

Report on Land Sensitive Waste Disposal

University as a body have a policy on reducing plastic waste on campus

Year 2024-25

SDG-15

LIFE ON LAND

University as a body have a policy on reducing plastic waste on campus

The University has a policy under its Green Campus Initiative that prohibits the use of plastics on the campus to the maximum extent. Single-use plastic bottles and cups and other plastic-heavy materials have been discontinued in the University's own food and beverage services, and the cafeteria and catering contracts require steel, glass, paper or biodegradable service ware instead, so the plastic is kept out at the point of purchase.

Designated plastic-waste collection points are placed around the campus for the plastic that still comes in, mostly as packaging on goods brought in by individuals, and what is collected goes into the University's Waste Management System.

The Green Campus Initiative communications and the NSS and Eco Club campaigns, especially around World Environment Day, keep the campus community aware of the policy.

The policy and the photographs of the collection points and other supporting evidence are attached.

DOCUMENTS REQUIRED

- ✓ Policy on reducing plastic waste on campus
- ✓ Supporting photographs
