| INSTITUTE VISION   |  |
|--|--|
| To emerge as an Institute of Excellence by imparting value-based education aided with Research, Innovation and Entrepreneurial skills. |  |

| INSTITUTE MISSION |   |
|-------------------|---|
| 1.                | To impart the holistic engineering education of highest quality & prepare socially responsible professionals with entrepreneurial skills.       |
| 2.                | To prepare value-aided engineering professionals to meet up global industry requirements by imparting cutting edge professional education.      |
| 3.                | To inculcate the attitude of research and innovation among the stake holders through experiential and project-based teaching-learning pedagogy. |
| 4.                | To acquire global talent pool by providing world class amenities for teaching, learning & research.   |

Graduates will demonstrate ability to:

| PEO No | PROGRAMME EDUCATIONAL OBJECTIVES   |
|--------|--|
| PEO 1  | Solve real-world engineering problems, design and develop innovative and cost-effective solutions exhibiting engineering skills/fundamentals to cater needs of society.      |
| PEO 2  | Excel in Industry/technical profession, higher studies, and entrepreneurship exhibiting comprehensive competitiveness.   |
| PEO 3  | Exhibit professional ethics & values, effective communication, teamwork, multidisciplinary approach, and ability to relate engineering issues to broader societal framework. |

| PO No | PROGRAMME OUTCOMES   |
|-------|--|
| PO 1  | Engineering knowledge:<br>Apply knowledge of engineering fundamentals, science, mathematics & engineering specialization for the solution of complex engineering problems.   |
| PO 2  | Problem analysis:<br>Identify, formulate and analyze complex engineering problems leading to substantial conclusions using basic principles of mathematics, science and engineering.   |
| PO 3  | Design/development of solutions:<br>Develop solutions for complex engineering problems and design system components or processes meeting specified needs having due consideration for the safety and societal & environmental considerations.  |
| PO 4  | Conduct investigations of complex problems:<br>Use research-based knowledge & methods like design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid & viable conclusions.   |
| PO 5  | Modern tool usage:<br>Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools for prediction and modeling of complex engineering activities with an understanding of the limitations.   |
| PO 6  | The engineer and society:<br>Apply cognitive learning by the contextual knowledge to assess societal, health, safety, legal and cultural issues and following responsibilities relevant to the professional engineering practice.  |
| PO 7  | Environment and sustainability:<br>Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge & skill needed for sustainable development.   |
| PO 8  | Values & Ethics:<br>Apply basic moral values & ethical principles and pledge to professional ethics/norms and responsibilities of the engineering practice.  |
| PO 9  | Individual and team work:<br>Function effectively as an individual/as a team member or as a leader in diverse teams, and in multidisciplinary settings.  |
| PO 10 | Communication:<br>Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |
| PO 11 | Project management and finance:<br>Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects in multidisciplinary environments.   |
| PO 12 | Life-long learning:<br>Recognize the need, do necessary preparation and ability to engage in independent and life-long learning in the broadest context of technological change.   |

| <b>PSO No</b> | <b>PROGRAMME SPECIFIC OUTCOMES (PSO)</b><br><b>CHEMICAL ENGINEERING</b>  |
|---------------|--|
| PSO 1         | Develop expertise in utilizing contemporary tools and technologies in cybersecurity to identify, analyze and mitigate threats, ensuring data integrity, confidentiality and availability of digital assets and systems.                        |
| PSO 2         | Design and implement secure information systems and policies, applying principles of cryptography, network security, and risk management to solve real-world cybersecurity challenges and enhance the security posture across various sectors. |
| PSO 3         | Prepare technically competent employee, researcher, entrepreneur, and excel in competitive exams, and increase passion for higher studies.   |

| <b>Credit Guidelines (General)</b>   |                  |               |                             |
|--|------------------|---------------|-----------------------------|
| <b>Component</b>   | <b>Hour/Week</b> | <b>Credit</b> | <b>Total Hours/Semester</b> |
| Theory   | 1                | 1             | 15                          |
| Practical  | 2                | 1             | 30                          |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the course:**

To help learners to

- outlining logarithm properties.
- implementing concepts of Determinants and Matrices for solving science and engineering problems.
- presenting usefulness of trigonometry.
- acquire knowledge of co-ordinate geometry and ability to work with applications to Engineering Mathematics.

**Course Content:**

| Section I  |  |       |                |
|------------|--|-------|----------------|
| Module No. | Content  | Hours | Weightage in % |
| 1.         | <b>Logarithm</b><br>Basic concept of logarithm, Rules and related examples, Applications of logarithm.   | 5     | 14             |
| 2.         | <b>Determinants and Matrices</b><br>Basic concept of determinants and matrices, Addition and subtraction, Product, Inverse up to 3X3 matrix, Solution of simultaneous equations up to three variables, Applications of determinants and matrices.                                      | 9     | 18             |
| 3.         | <b>Trigonometry</b><br>Basic concept of trigonometry, Units of angles (degree and radian), Allied & compound angles, Multiple-submultiples angles, Graph of sine and cosine, Periodic function, Sum and factor formulae, Inverse trigonometric function, Applications of trigonometry. | 9     | 18             |
| Section II |  |       |                |
| 4.         | <b>Co-ordinate geometry</b><br>Introduction, Point, Distance formula, Mid-point, Locus of a point, Straight lines, Slope of a line, Equation of a straight line, The general equation, Angle between two lines, Circle, Tangent and normal, Equation of tangent and normal.            | 6     | 15             |
| 5.         | <b>Vectors</b>   | 8     | 15             |

|    |  |   |    |
|----|--|---|----|
|    | Basic concept of vector and scalar, Addition and subtraction, Product of vectors, Geometric meaning of scalar and vector product, Angle between two vectors, Applications of dot and cross product, Work done and moment of force. |   |    |
| 6. | <b>Mensuration</b><br>Basic concept of Mensuration, Area of Triangle, Square, Rectangle, Trapezium, Parallelogram, Rhombus and Circle surface, Volume of Cuboids, Cone, Cylinder and Sphere.                                       | 8 | 20 |

#### List of Tutorials:

| Sr. No. | List of Tutorial            | Hours |
|---------|-----------------------------|-------|
| 1.      | Logarithm-1                 | 2     |
| 2.      | Logarithm-2                 | 2     |
| 3.      | Determinants and Matrices-1 | 2     |
| 4.      | Determinants and Matrices-2 | 2     |
| 5.      | Determinants and Matrices-3 | 2     |
| 6.      | Trigonometry-1              | 2     |
| 7.      | Trigonometry-2              | 2     |
| 8.      | Trigonometry-3              | 2     |
| 9.      | Co-ordinate geometry-1      | 2     |
| 10.     | Co-ordinate geometry-2      | 2     |
| 11.     | Vectors-1                   | 2     |
| 12.     | Vectors-2                   | 2     |
| 13.     | Mensuration-1               | 2     |
| 14.     | Mensuration-2               | 2     |
| 15.     | Mensuration-3               | 2     |

#### Text Book:

| Title   | Author(s)              | Publication                   |

| Engineering Mathematics - 3 <sup>rd</sup> Edition | Anthony croft & others | Pearson Education Publication |

#### Reference Book:

| Title   | Author(s)                  | Publication       |
|---|----------------------------|-------------------|
| Basic Mathematics   | G.C. Patel and Ami C. Shah | Atul Prakashan    |
| Applied Mathematics for Polytechnics - 10 <sup>th</sup> Edition | H. K. Dass                 | H. K. Dass        |
| Applied Mathematics   | W. R. Neelkanth            | Sapna Publication |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.

- End Semester Examination consists of 60 marks.

#### **Tutorial:**

- Continuous evaluation consists of performance of tutorial which will be evaluated out of 10 Marks for each tutorial and average of the same will be converted to 30 marks.
- MCQ based examination consists of 20 marks.

#### **Course Outcome(s):**

After the completion of the course, students will be able to:

|     |  |
|-----|--|
| C01 | Explain logarithmic properties and solve exponential expressions.                                |
| C02 | Demonstrate the ability to crack engineering related problems based on determinant and matrices. |
| C03 | Define properties of trigonometry and vectors in construction.                                   |
| C04 | Establish the knowledge of coordinate geometry, and ability to solve engineering problems.       |
| C05 | Explain the surface area and volume of different shapes and bodies.                              |

#### **Level of Bloom's Revised Bloom's Taxonomy in Assessment**

|             |               |           |
|-------------|---------------|-----------|

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the course:**

- The student will demonstrate the ability to think in core concept of their engineering application by studying various topics involved in branch specific applications.
- The student will demonstrate the ability to use appropriate mathematical techniques and concepts to obtain quantitative solutions to problems in physics.
- In courses involving laboratory, the student will demonstrate the ability to collect and analyze data and to prepare coherent reports of his or her findings.

**Course Content:**

| Section I  |   |       |                |
|------------|---|-------|----------------|
| Module No. | Content   | Hours | Weightage in % |
| 1.         | <b>SI Units &amp; Measurements:</b><br>Need of measurement and unit in engineering and science, Definition of unit and requirements of standard unit, Systems of units- CGS, MKS and SI, Fundamental and Derived quantities and their units, Least count and range of instrument, Vernier caliper, Micrometer screw gauge, Accuracy, Precision, Error and types of error, Estimation of errors - Absolute error, Relative error and Percentage error, Rules and identification of significant figures | 5     | 10             |
| 2.         | <b>Motion in a Plane:</b><br>Scalar and vector quantities, Position and displacement vectors, General vectors and their notations, Equality of vectors, multiplication of vectors by a real number, Addition and subtraction of vectors, Relative velocity, Unit vector, Resolution of a vector in a plane - rectangular components, Scalar and Vector product of vectors, Motion in a plane, Cases of uniform velocity and uniform acceleration-projectile motion, Uniform circular motion           | 6     | 15             |
| 3.         | <b>Force and Motion:</b><br>Recapitulation of equations of motion, Newton's 1st law of motion, Force, basic forces in motion, Gravitational force, Electrostatic force, Electromagnetic force, Nuclear force, Inertia, types of inertia,  | 6     | 15             |

|                   |   |   |    |
|-------------------|---|---|----|
|                   | Momentum and Newton's 2nd law of motion, Impulse of force, Impulse as the product of force and time, impulse as the difference of momentum, Newton's 3rd law of motion and its examples, Law of conservation of momentum  |   |    |
| 4.                | <b>Work, Energy and Power:</b><br>Work done by a constant force and a variable force, Kinetic energy, Work-energy theorem, Power, Notion of potential energy, Potential energy of a spring, Conservative forces, Conservation of mechanical energy (kinetic and potential energies), Non-conservative forces, Motion in a vertical circle, Elastic and inelastic collisions in one and two dimensions   | 5 | 10 |
| <b>Section II</b> |   |   |    |
| 5.                | <b>Mechanical Properties of Solids and fluids:</b><br>Deforming force, Restoring force, Elastic and plastic body, Stress and Strain with their types, Elastic limit, Hooke's law, Young's modulus, Bulk modulus, Modulus of rigidity and Relation between them (no derivation), Stress- Strain diagram, Yield point, Ultimate stress, Breaking stress, Factor of safety.<br>Pascal's law and its applications (hydraulic lift and hydraulic brakes), Effect of gravity on fluid pressure, Viscosity, Stokes' law, terminal velocity, streamline and turbulent flow, critical velocity, Bernoulli's theorem and its applications, Surface energy and surface tension, angle of contact | 8 | 20 |
| 6.                | <b>Heat Transfer:</b><br>Introduction to thermodynamics, Temperature and Heat, Transmission of heat - Conduction, Convection and Radiation, Good and bad conductor of heat with examples, Law of thermal conductivity, Coefficient of thermal conductivity and its S.I. unit Heat capacity and Specific heat of materials, Celsius, Fahrenheit and Kelvin temperature scales and their conversion formula   | 5 | 10 |
| 7.                | <b>Oscillations:</b><br>Periodic motion - time period, frequency, displacement as a function of time, Periodic functions, Simple harmonic motion (S.H.M) and its equation, Phase Oscillations of a spring-restoring force and force constant, Energy in S.H.M. Kinetic and potential energies, Simple pendulum derivation of expression for its time period, Free, forced and damped oscillations (qualitative ideas only), resonance   | 5 | 10 |
| 8.                | <b>Waves:</b><br>Wave motion, Transverse and longitudinal waves, Speed of wave motion, Displacement relation for a progressive wave, Principle of superposition of waves, Reflection of waves, Standing waves in strings and organ pipes, Fundamental mode and harmonics, Beats, Doppler effect   | 5 | 10 |

**List of Practical:**

| Sr. No. | List of Practical   | Hours |
|---------|---|-------|
| 1.      | To study about basic unit conversion and dimension analysis.  | 4     |
| 2.      | To measure length and diameter of the given object using Vernier callipers.   | 2     |
| 3.      | To measure the thickness of slit and diameter of wire with help of micrometer Screw Gauge.  | 2     |
| 4.      | To determine the surface tension of water by capillary rise method.   | 4     |
| 5.      | To Verify Ohm's Law by using an Ammeter & Voltmeter   | 2     |
| 6.      | To determine the wavelength of sound produced (i) in an air column and the velocity of sound in air at room temperature using a resonance column and a tuning fork. | 4     |
| 7.      | To determine Young's modulus of a material of a beam by the method of bending of a beam.  | 4     |
| 8.      | To determine the modulus of rigidity of the material of wire by dynamical method.   | 2     |
| 9.      | To determine the value of 'g' by using a Simple Pendulum.   | 2     |
| 10.     | Measurement of g: Use of a Kater's Pendulum.  | 2     |
| 11.     | To measure the temperature of given material by any temperature measuring instrument.   | 2     |

**Course Evaluation:****Theory:**

- Continuous Evaluation Consist of Two Test Each of 30 Marks and 1 Hour of duration.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination will consist of 60 Marks Exam.

