

# Report on Land Sensitive Waste Disposal

**University as a body have a policy, process or practice on waste disposal - covering hazardous materials**

**Year 2024-25**

**SDG-15**

**LIFE ON LAND**

**University as a body have a policy, process or practice on waste disposal - covering hazardous materials**

Waste on the campus is handled through the PPSU Waste Management System, which is referred to on the IQAC portal. General solid waste is segregated and collected from collection points in the academic, hostel and administrative zones. Hazardous waste is handled separately by source.

Chemical waste from the Sciences and Pharmacy laboratories is segregated at the laboratory into categories such as organic solvents, acids and bases and biological waste, and disposed of through appropriate channels and not through drains or the general waste stream, and laboratory safety briefings for students and staff stress this segregation.

Biomedical waste from the affiliated Homoeopathic and Ayurvedic hospital units is stored in designated areas and handed over to an authorized biomedical-waste disposal agency, as the Bio-Medical Waste Management Rules require.

The document describing the policy, process and practice on waste disposal, including hazardous materials, is attached.

## DOCUMENTS REQUIRED

- ✓ Policy, process or practice on waste disposal covering hazardous materials (PPSU Waste Management System)
