PARTNERSHIPS FOR THE GOALS

University's progress against SDG11: Sustainable Cities and Communities

The University contributes to sustainable communities in two ways. Its campus planning provides green space and pedestrian-priority design alongside new development, as described under SDG 15, and the estate and facilities team is responsible for it.

Its NSS unit works with the neighboring villages of Dhamdod, Kosamba and Mangrol on sanitation, common-land stewardship and general civic matters through village camps, in coordination with the local Gram Panchayats. The IQAC consolidates both strands every year.

The campus master-plan documents and the NSS village-camp activity records are attached.

DOCUMENTS REQUIRED

- ✓ Campus master-plan documentation (cross-referenced with the SDG 15 planning and development metric)
- ✓ NSS village-camp activity records