**Practical:**

- Continuous Evaluation Consist of Performance of Practical which should be evaluated out of 10 for each practical in the next turn and average of the same will be converted to 10 Marks.
- Internal Viva component of 10 Marks.
- Practical performance/quiz/drawing/test of 20 Marks during End Semester Exam.
- Viva/Oral performance of 10 Marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|      |   |
|------|---|
| CO 1 | Identify physical quantities, unit systems and estimate measurements with accuracy by minimizing errors to solve real life measurements.  |
| CO 2 | Classify different types of motion, interpret the equation of motion and conservation law of momentum to describe motion of rocket, recoil of gun etc. derive relationships for work, energy and power and solve related problems.                    |
| CO 3 | Understand the concept of elasticity, it's types and articulate in engineering applications, especially in civil engineering. the knowledge is extended to explore the properties of fluids, construct the concepts of viscosity and surface tension. |
| CO 4 | Explain the basics of heat transfer and employ the knowledge of heat and thermodynamics in different engineering sectors especially mechanical and chemical.  |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

|             |               |           |
|-------------|---------------|-----------|
| 1: Remember | 2: Understand | 3: Apply  |
| 4: Analyze  | 5: Evaluate   | 6: Create |

| Module No | Content                         | RBT Level |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- acquire an inclusive knowledge of fundamental concept of Mechanical Engineering.
- understand working of simple mechanical devices.
- study and gain significance of Mechanical Engineering in various fields.
- read and interpret the building drawing
- select different types of construction materials as per requirements

**Course Content:**

| Section I  |  |       |                |
|------------|--|-------|----------------|
| Module No. | Content  | Hours | Weightage in % |
| 1.         | <b>Introduction of Mechanical Engineering:</b><br>Introduction, Scope, Importance, Basic terminologies in mechanical engineering, Basic mechanical components used in routine, Pipe and pipe fittings, Hand tools, Power tools   | 02    | 7              |
| 2.         | <b>Heat interactive equipment:</b><br>Heat transfer and its Modes, Boilers, Classification and Working, Concept of Accessories and Mountings - Types, Applications, Primemovers, Meaning, Classification, Steam turbine working, Layout of thermal power plant, Working and applications, Internal combustion engines - Definition, Classification, Components, Working of two-stroke and four-stroke engines, S.I. and C.I. engines | 04    | 13             |
| 3.         | <b>Power Transmission and Safety:</b><br>Power transmission: Importance, Modes, Types, Applications, Couplings in power transmission, Safety norms to be followed for preventing accidents.  | 03    | 10             |
| 4.         | <b>Hydraulic and pneumatic devices:</b><br>Concept of theory of fluid flow, general properties of fluid flow, Pumps,   | 03    | 10             |

|                   |   |    |    |
|-------------------|---|----|----|
|                   | Water turbines, and Air compressors – working principle, types, parts, performance, troubles and remedies, applications.  |    |    |
| 5.                | <b>Manufacturing processes:</b><br>Overview of manufacturing processes, Welding concept and overview, Types, Arc and Gas welding, Accessories and Consumables, Precautions and Safety during arc and gas welding, Casting - Introduction, Applications.                                     | 03 | 10 |
| <b>Section II</b> |   |    |    |
| 6.                | <b>Civil Engineering: An Overview</b><br>Introduction, Branches, Scope, Impact, Role of Civil Engineer, Unit of measurement, Unit conversion (Length, Area, Volume).  | 02 | 7  |
| 7.                | <b>Civil Engineering Surveying:</b><br>Surveying & leveling (its importance and types), Necessity for leveling, Principals of surveying, Instrument/tools used for survey and level, Various methods of finding the field survey measurements, Chain and Compass Survey                     | 05 | 17 |
| 8.                | <b>Civil Engineering Drawing:</b><br>Types of building drawings, Abbreviation, conventions & symbols in civil drawing, building byelaws for planning of residential building and industrial building, Planning of simple residential and industrial building                                | 04 | 13 |
| 9.                | <b>Construction Materials:</b><br>Common construction materials such as cement, Brick, Stone, Timber, Steel and Concrete, Properties of each materials & their acceptable standards, Quality parameters of materials, Estimations and costing for simple structure (only the material cost) | 04 | 13 |

#### List of Practical:

| Sr. No. | Details of Practical  | Hours |
|---------|---|-------|
| 1.      | Study of few selected boilers, accessories and mountings          | 02    |
| 2.      | Numerical based on heat interactive equipment                     | 02    |
| 3.      | Study of power and motion transmission systems                    | 04    |
| 4.      | Numerical based on power transmission and safety                  | 02    |
| 5.      | Study of various pumps  | 04    |
| 6.      | Numerical based on hydraulic and pneumatic devices                | 02    |
| 7.      | Study and demonstration of basic machine tools                    | 04    |
| 8.      | Numerical based on manufacturing processes                        | 02    |
| 9.      | Machine parameters of wheel and differential axel apparatus       | 04    |
| 10.     | Study and demonstration of basic mechanical equipment             | 04    |
| 11.     | Unit Conversation Exercise  | 02    |
| 12.     | Linear Measurement.   | 04    |
| 13.     | Angular Measurement (Prismatic Compass)                           | 04    |
| 14.     | Angular Measurement (Surveyor Compass)                            | 04    |
| 15.     | Determine R.L of given point by Dumpy level without change point. | 04    |
| 16.     | Determine R.L of given point by Dumpy level with change point.    | 04    |
| 17.     | Brick masonry bonds   | 04    |

|     |                       |    |
|-----|-----------------------|----|
| 18. | Aggregate experiments | 02 |
| 19. | Brick masonry tests   | 02 |

**Objective(s) of the Course:**

To help learners to

- Familiarize with components of computer and basic operations of it.
- Provide practical and hands-on experience of application used to create documents.
- Introduce internet and its usage.

**Course Content:**

| Section I  |   |       |               |
|------------|---|-------|---------------|
| Module No. | Content   | Hours | Weightage in% |
| 1.         | <b>Basics of Computer System</b><br>Introduction and Characteristics, Generation, Classification, Applications, describe computer hardware and software, Identify I/O, Devices, describe functioning of CU, ALU and memory unit, differentiate various types of printers, Demonstrate various file handling operations, Introduction to Memory, Memory hierarchy, Primary memory and its type, Secondary memory, Classification of Secondary memory, Cache Memory and Virtual Memory.   | 08    | 20            |
| 2.         | <b>Computer Software</b><br>Software concept Classification of Software, System software and Application Software, Overview of Operating System, Objectives and Functions of O.S, Types of Operating System, Batch Processing, Multiprogramming, Time Sharing OS, Features of DOS, Windows and UNIX, Programming Languages, Compiler, Interpreter, Computer Virus Different Types of computer virus, Detection and prevention of Virus Application of computers in different Domain. Installation of device drivers and other required software, need and method of backup. | 08    | 15            |
| 3.         | <b>Using MS-Word</b><br>Use basics text formatting features, manipulate text, use page  | 07    | 15            |

|                   |   |    |    |
|-------------------|---|----|----|
|                   | Setup features, use spell and grammar utility, Work with graphics/clipart, Create and manipulate table, use auto shapes and its formatting with text, Use Image and table formatting.   |    |    |
| <b>Section II</b> |   |    |    |
| 4.                | <b>Using MS-Excel</b><br>Use basic formatting and data entry features, use formula and functions, Work with graphics, Create and manipulate charts, Use header and footer options, Setup page layout and print worksheet  | 07 | 20 |
| 5.                | <b>Using MS - PowerPoint</b><br>Create new presentation and apply basic formatting features, use master slide, Create and manipulate table, Work with objects and clips, Work with video, Work with audio, use special effects, Use navigation and hyper linking, Custom Animation and Transitions  | 07 | 15 |
| 6.                | <b>Multi Media, Internet usage and Google Applications</b><br>Introduction of Multimedia, Types of Multimedia, and Use of Multimedia in various platforms, Describe Internet, WWW and Web Browsers: Web Browsing software, Surfing the Internet, Chatting on Internet, Basic of electronic mail, Using Emails, Document handling, Network definition, Common terminologies: LAN, WAN, Node, Host, Workstation, bandwidth, Network Components: Servers, Clients, Communication Media.<br>Introduction of Google Applications, Gmail, Google Drive, Docs, Spreadsheet | 08 | 15 |

**List of Practical(s):**

| <b>Sr.No</b> | <b>List of Practical</b>  | <b>Hours</b> |
|--------------|---|--------------|
| 1.           | Introduction to different hardware components of PC and Assembling of PC.   | 02           |
| 2.           | Installation of OS and other Software. Partitions of Drive, Compression Utilities: WinZip, Defragmenting Hard, Formatting Hard disk, etc.   | 04           |
| 3.           | Use accessories utilities of windows OS the User Interface, Using Mouse and Moving Icons on the screen, The My Computer Icon, The Recycle Bin, Status Bar, Start and Menu & Menu-selection, Running an Application, Windows Explorer Viewing of File, Folders and Directories, Creating and Renaming of files and folders, Opening and closing of different Windows, Control Panels, Setting the date and Sound, Create Users and password. | 02           |
| 4.           | Entering and editing text in document file. Apply formatting features on Text like Bold, Italics, Underline, font type, color and size, Apply features like bullet, numbering in Microsoft word.  | 04           |
| 5.           | Create and manipulate tables, create documents, insert images, format tables, Smart art, Chart in Microsoft word, Insert Hyperlink, Page number and textbox in word.  | 04           |
| 6.           | Create Event Registration Form and Resume in Microsoft word.  | 04           |
| 7.           | Entering and editing data in worksheet, Fill Series, fill with formatting and without formatting Using Microsoft Excel.   | 02           |
| 8.           | Create and manipulate Charts, Shape, Sparkline Charts, Clipart, and table.  | 04           |
| 9.           | Filter Data Using Filter and advanced filter function with more than 2 conditions,  | 02           |

|     |   |    |
|-----|---|----|
|     | Freeze row & Column in Microsoft Excel.   |    |
| 10. | Create Mark sheet, and Pay slips using Excel, Apply various formula and functions in the sheet.   | 06 |
| 11. | Print sheet using print area, Page setting, print titles, Adjusting margins, Page break, headers and footers.   | 02 |
| 12. | Basic operations of Power point, Create PPT and inset and delete slides in power point, Use of Master Slide in Presentation, Create Project presentations, Lecture presentations, Apply Custom animation & Transition. Apply basic formatting features in presentation like font, font size, font color, text fill, spacing and line spacing Formatting text boxes, word arts, styles bullet and numbering in Microsoft power point. Working with drawing tools, applying shape or picture styles, Applying object borders, object fill, object effects in Microsoft Power point. | 16 |
| 13. | Working with video, Link to video and sound files using power point.  | 02 |
| 14. | Internet Searching, Browsers, Various functions of Browsers (Eg. Bookmark, Customize Settings), Study of components like switches, bridges, routers, Wi-Fi router,  | 02 |
| 15. | Introduction of Google application, Compose Gmail, File attachment, add signature.  | 02 |
| 16. | Demonstration of Google drive, Sharing File Using Google drive, Spreadsheet, Docs and Google slides   | 02 |

#### Course Evaluation:

##### Theory

- Continuous Evaluation Consist of two Tests of 30 Marks and 1 Hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the Course Coordinator.
- End Semester Examination will consist of 60 Marks Exam.

