subjects offered on ecosystems are listed, and they include the B.Sc. Environmental Science programme and the ecology content of the Biotechnology, Microbiology and Agriculture programmes.

Beyond the classroom, the University runs a mushroom cultivation certification programme, student training on restoration land, wetlands and other habitats, a value-added course on organic farming, agroforestry and soil conservation, biodiversity walks, forest visits and ecological field studies.

Local communities are trained in sustainable land and biodiversity practices, and the NSS special camps in villages around Kosamba and Mangrol carry an ecosystem awareness session for residents. Faculty of the Schools of Sciences and Agriculture take the technical sessions.

The programmes, courses and activities for 2024-25 are attached.

DOCUMENTS REQUIRED

- ✓ Mushroom Cultivation Certification Programme
- ✓ Student training on restoration land, wetland or habitats
- ✓ Value-added course on organic farming, agroforestry and soil conservation
- ✓ Biodiversity walks
- ✓ Forest visit
- ✓ Ecological field studies
- ✓ Training of local communities in sustainable land and biodiversity practices
- ✓ List of degree programmes offered with respect to ecosystems
- ✓ List of subjects offered with respect to ecosystems
