Year 2024-25

SDG-17

PARTNERSHIPS FOR THE GOALS

University's progress against SDG2: Zero Hunger

The University's work on hunger and food comes mainly from the School of Agriculture, whose teaching, research and extension centre on sustainable food production.

Its faculty train farmers and hold field demonstrations on sustainable cultivation and soil health in the communities around Kosamba and Mangrol, and its students take up research and project work on crop productivity and food security.

On the campus, the food service, the student and staff hunger measures and the sourcing of food from regional suppliers are described in the SDG 2 metrics of this submission.

The School of Agriculture's academic and extension reports, the farmer training records and the campus catering sourcing documents are attached.

DOCUMENTS REQUIRED

- ✓ School of Agriculture academic and extension reports
- ✓ Farmer training records
- ✓ Campus catering sourcing documentation (cross-referenced with the SDG 2 and SDG 15 food-sourcing metrics)