##### Practical

- Continuous Evaluation Consist of Performance of Practical which should be evaluated out of 10 for each practical in the next turn and average of the same will be converted to 20 Marks.
- Internal Viva component of 20 Marks.
- Practical performance/quiz/test of 30 Marks during End Semester Exam.
- Viva/Oral performance of 30 Marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|      |   |
|------|---|
| CO 1 | Identify the components of a computer system and demonstrate basic proficiency in commonly used applications.   |
| CO 2 | Analyze, synthesize and evaluate school, work or home situations and use application software to complete information processing tasks efficiently and effectively. |
| CO 3 | Apply the concepts of microsoft office – word, excel, and power point to produce professional documentation and presentation.                                       |
| CO 4 | Access the internet and learn to use the browse, search and hyperlink capabilities of web browsers.   |
| CO 5 | Identify the significance of multimedia and its utilization in various platforms.   |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand basic know-how of various hand tools and their use in different sections of manufacturing
- Understand the use of workshop practices in day to day industrial as well domestic life that help to dissolve the routine problems
- Build the understanding of the complexity of the industrial job, along with time and skills requirements of the job
- Learn about the safety measures to be taken while working in workshop.
- Learn about operation wise tool selection.

**Course Content:**

| Section I  |   |       |
|------------|---|-------|
| Module No. | Content   | Hours |
| 1.         | <b>Introduction and Demonstration of Safety Norms and various shops:</b><br>Introduction to various shops / sections and workshop layouts, Safety norms to be followed in a workshop. | -     |
| 2.         | <b>Fitting shop:</b><br>Introduction of fitting shop, Safety, Making a job as per drawing including marking and performing other operations   | -     |
| 3.         | <b>Carpentry shop:</b><br>Introduction of carpentry shop, Safety, Making a job as per drawing including marking and performing other operations                                       | -     |
| 4.         | <b>Smithy shop:</b><br>Introduction of smithy shop, Safety, Making a job as per drawing including marking and performing other operations   | -     |

| Section II |   |   |
|------------|---|---|
| 5.         | <b>Sheet metal shop:</b><br>Introduction of sheet metal shop, Safety, Making a job as per drawing including marking and performing other operations |   |
| 6.         | <b>Pipe fitting:</b><br>Introduction of pipe fitting shop, Safety, understanding various pipe fitting tools and performing operations               | - |
| 7.         | <b>Machine Shop:</b><br>Introduction and demonstration of various machines like Lathe, Drilling, Grinding, Hack Saw Cutting etc.                    | - |

#### List of Practical:

| Sr. No. | List of Practical   | Hours |
|---------|---|-------|
| 1.      | Introduction and Demonstration of Safety Norms and various shops. | 02    |
| 2.      | To Perform a Job of Fitting Shop.                                 | 04    |
| 3.      | To Perform a Job of Carpentry Shop.                               | 06    |
| 4.      | To Perform a Job of Black Smithy shop.                            | 06    |
| 5.      | To Perform a Job of Sheet metal Shop.                             | 04    |
| 6.      | To Perform a Job of Plumbing Shop                                 | 04    |
| 7.      | Introduction to Machine Tool                                      | 04    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- hone English Grammar to use language effectively in everyday life.
- use tenses to
- build vocabulary.
- understand and use Sentence formation and types.
- use comparative degree to express comparison.
- create sentence in active-passive voice.

**Course Content:**

| Section I  |   |       |                |
|------------|---|-------|----------------|

**Objective(s) of the course:**

To help learners to

- Give a comprehensive coverage at an introductory level to the subject of Functions and Limits, Differentiation, Integration and First Order Differential Equations.
- Recognize importance of differentiation and integration for solving engineering problems.

**Course Content:**

| Section I  |  |       |               |
|------------|--|-------|---------------|
| Module No. | Content  | Hours | Weightage in% |
| 1.         | <b>Function and Limits</b><br>Introduction, Function, Types of function, Classification of function, Limit of a function, Properties of limit, Standard limits, limit of trigonometric functions.  | 5     | 14            |
| 2.         | <b>Differentiation</b><br>Introduction, Differentiation, Geometric meaning, Derivative using first principle, Derivative of standard functions, Working rules, Differentiation of composite function, Differentiation of parametric functions, Differentiation of implicit function, Derivative using logarithms, Successive differentiation, Applications of differentiation (Velocity, Acceleration, Maxima & Minima simple problems). | 9     | 18            |
| 3.         | <b>Integration</b><br>Introduction, Integration of standard functions, Integration by substitution, Integration by parts, Integration using partial fraction, Definite integrals, Theorem on definite integrals, Applications of Integration (Area and Volume simple problems).  | 9     | 18            |
| Section II |  |       |               |
| 4.         | <b>Differential Equations of First order and First degree</b>  | 9     | 18            |

|    |  |   |    |
|----|--|---|----|
|    | Introduction, Formation of differential equations, Solution of differential equations, Separation of variables, Homogeneous equations, Exact Differential Equations, Integrating factor method, Linear differential equation.          |   |    |
| 5. | <b>Complex Number</b><br>Introduction, Mathematical Operations, Polar form, Modulus, Amplitude Form, De Moivre's Theorem.  | 6 | 18 |
| 6. | <b>Statistics</b><br>Introduction, Central tendency, Mean, Mean of discrete observations, Mean of grouped data, Step deviation method, Median, Median for grouped data, Mode, Standard deviation, Standard deviation for Grouped data. | 7 | 14 |

**List of Tutorials:**

| Sr.No. | List of Tutorial   | Hours |
|--------|--|-------|
| 1.     | Functions and Limits-1                                   | 2     |
| 2.     | Functions and Limits-2                                   | 2     |
| 3.     | Differentiation-1  | 2     |
| 4.     | Differentiation-2  | 2     |
| 5.     | Differentiation-3  | 2     |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests, each of 30 marks and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guide lines provided by the Course Coordinator.
- End Semester Examination consists of 60 marks.

**Tutorial:**

- Continuous evaluation consists of performance of tutorial which will be evaluated out of 10 Marks for each tutorial and average of the same will be converted to 30 marks.
- MCQ based examination consists of 20 marks.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|     |   |
|-----|---|
| C01 | Apply differentiation and integration for solving engineering problems.                             |
| C02 | Implementing statistical methods for solving real world problems.                                   |
| C03 | Develop the ability to apply differentiation to significant applied problems.                       |
| C04 | Estimate the limiting value of algebraic and trigonometric functions.                               |
| C05 | Represent complex numbers algebraically and geometrically for solving engineering related problems. |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- The student will understand the interdisciplinary nature of chemistry and to integrate knowledge of mathematics, physics and other disciplines to a wide variety of chemical problems.
- The student will understand the importance of the Periodic Table of the Elements, how it came to be, and its role in organizing chemical information.
- The student will acquire a foundation of chemistry of sufficient breadth and depth.

**Course Content:**

| Section I   |  |       |                |
|-------------|--|-------|----------------|
| Module. No. | Content  | Hours | Weightage in % |
| 1.          | <b>Atomic Structure, Molecular Mass, Acids and Bases</b><br>Atom Definition Fundamental particles of Atom their Mass, Charge and Location. Atomic number and Mass number, Definition Isotopes and Isobars with suitable examples. Formation of cation and anion by electronic concept of oxidation and reduction.                          | 05    | 15             |
| 2.          | <b>Molecular Mass</b><br>Molecule, Molecular Formula, Molecular Mass, Mole, Definition Simple calculations. Avogadro's Hypothesis – Relationship between Molecular Mass and vapour Density, Avogadro Number.   | 05    | 10             |
| 3.          | <b>Chemical Bonding and Structure of Molecules</b><br>Chemical Bond, Valence, Valence Electrons, Bonding and Non Bonding Electrons, Lewis Symbols, Octet Rule. Definition, Condition for Formation of Ionic Bond, Factors Governing Formation of Ionic Bond, Metallic Bond, Covalent Bond and Co-ordinate Covalent Bond: Hydrogen Bonding, | 06    | 15             |
| 4.          | <b>Acids and Bases</b><br>Theories of Acids and Bases, Arrhenius Theory, Lowry – Bronsted Theory, Lewis Theory, Advantages of Lewis Theory, pH and pOH Definition, Numerical problems, Indicator, Definition and Examples,   | 06    | 10             |

|                   |  |    |    |
|-------------------|--|----|----|
|                   | Buffer solution, Definition, Types of buffer solution with examples, Application of pH in Industries.  |    |    |
| <b>Section II</b> |  |    |    |
| 1.                | <b>Solutions</b><br>Definition, Methods of expressing concentration of a solution<br>Molarity, Molality, Normality, Mole fraction and Percentage Mass – Simple problems.   | 05 | 10 |
| 2.                | <b>Colloids</b><br>True solution and Colloidal solution, Definition, Differences, Types of colloids – Lyophilic and Lyophobic colloids. Differences Properties, Tyndall effect, Brownian movement, Electrophoresis and Coagulation. Industrial applications of colloids, Smoke Precipitation by Cottrell's method, Purification of water, Cleansing action of soap, Tanning of leather and Sewage disposal.        | 06 | 15 |
| 3.                | <b>Electrochemistry</b><br>Electrolyte definition, Strong and Weak electrolytes, Examples. Electrolysis definition, Mechanism, Industrial application of Electrolysis, Electroplating, Preparation of surface, Process Factors affecting the stability of the coating, Chrome plating, Electroless plating definition, Advantages of Electroless plating over electroplating, Applications of Electroless plating. | 06 | 15 |
| 4.                | <b>Electrochemical-Cell</b><br>Electrochemical Cell definition, Representation of a Cell, Single Electrode Potential definition, Galvanic Cell, Formation of Daniel Cell, Electrochemical Series, Definition and Significance, Electrolytic Concentration Cell definition and Formation.   | 06 | 10 |

#### List of Practical

| Sr No | Name of Practical/Tutorial  | Hours |
|-------|---|-------|
| 1.    | Using a chemical balance.   | 02    |
| 2.    | Introduction to chemistry laboratory – Molarity, Normality, Primary, Secondary standard solutions, Volumetric titrations, Quantitative analysis, Quantitative analysis etc. | 04    |
| 3.    | Demonstration: Preparation of solutions of different concentrations   | 04    |
| 4.    | Preparation of standard solution of Oxalic acid.  | 04    |
| 5.    | Preparation of standard solution of Sodium Carbonate.   | 04    |
| 6.    | Determination of strength of a given solution of Sodium Hydroxide by titrating it against standard solution of Oxalic acid.   | 04    |
| 7.    | Determination of strength of a given solution of Hydrochloric acid by titrating it against standard Sodium Carbonate solution.  | 04    |
| 8.    | Determination of temporary and permanent hardness in water sample using EDTA as standard solution.  | 02    |
| 9.    | Conduct metric titration of strong acid vs. strong base   | 02    |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of Practical which should be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 marks.
- Practical performance/quiz/drawing/test of 15 marks during End Semester Exam.
- Viva/Oral presentation consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|     |  |
|-----|--|
| CO1 | Implement and evaluate quality control procedures.                 |
| CO2 | Perform and validate laboratory procedures to conduct tests.       |
| CO3 | Improve industrial or chemical processes and laboratory equipment. |
| CO4 | Prepare and purify compounds using standard chemical procedure     |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand different types of forces, systematic evaluation of effect of these forces, behavior of rigid and deformable bodies subjected to various types of forces, at the state of rest or motion of the particles.
- Understand behavior of structural element under the influence of various loads.

