PARTNERSHIPS FOR THE GOALS

University's progress against SDG8: Decent Work and Economic Growth

For students, the University's contribution to decent work and economic growth comes through the Training and Placement Cell, which coordinates campus recruitment, internships and skill development across the schools, and through the Entrepreneurship Cell, which supports student start-ups and enterprise development.

Skill and certification programmes are run with industry partners, and a campus placement season is held every year. As an employer, the University follows the statutory employment provisions for its faculty and staff, including minimum wage, provident fund and employee state insurance.

The Training and Placement Cell annual placement and internship reports, the Entrepreneurship Cell activity records and the HR statutory-compliance documents are attached.

DOCUMENTS REQUIRED

- ✓ Training and Placement Cell annual placement/internship reports
- ✓ Entrepreneurship Cell activity records
- ✓ HR statutory-compliance documentation
