Year 2024-25

SDG-17

PARTNERSHIPS FOR THE GOALS

University's progress against SDG6: Clean Water and Sanitation

The University's main contribution to clean water and sanitation is its water infrastructure: rainwater harvesting, wastewater recycling and RO-based purification of drinking water, which are described under the water quality metric of SDG 15. It also maintains sanitation standards in the hostel and academic-block washrooms.

Sensor-controlled tanks and routine plumbing maintenance keep wastage and leakage down. The NSS unit runs Swachh Bharat cleanliness and hygiene-awareness drives on the campus and in the adopted villages.

The Water Conservation Facilities documentation, the hostel sanitation maintenance records and the NSS Swachh Bharat activity records are attached.

DOCUMENTS REQUIRED

- ✓ Water Conservation Facilities documentation (cross-referenced with the SDG 15 water quality metric)
- ✓ Hostel sanitation maintenance records
- ✓ NSS Swachh Bharat activity records