**Course Content:**

| Section I  |   |       |               |
|------------|---|-------|---------------|
| Module No. | Content   | Hours | Weightage in% |
| 1.         | <b>Introduction Engineering Mechanics</b><br>Basic concepts: Definitions, Basic assumptions, Scalar & Vector quantities, Free, Forced and fixed vectors, Force System: Force, Classification & Representation,  | 02    | 10            |
| 2.         | <b>Coplanar Concurrent Force system</b><br>Force as a Vector, Composition of forces, Parallelogram Law, Resolution, Principle of Transmissibility of forces, Resultant of coplanar force system, Equilibrium of coplanar force system, Free body diagrams, Determination of reactions, Equilibrium of a body under three forces, Lami's theorem | 09    | 20            |
| 3.         | <b>Coplanar Non-Concurrent force systems:</b><br>Moment of a force, Vector representation, Moment for coplanar force system, Varignon's theorem, Couple, Vector representation, Resolution of a force into a force and a couple, force Systems: Coplanar Concurrent Force system and Coplanar Non-Concurrent force system.                      | 09    | 20            |

#### Course Evaluation:

##### Theory:

- Continuous evaluation consists of two test each of 15 marks and 1 hour of duration.
- Submission of assignment which consists of solving 20 numerical and it carries 10 marks of evaluation.
- End semester examination will consist of 60 marks exam.

**Practical:**

- Continuous Evaluation consists of performance of practical which should be evaluated out of 10marks for each practical and average of the same will be converted to 10 marks.
- Internal viva consists of 10 marks.
- Practical performance/quiz/drawing/test consists of 15marks during End Semester Exam.
- Viva/Oral performance consists of 15marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|      |   |
|------|---|
| CO 1 | Identify fundamental principles of mechanics, equilibrium, statics reactions and internal forces in statically determinate beams.         |
| CO 2 | Understand the basics of friction and its importance.   |
| CO 3 | Apply principles of statics to determine c.g and m.i of a different geometrical shape.  |
| CO 4 | Analyse problems and solve the problem related to mechanical elements and analyse the deformation behaviour for different types of loads. |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Develop understanding of basic concepts that can be used in programming language.
- Develop the algorithm as well as flow chart for particular problem.
- Enforce logical thinking.
- Understand the fundamentals of programming concepts and methodology.

?

**Course Content:**

| Section I  |  |       |               |
|------------|--|-------|---------------|
| Module No. | Content  | Hours | Weightage in% |
| 1.         | <b>Introduction to Programming Language</b><br>Classification of Programming Languages, Generations of Programming Languages-Machine Language, Assembly Language, High-Level Language, 4GL.  | 04    | 10            |
| 2.         | <b>Introduction to C, Constants, Variables and Data Types:</b><br>Features of C Language, the Structure of C Program, Flow Charts and Algorithms Types of Errors, Debugging, Tracing the Execution of the Program, Watching Variables Values in Memory. Character Set, C Tokens, Key word and Identifiers, Constants and Variables, Data Types Declaration and Initialization, User Define Type Declarations –Type of Enum, Basic Input, and Output Operations, Symbolic Constants, Overflow and Under flow of Data. | 08    | 18            |
| 3.         | <b>Operators, Expressions, and Managing I/O Operations:</b><br>Introduction to Operators and its Types, Evaluation of Expressions, Precedence of Arithmetic Operators, Type Conversions in Expressions, Operator Precedence and Associativity. Introduction to Reading a Character, Writing a Character, Formatted Input and Output.   | 06    | 15            |
| Section II |  |       |               |

|    |   |    |    |
|----|---|----|----|
| 4. | <b>Conditional Statements:</b><br>Decision Making & Branching: Decision Making with If and If – else Statements, Nesting of If-else Statements, The Switch and go-to statements, Ternary (?:) Operator. Looping: The while Statement, The Break Statement & The Do. While loop, The FOR loop, Jump Within loops-Programs. | 07 | 15 |
| 5. | <b>Arrays:</b><br>Introduction, One-dimensional Arrays, Two-dimensional Arrays, Concept of Multidimensional Arrays.   | 07 | 14 |
| 6. | <b>Strings:</b><br>Declaring and Initializing String Variables, Arithmetic Operations on Characters, Putting Strings Together, Comparison of Two Strings, String Handling Functions.  | 06 | 14 |
| 7. | <b>User-Defined Functions:</b><br>Concepts of User-defined Functions, Prototypes, function Definition, Parameters, Parameter Passing, Calling a Function, Recursive Function, Macros and Macro Substitution   | 07 | 14 |

**List of Practical:**

| Sr.No | List of Practical   | Hours |
|-------|---|-------|
| 1.    | Introduction to C programming environment, compiler, Linker, loader, and editor. C Program to display “HELLOPPSU”                                 | 04    |
| 2.    | Working with basic elements of C languages (different input functions, different output functions, different data types, and different operators) | 08    |
| 3.    | Working with C control structures (if statement, if-else statement, nested if-else Statement, switch statement, break statement, go to statement) | 10    |
| 4.    | Working with C looping constructs (for loop, while loop, do-while and nested For loop)  | 10    |
| 5.    | Working with the array in C (1-D array, and 2-D array)  | 08    |
| 6.    | Working with strings in C (input, output, different string in built functions)  | 08    |
| 7.    | Working with user-defined functions in C (function with/without return type, Function with/without argument, function and array)                  | 08    |
| 8.    | Working with recursive function in C  | 04    |

- <https://www.youtube.com/watch?v=3QiltmIWmOM>

**Course Evaluation:****Theory:**

- Continuous evaluation consists of two test search of 15marks and 1 hour of duration.
- Submission of assignment which consists of solving 20 numerical and it carried 10 marks of evaluation.
- End semester examination will consist of 60 marks exam.

**Practical:**

- Continuous Evaluation consists of performance of practical which should be evaluated out of 10marks for each practical and average of the same will be converted to 10 marks.
- Internal viva consists of 10 marks.
- Practical performance/quiz/drawing/test consists of 15marks during End Semester Exam.
- Viva/Oral performance consists of 15marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|      |  |
|------|--|
| CO 1 | Infer the basic concepts of data representation, algorithms and coding methods in computer system. |
| CO 2 | Interpret the knowledge about c programming syntax.  |
| CO 3 | Apply basic principles of imperative and structural programming to solve complex problems.         |
| CO 4 | Design, develop and debug programs of c programming language.                                      |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

|             |               |           |
|-------------|---------------|-----------|
| 1: Remember | 2: Understand | 3: Apply  |
| 4: Analyze  | 5: Evaluate   | 6: Create |

| Module No | Content   | RBT Level |
|-----------|---|-----------|
| 1         | Introduction to Programming Language                    | 1, 2      |
| 2         | Introduction to C, Constants, Variables and Data Types: | 1, 2, 3   |
| 3         | Operators, Expressions, and Managing I/O Operations     | 2,3,4,6   |
| 4         | Conditional Statements                                  | 2,4,5     |
| 5         | Arrays  | 2, 4,6    |
| 6         | Strings   | 2, 4,6    |
| 7         | User-Defined Functions                                  | 2,4,6     |

**P P Savani University**  
**Institute of Diploma Studies**

**Department of Science & Humanities**

Course Code: IDSH1060

Course Name: Electrical & Electronics Workshop

Prerequisite Course(s): Concept of Science up to 9<sup>th</sup> Standard

**Teaching & Examination Scheme**

| Teaching Scheme(Hours/Week) |           |          |        | Examination Scheme(Marks) |     |           |     |          |     |       |

| Theory                      | Practical | Tutorial | Credit | Theory                    |     | Practical |     | Tutorial |     | Total |
|                             |           |          |        | CE                        | ESE | CE        | ESE | CE       | ESE |       |
| 0                           | 2         | 0        | 1      | 00                        | 00  | 20        | 30  | 0        | 0   | 50    |

**Objective(s) of the course:**

To help learner to

- Think in core concept of their engineering application by studying various topics involved in branch specific applications.
- Identify basic fundamental electronic components in circuits.
- Learn to use common electronic component to bread board.
- Understand component instruments, terminology and applications.
- Demonstrate the ability to collect and analyze data and to prepare coherent reports of his/her findings.

| Sr.No. | List of Practical   | Hours |
|--------|---|-------|
| 1      | To Understand & Draw the symbols of various electronic devices.         | 2     |
| 2      | To identify resistors, capacitors using Different codes.                | 2     |
| 3      | Verification of Truth table of Logic Gates(NAND,NOR,EX-OR,AND,OR, NOT). | 4     |
| 4      | To study cathode ray oscilloscope and perform measurements.             | 4     |
| 5      | To study digital multi-meter and perform testing of various components. | 2     |
| 6      | To study soldering-de-soldering techniques.                             | 2     |
| 7      | To study wiring diagram of ceiling Fan.                                 | 2     |
| 8      | How Fluorescent Lights Work.  | 2     |
| 9      | To study about staircase wiring two-way switch.                         | 2     |
| 10     | Explaining the function of Refrigerator and Air conditioner.            | 4     |
| 11     | Explaining the core concept of power transmission.                      | 4     |

**Evaluation:**

- Continuous Evaluation consists of performance of practical which will be evaluated out of 10 Marks for each practical and average of the same will be converted to 20 marks.
- Internal viva consists of 30 marks.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|      |  |
|------|--|
| CO 1 | Identify the ability to design various electronic circuit on a bread board     |
| CO 2 | Recognize the basic electronic devices and components in a circuit connection. |
| CO 3 | Identify the ability to design a PCB.  |
| CO 4 | Define the practical side of basic physics laws.                               |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to:

- Understand difference between formal and functional English.
- Use English in daily life.
- Communicate thoughts.
- Be an efficient Listener.
- Be an efficient speaker.
- Sharpen reading skills.
- Improve writing skills.

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests each of 25 marks. Test one can be based on Reading and Writing Skills whereas Test Two can be based on Listening and Reading Skills.
- End Semester Examination consists of 60 marks.

