

Report on Supporting Land Ecosystems through Education

University as a body offer educational programme/outreach for local or national communities on sustainable management of land for agriculture

Year 2024-25

SDG-15

LIFE ON LAND

University as a body offer educational programme/outreach for local or national communities on sustainable management of land for agriculture

The School of Agriculture takes sustainable land management to farmers in the villages around Dhamdod, Kosamba and Mangrol. The programmes include soil health and soil testing camps, training in organic and sustainable farming, integrated pest management training, a water-smart agriculture programme, agroforestry and climate-smart agriculture programmes, soil erosion control demonstrations, crop diversification, vermicomposting and composting training, and sustainable land management workshops.

Demonstrations are held in the field so that farmers see the methods used and do not only hear about them, and the work is coordinated with the Krishi Vigyan Kendras and Gujarat's natural farming programme instead of duplicating them. Agriculture students take part in the extension work as a part of their programme, and faculty follow up with farmers who take up the practices shown.

The list of activities for 2024-25, with reports and photographs, is attached.

DOCUMENTS REQUIRED

- ✓ List of activities for local or national communities on sustainable management of land for agriculture
- ✓ Soil Health and Soil Testing Camp
- ✓ Organic/Sustainable Farming Training
- ✓ Integrated Pest Management Training
- ✓ Water-Smart Agriculture Programme
- ✓ Agroforestry Programme
- ✓ Climate-Smart Agriculture Programme
- ✓ Soil Erosion Control Demonstration
- ✓ Crop Diversification Programme
- ✓ Vermicomposting/Composting Training
- ✓ Sustainable Land Management Workshop
