

Report on Supporting Land Ecosystems through Action

University as a body have a policy to reduce the impact of alien species on Campus

Year 2024-25

SDG-15

LIFE ON LAND

University as a body have a policy to reduce the impact of alien species on Campus

The University's policy on alien species is part of its Biodiversity Conservation and Ecosystem Protection Policy. It requires native and locally suitable plants for plantation and landscaping and prohibits introducing invasive or unsuitable plant species on the campus without assessment.

The Eco Club identifies and documents the species on the campus through the biodiversity census and reports to the University where unsuitable species appear or where an ecosystem is under threat, so that they can be dealt with.

The grounds staff follow the same rule in new plantings, and construction and landscaping are planned so as not to disturb natural habitats unnecessarily.

The policy is attached.

DOCUMENTS REQUIRED

- ✓ Policy to reduce the impact of alien species on campus