##### Course Outcome(s):

After completion of the course, the student will be able to

|       |  |
|-------|--|
| CO 1  | Narrate incidents, events, experiences.                                    |
| CO 2  | Recognize the difference between formal and functional English.            |
| CO 3  | Comprehend authentic material.   |
| CO 4  | Define the need of Communication Skills in personal and professional life. |
| CO 5  | Introduce them and talk about family efficiently.                          |
| CO 6  | Identify their likes, dislikes, desires effectively.                       |
| CO 8  | Practice scanning and skimming.  |
| CO 9  | Use punctuations accurately while writing.                                 |
| CO 10 | Recall listening skills.   |
| CO 11 | Draft paragraphs, and letters.   |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- The student will understand the type of fluids
- The student will understand the flow of fluids

**Course Content:**

| Section I   |  |       |                |
|-------------|--|-------|----------------|
| Module. No. | Content  | Hours | Weightage in % |
| 1.          | <b>Introduction to fluids</b><br>Properties of fluids- Density and viscosity (absolute and kinematic), Vapour pressure and surface tension, cohesion and adhesion, Principle of Hydrostatic Equilibrium Manometers-Types of Manometers (U, Inclined, Differential), Equations, Uses<br>Types of Fluids- Ideal and Actual fluids, Compressible and Incompressible Fluids, Newtonian and Non-Newtonian fluids including time dependent and time independent fluids.  | 05    | 15             |
| 2.          | <b>Flow of Fluids (Incompressible)</b><br>Fluid flow, stream line flow, steady and unsteady state flow, uniform and non uniform flow, rotational and irrotational flow. Equation of continuity, Calculation of mass flow rate, volumetric flow rate, average velocity and mass velocity. Bernoulli's Theorem by Euler's equation and its application, Bernoulli's equation for ideal fluid, actual fluid and with pump work done. Correction in Bernoulli's equation.  | 05    | 20             |
| Section II  |  |       |                |
| 3.          | <b>Measurement of flow</b><br>Measurement of fluid flow with the help of flow meters- Venturimeter: Construction Principle, Working, Coefficient of discharge, Calibration, Derivation, Orifice meter: Construction, principle, Working, Coefficient of discharge, Calibration, Derivation for calculating the flow rates, Rota meter: construction, principle working and Calibration, Pitot tube: Construction, Principle and Working. Nozzle meter: construction, principal working, derivation for calculating flow rates. | 05    | 15             |

|    |  |    |    |
|----|--|----|----|
| 4. | <b>Pipe, fitting and valves</b><br>Standard sizes of pipes, wall thickness, Schedule number, BWG Number Joints and fittings, Gate valve, Globe valve, Ball valve, Needle valve, Non return valve, Butterfly valve, Diaphragm valve   | 05 | 10 |
| 5. | <b>Transportation of Fluids</b><br>Pumps-Centrifugal Pump: Parts of centrifugal pump, working of Centrifugal pump, Performance of centrifugal pump (Characteristics of centrifugal pump), Characteristics curves, priming, Developed Head, Cavitation, Net Positive  | 05 | 25 |
| 6. | <b>Pump types</b><br>Suction Head (NPSH) Priming. Positive displacement reciprocating pumps based on pressure component and based on action of piston/plunger, their construction & working, Gear pump, its construction and working, Diaphragm pump, its utility, construction and working, Screw pump, characteristic curve of pump. | 05 | 15 |

#### List of Practical

| Sr No | Name of Practical/Tutorial   | Hours |
|-------|--|-------|
| 10.   | Determination of coefficient of discharge of venture meter and plot a calibration curve  | 02    |
| 11.   | Determination of coefficient of discharge of orifice meter & plot a calibration curve  | 08    |
| 12.   | To calibrate a rotameter for different liquids and plot the calibration curve.   | 08    |
| 13.   | To perform experiment on Bernoulli's Theorem and prove that the summation of pressure head, kinetic head and potential head is constant. | 08    |
| 14.   | Determination of equivalent length of pipe fittings  | 08    |
| 15.   | To plot characteristics curves of centrifugal pump   | 08    |
| 16.   | To measure the viscosity of different liquids (Ostwald's Viscometer or Redwood Viscometer)   | 08    |
| 17.   | To measure the flow rate of gases using flow meter.  | 08    |
| 18.   | To measure the major and minor losses in pipes.  | 02    |

#### Text Book(s):

| Title                                   | Author/s             | Publication    |
|---|----------------------|----------------|
| Unit Operations of Chemical Engineering | McCabe, Smith.       | McGraw Hill    |
| Chemical Engineering Volume-1           | Richardson & Coulson | Pergamon Press |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of Practical which should be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 marks.
- Practical performance/quiz/drawing/test of 15 marks during End Semester Exam.
- Viva/Oral presentation consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|     |   |
|-----|---|
| CO1 | Identify fluid properties and memorize the concepts of pressure   |
| CO2 | Classify different types of fluid and generalize the concepts of boundary layer and its estimation in different flows                   |
| CO3 | Apply and demonstrate the basic equations of fluid flow.  |
| CO4 | Evaluate and compare the performance of various fluid flowing machinery i.e pumps and compressor and metering devices i.e. flow meters. |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

|             |               |           |
|-------------|---------------|-----------|
| 1: Remember | 2: Understand | 3: Apply  |
| 4: Analyze  | 5: Evaluate   | 6: Create |

| Module No | Content                         | RBT Level |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- It is expected that this course will lay the foundation of basic knowledge and calculation skills that is frequently used in subsequent chemical engineering courses as well as professional life

**Course Content:**

| Section I   |  |       |                |
|-------------|--|-------|----------------|
| Module. No. | Content  | Hours | Weightage in % |
| 1.          | <b>Unit Systems:</b><br>Introduction to process calculation, dimensions and systems of units, fundamental quantities of units, derived quantities, definition and units of force, volume, pressure, work, energy, power, heat, unit conversions in FPS, MKS and SI systems   | 03    | 10             |
| 2.          | <b>Basic Chemical Calculations:</b><br>Definition and calculations of mole, atomic weight, molecular weight, equivalent weight, specific gravity and API gravity. Composition of solid, liquid by weight % and mole %, morality, normality, morality, gm/lit.  | 04    | 15             |
| 3.          | <b>Ideal gas law:</b><br>Concept of ideal gas, derivation of ideal gas law, definition of STP and NTP, Dalton's law and Amagat's law, derive relation between mole%, volume% and pressure% of ideal gases, calculation of average molecular weight, density, mole%, weight % in gas mixture in SI/MKS systems.   | 03    | 15             |
| Section II  |  |       |                |
| 4.          | <b>Material Balance in Processes Without Chemical Reactions:</b><br>Law of conversation of mass, brief description and simple material balance calculation of drying, distillation, absorption, mixing, crystallization, evaporation, single stage material balance calculation of leaching and extraction, brief idea regarding recycling and by-passing operation. | 06    | 15             |
| 5.          | <b>Material Balance in Processes Involving Chemical</b>  | 05    | 15             |

|    |   |    |    |
|----|---|----|----|
|    | <b>Reactions:</b><br>Definition: Limiting reactant, excess reactant, conversion, yield and selectivity, simple numerical for finding yield, conversion and composition, simple calculation of material balance based on reaction.   |    |    |
| 6. | <b>Energy Balance:</b><br>Heat capacity and specific heat, mean heat capacity of gases, heat capacity of gas mixture and liquid mixture, calculations of heat capacity by integral equation up to three terms, brief explanation of sensible heat and latent heat of fusion, sublimation, vaporization, calculations of standard heat of formation from heat of combustion data, calculations for heat of reaction from heat of formation and heat of combustion data | 05 | 20 |
| 7. | <b>Combustion:</b><br>Introduction of combustion, types of fuels, calorific values of fuels, proximate and ultimate analysis of solid fuel, numerical related to calorific values of fuel from composition, numerical related to air, requirement and composition of flue gases.  | 04 | 10 |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests of 30 marks each and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty Evaluation consists of 10 marks as per the guidelines provided by Course Coordinator.
- End Semester Examination consists of 60 marks.

#### Course Outcome(s):

After the completion of the course, students will be able to:

|     |  |
|-----|--|
| CO1 | Discriminate the material balance of various process streams.                            |
| CO2 | Estimate the heat balance of various process streams.                                    |
| CO3 | Assess the heat balance of various process streams.                                      |
| CO4 | Appraise the various properties like temperature, pressure, heat, mass, calorific value. |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- The student will understand the type of chemical processes
- The student will understand the basics of chemical process industries

**Course Content:**

| Section I   |   |       |                |
|-------------|---|-------|----------------|
| Module. No. | Content   | Hours | Weightage in % |
| 1.          | <b>Introduction</b><br>Introduction of Chemical process industries with reference to Indian resources, trade and export potential. Process symbols used for various equipment, Uses of different process equipment  | 05    | 15             |
| 2.          | <b>Sugar Industry</b><br>Manufacturer of cane sugar, Various engineering problems encountered in sugar industry, Pollution abatement in sugar industry  | 05    | 20             |
| 3.          | <b>Fermentation Industry</b><br>Introduction of fermentation industry, Types of fermentation processes, Production of ethyl alcohol by fermentation, Industrial alcohol, manufacture of industrial alcohol-beers, wines and liquors   | 05    | 15             |
| Section II  |   |       |                |
| 4.          | <b>Soaps and Detergent Industry</b><br>Manufacturing of soap, glycerin as by products from soap<br>Manufacturing of detergents (including raw material and manufacturing process), Manufacturing of House disinfectants<br>Various engineering problems encountered in soaps and detergent industry | 05    | 10             |
| 5.          | <b>Pulp and Paper Industry</b><br>Different pulping process, Manufacturing of paper, Role of additives, Various engineering problems encountered in paper   | 05    | 25             |

|    |  |    |    |
|----|--|----|----|
|    | industry. Pollution abatement in pulp and paper industry.  |    |    |
| 6. | <b>Polymer Industry</b><br>Types of polymer, polymerization process, manufacture of polyethylene, styrene nylon6, nylon 66, rayon. Manufacture of rubber | 05 | 15 |

#### List of Practical

| Sr No | Name of Practical/Tutorial   | Hours |
|-------|--|-------|
| 1     | Preparation of Phenyl (domestic disinfectant)                        | 06    |
| 2     | Preparation of Soap by Coconut Oil                                   | 08    |
| 3     | Preparation of Soap by mustard oil                                   | 08    |
| 4     | Preparation of Detergent/liquid detergent                            | 08    |
| 5     | Atmospheric distillation of petroleum fraction analysis to petroleum | 08    |
| 6     | Preparation of polymer by Bulk Polymerization.                       | 08    |
| 7     | Preparation of Thermo Plastics PMMA                                  | 08    |
| 8     | Preparation of phenyl formaldehyde Resin                             | 06    |

#### Text Book(s):

| Title               | Author/s      | Publication           |
|---------------------|---------------|-----------------------|
| Chemical Technology | M. Gopala Rao | East west publication |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

##### Practical:

- Continuous Evaluation consists of performance of Practical which should be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 marks.
- Practical performance/quiz/drawing/test of 15 marks during End Semester Exam.
- Viva/Oral presentation consists of 15 marks during End Semester Exam.

##### Course Outcome(s):

After the completion of the course, students will be able to:

|     |   |
|-----|---|
| CO1 | Identify and describe basic equipment used in process industries.                                   |
| CO2 | Explain the basic process industry drawings.  |
| CO3 | Demonstrate the ability to apply basic concepts of chemistry and physics within process industries. |
| CO4 | Correlate the importance of quality, safety, health and environment to the process industry.        |

#### Level of Bloom's Revised Bloom's Taxonomy in Assessment

|             |               |           |
|-------------|---------------|-----------|
| 1: Remember | 2: Understand | 3: Apply  |
| 4: Analyze  | 5: Evaluate   | 6: Create |

| <b>Module No</b> | <b>Content</b>               | <b>RBT Level</b> |
|------------------|------------------------------|------------------|
| 1                | Introduction                 | 1                |
| 2                | Sugar Industry               | 2,3              |
| 3                | Fermentation Industry        | 2,3,4,           |
| 4                | Soaps and Detergent Industry | 3,5,6            |
| 5                | Pulp and Paper Industry      | 3,5,6            |
| 6                | Polymer Industry             | 3,5,6            |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- knowledge of different types of pollution caused due to industrialization.
- Know various types of accidents which occur in chemical plants and how to safeguard them to avoid injury to men and material.

**Course Content:**

| Section I   |   |       |                |
|-------------|---|-------|----------------|
| Module. No. | Content   | Hours | Weightage in % |
| 1.          | <b>General Introduction &amp; Concept of Safety:</b><br>Safety of organization, Safety measures Concept & Importance of safety in chemical industries.  | 01    | 10             |
| 2.          | <b>Chemical &amp; Fire Hazards &amp; their Control:</b><br>Definition, sources & classification of hazards like chemical, fire, Different methods for controlling chemical & fire hazards, Objective & importance of fire prevention, fire extinguishing agents & devices with their working. | 04    | 25             |
| 3.          | <b>Personal Protective Devices:</b><br>Protective devices for head, ears, eyes, face, respiratory system, hand, feet etc.   | 01    | 10             |
| Section II  |   |       |                |
| 4.          | <b>Introduction to pollution:</b><br>Introduction to environmental pollution, sources of pollutants, effects of pollution on human health, vegetation, animal life & effect on environment.   | 02    | 15             |
| 5.          | <b>Air Pollution:</b><br>Sources & Types of air pollutant, classification, properties of air pollutant, effect of air pollution, Air pollution control methods like gravitational settling, Diffusion, Electrostatic precipitation, Centrifugal impaction, Direct interception etc.           | 03    | 20             |
| 6.          | <b>Water pollution:</b><br>Introduction, characterization of water, BOD, COD, VM, SM, classification of sources.  | 02    | 10             |

|    |  |    |    |
|----|--|----|----|
| 7. | <b>Solid waste of disposal methods:</b><br>Sources of classification, Methods of disposal like dumping, sanitary land filling, incineration, composting etc. | 02 | 10 |
|----|--|----|----|

**Text Book(s):**

| Safety management                       | John V. Grimaldi | Richard D. Irwin; 4th Edition |

**Course Evaluation:**

**Practical:**

- Continuous Evaluation consists of performance of Practical which should be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 marks.
- 30 marks for the Report submission based on technical visit at one chemical industry.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|     |  |
|-----|--|
| CO1 | Identify instrument for the p, t, v measurement of given parameter.      |
| CO2 | Identify the causes of accident and explain various controlling methods. |
| CO3 | Acquainted with the principles of environment & ergonomics.              |
| CO4 | Familiarise with process safety management (psm) as per osha             |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

|             |               |           |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

It is a core subject of Chemical Engineering and is essential for understanding basic concepts, thermodynamic properties of fluid and performance of thermal systems used in industry.

