University's progress against SDG13: Climate Action

Year 2024-25

SDG-17

PARTNERSHIPS FOR THE GOALS

University's progress against SDG13: Climate Action

The University's Green Campus Initiative is its main climate measure. It includes tree plantation and green-cover maintenance, restricted fuel-vehicle access and the promotion of bicycles and battery vehicles, and these are described in the SDG 15 and SDG 7 summaries.

The Environmental Science curriculum in the School of Sciences covers climate-change science, impacts and mitigation. Plantation drives are held every year and green cover is maintained throughout.

The SDG 15 documents on conservation events and green-cover maintenance, the SDG 7 documents and the Environmental Science curriculum documents covering climate change are attached.

DOCUMENTS REQUIRED

- ✓ SDG 15 documents on conservation events and green-cover maintenance
- ✓ SDG 7 documents on sustainable transport
- ✓ Environmental Science curriculum documents covering climate change
