

Report on Student Access Measures

**University as a body systematically measure/track
women's application rate and acceptance or entry rate**

Year 2024-25

SDG-5

GENDER EQUALITY

University as a body systematically measure/track women's application rate and acceptance or entry rate

Gender is captured as a standard field at the application stage in the University's ERP, for every programme and School, so applications and admissions can be counted by gender year after year. The Admissions Office keeps applicant and admitted-student records programme-wise for Engineering, Sciences, Pharmacy, Design, Agriculture, Management Studies, Law and the affiliated Homoeopathic and Ayurvedic medical colleges.

When an admission cycle closes, the office consolidates the counts by programme and gender and shares them with the School Principal and the IQAC, who go through them every year and use them when planning outreach, particularly for Engineering, where fewer women apply. From these counts the University can work out, programme by programme, the application rate of women and their share among those admitted.

An ERP report extracted from the admissions data, showing gender-wise applications, is attached.

DOCUMENTS REQUIRED

- ✓ ERP report of admissions data extract showing gender-wise applications (and admissions)