**Course Content:**

| <b>Section I</b>  |  |       |                |
|-------------------|--|-------|----------------|
| Module. No.       | Content  | Hours | Weightage in % |
| 1.                | <b>Introduction and Basic Concepts</b><br>Systems, processes and surroundings, homogenous and heterogeneous systems, closed, open and isolated, intensive and extensive properties, state and path functions. Concept of internal energy, enthalpy, entropy, free energy and equilibrium equation of state, ideal gas law, Vander Waals equation. Amagat's law, Dalton's law, Henry's law, Zeroth law of thermodynamics.                                       | 08    | 25             |
| 2.                | <b>First Law of Thermodynamics for Open and Closed System</b><br>Statement of first law of thermodynamics, use of steam tables, calculation of internal energy, enthalpy, heat and work for ideal gas undergoing reversible, isothermal, Isobaric, adiabatic and polytropic process. T-V, P-V and P-T diagrams.  | 08    | 10             |
| 3.                | <b>Second Law of Thermodynamics</b><br>Statement of second law of thermodynamics: Kelvin Plank statement and Classius statement, Carnot cycle and its efficiency, concept of entropy and entropy change for closed and open system. Heat pump and heat engine (coefficient of performance and efficiency). Reversible and irreversible process. Thermodynamic temperature scale. Thermal thermodynamic equation, Maxwell relation. Third Law of Thermodynamics | 08    | 15             |
| <b>Section II</b> |  |       |                |
| 4.                | <b>Entropy</b><br>Inequality of Classius, entropy-a property of a system entropy   | 06    | 15             |

|    |  |    |    |
|----|--|----|----|
|    | change in reversible process, entropy change for an open system, principle of increase of entropy, efficiency, irreversibility.  |    |    |
| 5. | <b>Applications of Second law of Thermodynamics</b><br>Refrigeration, vapor compression and absorption refrigeration cycle, air refrigeration cycle, types of compressors, reciprocating air compressor, single stage compressor, and isentropic efficiency of compressor, coefficient of performance(COP), liquefaction process, latest refrigerants- their qualities and applications. | 07 | 15 |
| 6. | <b>Chemical Reaction Equilibrium and Vapor Liquid Equilibrium</b><br>Concept of chemical potential, Gibb's Duhen Equation, Raoul's law, Gibb's phase rule, vapor liquid equilibrium, dew point and bubble point, calculations for two component systems, fugacity, fugacity coefficient, activity and activity coefficient.  | 08 | 20 |

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of Practical which should be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 marks.
- Practical performance/quiz/drawing/test of 15 marks during End Semester Exam.
- Viva/Oral presentation consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|     |  |
|-----|--|
| CO1 | Illustrate the application of first law and second law to the problem of phase                                     |
| CO2 | Estimate the efficiency of heat equipments for a given duty.   |
| CO3 | Distinguish systems, functions, properties and processes.  |
| CO4 | Implement the various law of thermodynamics for non flow & flow process and access the pvt behavior of the fluids. |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand the language and familiarize with Indian Standards related to engineering drawings
- Develop drafting and sketching skills, application of drawing equipment's.
- Read various engineering curves, projections and dimensioning styles.

**Course Content:**

| Section I  |   |       |                |
|------------|---|-------|----------------|
| Module No. | Content   | Hours | Weightage in % |
| 1.         | <b>Introduction</b><br>BIS SP-46, Drawing Instruments and their uses, Letters and numbers- Standard Sizes and Layout of drawing sheets-Types of lines and their applications- Different types of Dimensioning techniques, Scale (reduced, enlarged & full size), plain scale and diagonal scale, Geometrical constructions.   | 04    | 14             |
| 2.         | <b>Orthographic projections of points and lines:</b><br>Introduction to orthographic projection, First angle and Third angle method, their symbols. Conversion of pictorial view into Orthographic Views – object containing plain surfaces, slanting surfaces, slots, ribs, cylindrical surfaces. Projections of points Projections of lines in different quadrants, inclinations, True lengths of the lines projections on auxiliary planes | 10    | 34             |
| 3.         | <b>Projections of plane figures:</b><br>Different cases of plane figures (of different shapes) making different angles with one or both reference planes and lines lying in the plane figures making different given angles (with one or both reference planes).  | 05    | 15             |
| Section II |   |       |                |
| 4.         | <b>Projection of solids:</b><br>Types of Solid. Projection of Cone, Cylinder, Prism & pyramids. Simple cases when solid are placed in different positions Axis faces and lines lying in the faces of the solid making given angles.   | 06    | 22             |
| 5.         | <b>Isometric projection:</b><br>Introduction to isometric projections. Isometric scale and Natural scale. Isometric view and isometric projection. Illustrative problems related to objects containing lines, circles and arcs shape only   | 05    | 15             |

**List of Practical:**

| Sr No | Name of Practical   | Hours |
|-------|---|-------|
| 1.    | Letters and numbers, Dimensioning techniques, Scale (reduced, enlarged & full size), plain scale and diagonal scale, Geometrical constructions. | 02    |
| 2.    | Orthographic projections of points and lines:   | 15    |
| 3.    | Projections of plane figures  | 15    |
| 4.    | Projection of solids  | 12    |
| 5.    | Isometric projection  | 16    |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 20 marks as per the guidelines provided by the course coordinator.

**Practical:**

- Continuous Evaluation consists of Performance of Practical/Tutorial which will be evaluated out of 10 for each practical/Tutorial and average of the same will be converted to 20 Marks.
- Internal Viva consists of 30 Marks.
- Practical performance/quiz/drawing/test of 50 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|     |  |
|-----|--|
| CO1 | Interpret engineering drawing as a technical communication language.               |
| CO2 | Understand different dimensioning methods and its use in drawings.                 |
| CO3 | Relate the use of engineer's scale to different engineering fields.                |
| CO4 | Identify the use of orthographic & isometric projection in real time applications. |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- gain knowledge of basic fundamentals of mass transfer operations such as diffusion, leaching, absorption etc.
- gain knowledge of fundamental principles, design aspects, equations, associated problems, industrial applications of all-important unit operations.
- equip them with the essential knowledge and skills required to appear in campus interview or work as an engineer in the chemical industries with confidence.

**Course Content:**

| Section I   |   |       |                |
|-------------|---|-------|----------------|
| Module. No. | Content   | Hours | Weightage in % |
| 1.          | <b>Introduction:</b><br>Importance of mass transfer operations, classification of mass-transfer operations, methods of conducting mass transfer operations and fundamental design principles.   | 02    | 10             |
| 2.          | <b>Molecular Diffusion Of Fluids:</b><br>Concept of molecular and eddy diffusion, Fick's law for diffusion, general equation for steady-state molecular diffusion in fluid within laminar flow, thermal diffusion, simple problems on diffusion by direct use of formula.           | 05    | 15             |
| 3.          | <b>Inter phase Mass Transfer:</b><br>Concept of equilibrium, local and average overall mass transfer coefficient, film theory, penetration theory, analogy between mass and momentum transfer and concept of stage, stage efficiency, cascade etc.                                  | 05    | 20             |
| Section II  |   |       |                |
| 4.          | <b>Gas Absorption:</b><br>Definition and application of absorption, equilibrium solubility of gases in liquids, effect of temperature and pressure on solubility, characteristics of ideal liquid solutions of Raoult's law, choice of solvents, material balance for the component | 06    | 20             |

|    |   |    |    |
|----|---|----|----|
|    | transfer in countercurrent and concurrent flow, concept of HETP and simple problems on absorption.  |    |    |
| 5. | <b>Liquid-Liquid Extraction:</b><br>Definition and application of liquid extraction, liquid equilibrium for three component system, equilibrium triangular coordinates, system of three liquids one pair partially soluble, effect of temperature and pressure on the solubility curve, choice of solvents for the operation, simple problems using direct formula. | 05 | 15 |
| 6. | <b>Leaching:</b><br>Definition and industrial application of leaching, preparation of solid, methods of operations and equipment for in place leaching and heap leaching, shanks system, filter press leaching and equipment like Rotacel, Kennedy extractor and Balloman extractor.  | 04 | 10 |
| 7. | <b>Equipment for Gas-Liquid Operation:</b><br>Construction and working of gas dispersed equipment like bubble column (Sparged vessel), agitated vessel, tray tower etc. and liquid dispersed equipment like venturi scrubbers, wetted wall column, spray tower, packed tower and comparison between tray and packed tower.  | 03 | 10 |

#### List of Practical

| Sr No | Name of Practical/Tutorial  | Hours |
|-------|---|-------|
| 1.    | Solid In Air Diffusion (Vaporization Of Naphthalene Balls)  | 08    |
| 2.    | Vapour In Air Diffusion - To determine the diffusion coefficient of an organic vapor (i.e. CCl <sub>4</sub> ) in air. | 08    |
| 3.    | Liquid – Liquid Diffusion - To study the effect of temperature on the diffusion coefficient.                          | 08    |
| 4.    | York Scheibel's Extraction Unit   | 08    |
| 5.    | Absorption in sieve plate column  | 08    |
| 6.    | Vapor-Liquid Equilibrium Set-up   | 08    |
| 7.    | Leaching Experiment   | 08    |
| 8.    | Wetted Wall Column Experiment   | 04    |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests of 30 marks each and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty Evaluation consists of 10 marks as per the guidelines provided by Course Coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consist of performance of Practical which should be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 mark.
- Practical performance/quiz/drawing/test of 15 marks during End Semester Exam.
- Viva/Oral presentation consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|     |  |
|-----|--|
| CO1 | Distinguish the basics of mass transfer & important to build a knowledge of the mass regarding laws. |
| CO2 | Identification of mechanisms of mass transfer, formulation of rate equations.                        |
| CO3 | Evaluate the solutions of the differential equations for steady state & non steady state problems.   |
| CO4 | Generalize various mass transfer equipments.   |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

|             |               |           |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- It is expected that this course will lay the foundation of basic knowledge about instrumentation skills that is frequently used in subsequent chemical engineering courses as well as professional life.

