

Report on Supporting Land Ecosystems through Action

University as a body collaborate with the local community, e.g. through partnerships, in efforts to maintain shared land ecosystems

Year 2024-25

SDG-15

LIFE ON LAND

University as a body collaborate with the local community, e.g. through partnerships, in efforts to maintain shared land ecosystems

The University is located among the villages of Dhamdod, Kosamba and Mangrol, and its work on land and ecosystems is done together with the people who live there. Through Unnat Bharat Abhiyan (UBA) the University works with the local community, and the UBA certificate and the UBA activities related to land ecosystems are attached.

The NSS special camps carry out cleanliness and plantation drive on shared and common land in neighboring villages, in coordination with the Gram Panchayats.

The School of Agriculture works with local cultivators on land and soil management, which affects neighboring plots and shared irrigation and drainage, and students and staff join local observances such as World Environment Day with community members in the villages, not only on the campus.

Other activities carried out with the local community and NGOs are listed with photographs.

DOCUMENTS REQUIRED

- ✓ UBA certificate and activities with respect to land ecosystems
- ✓ Other activities in collaboration with the local community and NGOs