**Course Content:**

| Section I   |  |       |                |
|-------------|--|-------|----------------|
| Module. No. | Content  | Hours | Weightage in % |
| 1.          | <b>Introduction to Instrumentation:</b><br>Elements of instruments, static and dynamic characteristics, basic concepts of response of first order type instruments, mercury in glass thermometer, bimetallic thermometer, pressure spring thermometer, static accuracy and response of thermometers. | 03    | 10             |
| 2.          | <b>Pressure Measurement:</b><br>Pressure, vacuum and head manometers, measuring elements for gage pressure and vacuum, measuring pressure in corrosive liquids, measuring of absolute pressure, static accuracy and response of pressure gages.  | 04    | 15             |
| 3.          | <b>Temperature Measurement:</b><br>Industrial thermocouples, thermocouple wires, thermo couple wells and response of thermocouples.  | 06    | 20             |
| Section II  |  |       |                |
| 4.          | <b>Flow Measurement:</b><br>Head flow meters, open channel meters, area flow meters, flow of dry materials, viscosity measurement.   | 06    | 20             |
| 5.          | <b>Level Measurement:</b><br>Direct measurement of liquid level, level measurement in pressure vessels, measurement of interface level, level of dry materials.  | 05    | 15             |
| 6.          | <b>Instruments for Analysis:</b><br>Recording instruments, indicating and signaling instruments, instrumentation diagram.  | 06    | 20             |

**List of Practical:**

| Sr. No. | Name of Practical                                | Hours |
|---------|--|-------|
| 1       | Study and use Pressure sensing elements.         | 08    |
| 2       | Study and use Flow measuring instruments.        | 08    |
| 3       | Study and use level measuring instruments.       | 08    |
| 4       | Study and use temperature measuring instruments. | 08    |
| 5       | Study block diagram of DCS.                      | 08    |
| 6       | Study block diagram of PLC.                      | 08    |
| 7       | Study applications of controllers.               | 06    |
| 8       | Verify Ohm's law.                                | 06    |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Know renewable source of energy and their futuristic scope.
- Understand the designing the process plants or creating design layouts of plant.
- Understand fundamentals of chemical engineering viz. development of flow diagrams, importance of various design consideration during the development and design of any process.
- Rapidly increase advancement of knowledge and relevant importance and application of various process auxiliaries and utilities used in industries.
- Deals with the basics as well as advanced understanding of various process auxiliaries and utilities used in chemical plant.

**Course Content:**

| Section I   |  |       |                |
|-------------|--|-------|----------------|
| Module. No. | Content  | Hours | Weightage in % |
| 1.          | <b>Introduction:</b><br>Types of energy, energy crisis, Renewable sources of energy, conventional & Non-Conventional sources of energy, energy conservation.   | 02    | 10             |
| 2.          | <b>Conventional fuels:</b><br>Classification, types, sources, properties, uses, storage, handling & selection factors of various conventional fuels in the form of<br>a. Solid : Coal, Lignite, Coke<br>b. Liquid : Gasoline, Kerosene, Naphtha, Fuel oil, Diesel<br>c. Gaseous : N.G., Refinery gas, Water gas, Producer gas, Coke oven gas, LPG, Oil gas, Industrial Gases etc | 06    | 20             |
| 3.          | <b>Non-conventional sources of energy:</b><br>Solar energy : Solar radiation, collectors, storage & applications<br>Wind energy : Introduction, nature of wind & wind farm<br>Biomass energy : Introduction, Biomass conversion technology by wet & Dry process<br>Geothermal energy: Introduction & Sources of geothermal energy.   | 07    | 20             |

|                   |   |    |    |
|-------------------|---|----|----|
|                   | Nuclear energy : Introduction, Nuclear Fuels & Nuclear reactions, types of Propellant & moderators  |    |    |
| <b>Section II</b> |   |    |    |
| 4.                | <b>Water &amp; Steam:</b><br>Importance, Consumption & source of water, water analysis, types of hardness, methods of softening of water like lime soda, zeolite, ion exchange methods etc., Purification of water by screening, sedimentation, coagulation, filtration & sterilization, treatment for boiler feed water, Reuse & Recycling of process water, definition of enthalpy, wet steam, superheated steam, specific volume, Types-classification & comparison of steam generators, Factors affecting the selection of steam generator. | 08 | 25 |
| 5.                | <b>Air &amp; Refrigeration:</b><br>Introduction, use of air as chemical raw material & utility, concept of compressed air, blower air, fan air, instrument air etc., various methods of refrigeration in brief like ice, evaporate, vapor, steam jet refrigeration etc, types of refrigerating agent like ammonia, carbon dioxide, methylene chloride, water brine etc., selection of refrigerating agents.   | 07 | 25 |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand many basic principles of Chemical Engineering operations such as Size Reduction, Filtration, Sedimentation, Mixing and Agitation etc. and their mathematical co-relation.
- Understand the basic principles of particle preparation and their characterization.
- Study various methods for storage of solids and conveyors available for their transportation.
- Understand the performance of different equipment for separation of solids and size reduction

**Course Content:**

| Section I  |   |       |               |
|------------|---|-------|---------------|
| Module No. | Content   | Hours | Weightage in% |
| 1.         | <b>Properties of Particulate Solids</b><br>Fundamentals of Unit operation and Unit process, Specific properties of solids : Particle density and Bulk density, diameter, sphericity, equivalent diameter, specific surface area, volume surface mean diameter, mass mean diameter, and shape factor, Calculation of particle diameter, sphericity, equivalent diameter, specific surface area, volume surface mean diameter, mass mean diameter, and shape factor, numbers of particles in solid. | 06    | 20            |
| 2.         | <b>Screen Analysis</b><br>Basics of Ideal and actual screen, Types of screen analysis, Capacity and effectiveness of screen, Derivation of formula for overall effectiveness of screen, Calculation of capacity and effectiveness of screen.  | 04    | 10            |
| 3.         | <b>Size Reduction</b><br>Principles of Size reduction and its application, Classification, comparison and selection of size reduction equipments based on size reduction principle, Laws of size reduction: (i) Rittingers law (ii) Bond's law (iii) Kick's law , Calculation of power required for size reduction using empirical laws.  | 04    | 15            |

| Section II |   |    |    |
|------------|---|----|----|
| 4.         | <b>Sedimentation</b><br>Fundamentals of sedimentation, Batch sedimentation, Inter phase height Vs time curve for Batch sedimentation, Principle of flocculation, Principle, construction and working of Gravity thickener, Fundamentals of free and hindered settling, Principle construction and working of Cyclone separator.   | 04 | 15 |
| 5.         | <b>Filtration</b><br>Basics of filtration, Classification of equipments for liquid-solid separation, Filter media and its characteristics, Constant rate filtration and constant pressure filtration, Filter media and its characteristics.   | 04 | 10 |
| 6.         | <b>Separation of Solid Particles</b><br>Definition and application of solid separation, Factors affecting selection of equipment for solid separation, Working principle and construction of a) Jigging, b) Elutriation, c) Double cone classifier d) Electrostatic precipitator, e) Magnetic separator f) Froth flotation cell, Differential settling methods, sink and float method | 04 | 15 |
| 7.         | <b>Agitation and Mixing</b><br>Define agitation and mixing, give their applications, Classification of Impellers and brief explanation, Vortex formation and swirling, Methods of Vortex prevention, Flow number, Factors affecting agitation.  | 04 | 15 |

**List of Practical:**

| Sr. No. | Name of Practical  | Hours |
|---------|--|-------|
| 1       | Measure volume surface mean diameter, mass mean diameter, number of particles using sieve shaker | 06    |
| 2       | Carry out differential and cumulative screen analysis  | 06    |
| 3       | Test Rittinger's law for grinding in ball mill and measure critical speed                        | 06    |
| 4       | Test Kicks law for crushing in jaw crusher   | 06    |
| 5       | Test Bond's law for crushing in roll crusher   | 06    |
| 6       | Measure efficiency of cyclone separator  | 06    |
| 7       | Determine rate of settling by sedimentation  | 06    |
| 8       | Measure rate of filtration in gravity filtration   | 06    |
| 9       | Measure efficiency of separation in froth flotation cell   | 06    |
| 10      | Measure rate of filtration in vacuum filtration  | 06    |

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests of 30 marks each and 1 hour of duration and average of the same will be converted to 30 marks.
- Faculty Evaluation consists of 10 marks as per the guidelines provided by Course Coordinator.
- End Semester Examination consists of 60 marks.

**Tutorial:**

- Continuous Evaluation consist of performance of Practical which should be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 marks.
- Practical performance/quiz/drawing/test of 15 marks during End Semester Exam.
- Viva/Oral presentation consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|     |  |
|-----|--|
| CO1 | Identify the practical importance and relevance of unit operations used for crushing, grinding and size separation in chemical industry. |
| CO2 | Understanding fluid flow through fluidized bed   |
| CO3 | Evaluate the parameters of various filtration equipment and sedimentation.   |
| CO4 | Identify the different types of mixing, agitation and conveying of solids.   |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Understand how to formulate and be able to solve one- and two-dimensional conduction.
- Most of the Chemical Engineering operations will involve either heat addition or heat removal in one way or the other.
- It is, therefore, extremely necessary to have good understanding about the heat transfer mechanisms.
- This subject enables the students to apply this knowledge for understanding the performances of various heat transfer equipment such as heat exchangers, condensers, evaporators etc. used in almost all chemical and related industries

**Course Content:**

| Section I   |   |       |                |
|-------------|---|-------|----------------|
| Module. No. | Content   | Hours | Weightage in % |
| 1.          | <b>Modes of Heat Transfer</b><br>Conduction, Convection, Radiation, concept of steady state and unsteady state heat transfer.   | 05    | 10             |
| 2.          | <b>Conduction</b><br>Fourier's law of heat conduction, thermal conductivity of materials – solids, liquids and gases and effect of temperature on thermal conductivity, one dimensional steady state heat conduction through a plane wall, composite wall and cylinder, multi-layer cylinder. Insulation and insulating materials, critical thickness of insulation.  | 05    | 15             |
| 3.          | <b>Convection</b><br>Natural and forced convection, dimensional analysis and significance of various dimensional groups such as Reynolds number, Prandtl number, Nusselt number, Grasshof number, Stanton number. Peclet number, empirical correlations for free and forced convection. Dittus Boelter's equation, Sieder Tate Equation, simple numerical problems using Dittus Boelter equation, Sieder Tate equation. | 05    | 15             |

|                   |  |    |    |
|-------------------|--|----|----|
| 4.                | <b>Radiation</b><br>Reflection, absorption and transmission of thermal radiation, Emmisive power, Wein's displacement law, Stefan Boltzmann Law, Planck's law, Kirchhoff's law, Concept of black body, Grey body.  | 04 | 10 |
| <b>Section II</b> |  |    |    |
| 5.                | <b>Heat Exchanger</b><br>Introduction, classification, individual and overall heat transfer coefficient, fouling factor, roughness of surfaces and their effect, LMTD for parallel and counter current heat exchangers, construction and description of:- Concentric double pipe, Shell and tube (1-1 heat exchanger and 1-2 heat exchanger), Plate type heat exchanger. | 04 | 20 |
| 6.                | <b>Boiling and condensation</b><br>Interface, bubble and film boiling, boiling regime, Concept of condensation, types of condensation i.e. drop wise and film wise condensation.   | 02 | 15 |
| 7.                | <b>Evaporators</b><br>Evaporation Capacity, Evaporation Economy, construction and description of open pan, long type vertical evaporator, falling film evaporator and agitated thin film evaporator, multiple effect evaporator, feeding arrangements- forward, backward, mixed and parallel feed.   | 05 | 15 |

#### List of Practical

| Sr No | Name of Practical/Tutorial  | Hours |
|-------|---|-------|
| 1.    | To determine Heat Transfer through Composite Wall at different temperature.                 | 04    |
| 2.    | Determination of Thermal Conductivity of Insulating Powder (Asbestos Powder).               | 08    |
| 3.    | To find out Heat transfer in Double Pipe Heat Exchanger in Laminar Flow and Turbulent Flow. | 08    |
| 4.    | Calculation of Heat transfer Coefficient by Natural and Forced Convection.                  | 08    |
| 5.    | Heat Transfer Calculation in Plate Heat Exchanger.  | 08    |
| 6.    | Shell and Tube Heat Exchanger.  | 08    |
| 7.    | Heat Transfer by Radiation: Stefan-Boltzmann Law.   | 08    |
| 8.    | Heat Transfer in Drop and Film wise Condensation Apparatus.                                 | 08    |

CE: Continuous Evaluation, ESE: End Semester Exam

Objective(s) of the Course:

To help learners to

- identify different types of fertilizers and their applications for crops
- provide comprehensive and balanced understanding of essential link between chemistry and the synthetic fertilizer industry
- understand the manufacturing of fertilizers based on different nutrients

Course Content:

| Section I  |  |       |               |
|------------|--|-------|---------------|
| Module No. | Content  | Hours | Weightage in% |
| 1.         | <b>Overview of Fertilizers</b><br>Synthetic fertilizers, Classification of fertilizers, Role of essential Elements in plant Growth, Macro elements and Micro elements, Application of fertilizers considering Nutrient, Balance and types of crop  | 05    | 15            |
| 2.         | <b>Nitrogenous Fertilizers</b><br>Ammonia: Physical, chemical properties and applications, Synthesis gas by Catalytic partial oxidation Steam Hydrocarbon reforming, Manufacturing of ammonia by Linde Ammonia concept process, Storage and Transportation of Ammonia, Nitric acid: Chemical, physical properties and applications, Manufacturing of Nitric Acid by Pressure ammonia oxidation process and Intermediate pressure ammonia oxidation process, Urea : Physical, chemical properties, Manufacturing of Urea by Stamicarbon's CO <sub>2</sub> stripping process, Manufacturing of Ammonium nitrate by Prilling process. | 10    | 30            |

|                   |  |    |    |
|-------------------|--|----|----|
| 3.                | <b>Phosphatic Fertilizer</b><br>Physical, chemical properties and applications of Phosphorus and Phosphoric acid, Manufacturing of elemental phosphorous by Electric furnace method, Manufacturing phosphoric acid by Wet Process, Strong Sulphuric Acid Leaching Hydrochloric Acid Leaching Electric Furnace Process. | 05 | 15 |
| <b>Section II</b> |  |    |    |
| 4.                | <b>Potassic Fertilizers</b><br>Physical, chemical properties and uses of Potassium Chloride, Potassium nitrate, Potassium sulphate, Manufacturing of potassium chloride from sylvinit, Preparation of Potassium nitrate, Potassium sulphate  | 05 | 20 |
| 5.                | <b>Complex Fertilizer and Bio Fertilizer</b><br>Manufacturing of NPK, Ammonium Sulphate Phosphate (ASP), Calcium Ammonium Nitrate(CAN), Types of Biofertilizers, Biofertilizers Nitrogen-fixing biofertilizers Phosphate-solubilizing biofertilizers, Preparation of a biofertilizers                                  | 05 | 20 |

**List of Practical:**

| Sr. No. | Name of Practical   | Hours |
|---------|---|-------|
| 1       | Prepare chart for fertilizer classification with chemical formula and nutrient content                                      | 06    |
| 2       | Estimate nutrient content (% N, %P <sub>2</sub> O, % K <sub>2</sub> O) in different fertilizers from their chemical formula | 06    |
| 3       | Estimate percentage of Nitrogen in Ammonium chloride by substitution method   | 06    |
| 4       | Estimate percentage of Nitrogen in Ammonium sulfate by substitution method  | 06    |
| 5       | Estimate percentage of Nitrogen in Ammonium chloride by back titration  | 06    |
| 6       | Estimate percentage of Nitrogen in Ammonium sulphate by back titration  | 06    |
| 7       | Prepare potassium sulphate  | 06    |
| 8       | Estimate ratio from Ammonia to Phosphoric acid in DAP   | 06    |
| 9       | Prepare bio-fertilizer  | 06    |
| 10      | Estimate percentage of Nitrogen in DAP by Formaldehyde method   | 06    |

Course Evaluation:

**Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

Tutorial/Practical:

- Continuous Evaluation consists of performance of tutorial which will be evaluated out of 10 marks for each tutorial and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 marks.
- Practical performance/quiz/drawing/test of 20 marks during End Semester Exam.
- Viva/Oral presentation consists of 20 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, students will be able to:

|     |   |
|-----|---|
| CO1 | Identify the different nutrients and significance of feed stocks for the production of fertilizers. |
| CO2 | Classify various methods for the production of nitrogenous fertilizers.                             |
| CO3 | Apply different manufacture methods for various phosphorous fertilizers.                            |
| CO4 | Assess the production methods for potassium and mixed complex fertilizers.                          |

Level of Bloom's Revised Bloom's Taxonomy in Assessment

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- Apply fundamentals of mass transfer and techniques involved in mass transfer operations of humidification, drying and adsorption.
- Operate and design various mass transfer equipment's.

**Course Content:**

| Section I   |   |       |                |
|-------------|---|-------|----------------|
| Module. No. | Content   | Hours | Weightage in % |
| 1.          | <b>Distillation:</b><br>Importance of distillation as separation method, Vapor-liquid equilibrium, Relative volatility, Ideal solutions with Raoult's law, Henry's law, Flash vaporization with material balance calculation, Calculations of vapor liquid equilibrium, Differential distillation with Rayleigh's equation of simple calculation, Steam distillation, Continuous rectification – binary system based on McCabe & Thiele methods with calculation. | 08    | 25             |
| 2.          | <b>Humidification:</b><br>Concept of partial pressure & vapor pressure, Definitions & Simple calculations for absolute humidity, Relative saturation & percentage saturation, Concept of wet bulb temperature, Dry bulb temperature, Dew point, Humid volume, Humid heat, psychrometric chart.  | 07    | 25             |
| Section II  |   |       |                |
| 1.          | <b>Drying:</b><br>Applications, understanding of various definitions, Types and Classification of drying operations, freeze drying, drying test and derivation of equations for drying time and simple calculations.  | 05    | 20             |
| 2.          | <b>Adsorption and Ion Exchange:</b><br>Concept and application, types of adsorption, Hysteresis,  | 05    | 15             |

|    |   |    |    |
|----|---|----|----|
|    | Characteristics and nature of adsorbents, Effect of temperature, Freundlich equation and its applications for single stage operation, Major applications and factors affecting ion-exchange.  |    |    |
| 3. | <b>Crystallization:</b><br>Concept and application, methods for supersaturation, classification of crystallizer, Meir's theory, concept of nucleation and crystal growth, effect of seeding and simple calculations for percentage yield, construction and working Vacuum crystallizer. | 05 | 15 |

#### List of Practical

| Sr No | Name of Practical/Tutorial                 | Hours |
|-------|--|-------|
| 1     | Natural draft tray dryer experiment        | 04    |
| 2     | Spray Dryer Experiment                     | 08    |
| 3     | Fluidized bed dryer equipment              | 04    |
| 4     | Rotary dryer equipment                     | 08    |
| 5     | Simple Distillation experiment             | 08    |
| 6     | Steam distillation experiment              | 04    |
| 7     | Humidification and dehumidification set-up | 08    |
| 8     | Solid-liquid adsorption                    | 08    |
| 9     | Crystallization experiment                 | 08    |

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of Practical which should be evaluated out of 20 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 20 marks.
- Practical performance/quiz/drawing/test of 30 marks during End Semester Exam.
- Viva/Oral presentation consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, the students will be able to:

|     |  |
|-----|--|
| C01 | Understand the concept of distillation.  |
| C02 | Analyze problems involving calculation of trays required for desired separation in binary distillation column.           |
| C03 | Understand and evaluate the performance of various mass transfer operations like adsorption, crystallization and drying. |
| C04 | Learn Drying mechanism and capillary mechanism in drying operation.  |

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- The student will get the idea about all equipment drawing based on different industry industry
- Sketch Chemical engineering equipments, Process flow sheets and instrument symbols and plant layouts.
- The student will get also the idea about instrumentation diagram of all equipment.

**Course Content:**

| Section I   |   |       |                 |
|-------------|---|-------|-----------------|
| Module. No. | Content   | Hours | Weight age in % |
| 1.          | <b>Drawing the Outline of Unit Operations of all equipment by schematic representation:-</b><br>Drawing all schematic representation like batch reactor, continuous reactor, dryers, Evaporator, Extraction, Fluid handling equipment, Fluid-solid contacting equipment, Fluid-solid separation equipment, Filter press, crystallizer, cyclone separator, Filters, Fluid storage and etc.   | 09    | 15              |
| 2.          | <b>Drawing of symbols of Chemical Engineering equipment</b><br><b>Duration:-</b><br>Drawing of symbols for heat transfer equipment ; heat exchanger, water cooler, Steam Heater, Re-boiler and Condenser; Drawing of symbols for pumps compressors and boiler; agitator, jacketed kettle, absorber, stripper, fractionating column, pipe lines and flow meters. Drawing of symbols for instruments such as flow measurement, temperature, pressure and level. | 15    | 20              |
| 3.          | <b>Drawings of various Chemical Engineering equipment</b>   | 08    | 15              |

|                   |  |    |    |
|-------------------|--|----|----|
|                   | <b>Duration:-</b><br>Draw neat sketches of 1-1 and 2-4 Shell & tube heat exchanger; Short tube vertical evaporator and Long tube forced circulation evaporator ; Rotary drum vacuum filter; Bubble cap plate; Jaw crusher; Plate & Frame filter press, Distillation column.  |    |    |
| <b>Section II</b> |  |    |    |
| 1.                | <b>Process block diagrams/Utility diagrams / Flow diagrams using process description Duration:-</b><br>Process block diagram of some process used in industries in different ways, draw the flow diagram of the same process, Utility flow diagram (UFD) is a drawing giving information similar to PFD but about utility equipment. Here again equipment capacity, line sizes, pressure rating, control/monitoring instruments, etc. are indicated in the related drawing.  | 08 | 10 |
| 2.                | <b>Process instrumentation diagram of equipments using different instrumentation symbols:-</b><br>Reactor temperature control; Hot fluid temperature control in heat exchanger; Spray drier temperature control; Forced circulation evaporator control with vertical heat exchanger; Control of mechanically agitated vessel used for gas absorption; Distillation column tower pressure control ; Distillation column control of level and reflux condenser with pumped reflux column ; Steam flow rate and level control of re-boiler and cooler temperature control | 09 | 20 |
| 3.                | <b>Process equipment layout and Project layout Duration:-</b><br>Equipment layout in Ammonia plant; water treatment plant; sugar manufacturing unit; Paper industry and cement plant Drawing of project layout for phosphoric acid, urea plant in fertilizer Industry Drawing of project layout of petroleum refinery consisting various units like CDU, FCCU, utilities etc.  | 11 | 20 |

#### List of Practical:-

1. Student should maintain a separate A3 size sketch book which will be the part of term work and submit it along with drawing sheets. Assignment should be drawn in the sketch book as per the instruction given by subject teacher.
2. Drawing all schematic representation required in chemical industries.
3. Students should collect various process flow diagrams from nearby chemical process industries.
4. Collect different samples of pipe fittings and joints.
5. Students should collect various specification sheets for equipments from nearby chemical process industries.
6. Students should collect all piping diagram nearby industries
7. Prepare chart of piping diagram of different industries and attached in instrumentation laboratory.
8. Prepare chart for instrumentation and control attached to various equipments in institute laboratories.

#### Course Evaluation:

##### Theory:

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

##### Course Outcome(s):

After the completion of the course, the following course outcomes will be able to:

|     |  |
|-----|--|
| C01 | Draw symbols for important Chemical engineering equipments   |
| C02 | Sketch and demonstrate equipments like heat exchangers, evaporators, jaw crusher, and filters.                         |
| C03 | Sketch and demonstrate process flow sheets for manufacture of different chemicals                                      |
| C04 | Sketch, demonstrate and analyze Process instrumentation diagrams of equipments using different instrumentation symbols |
| C05 | Sketch and demonstrate equipment layouts and project layouts of different chemical engineering plants                  |

Level of Bloom's Revised Bloom's Taxonomy in Assessment

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- basic engineering principles and unit operations pertaining to pharmaceutical plants

**Course Content:**

| Section I   |   |       |                |
|-------------|---|-------|----------------|
| Module. No. | Content   | Hours | Weightage in % |
| 1.          | <b>Materials of pharmaceutical plant construction:</b><br>Overview of composition, corrosion, properties and applications of the materials of construction with special reference to stainless steel and glass, Industrial Hazards and Safety Precautions – Mechanical, Chemical, Electrical, Fire and Dust hazards, Industrial dermatitis, Accident records, etc.                | 08    | 25             |
| 2.          | <b>Fluid flow, heat transfer in pharmaceutical operations:</b><br>Types of flow, Concepts of boundary layer, Basic equation of fluid flow, Valves, Flow meters, Manometers and Measurement of flow and pressure, source of heat, heat transfer, steam and electricity as heating media, determination of requirement of amount of steam / electrical energy, steam pressure.      | 07    | 25             |
| Section II  |   |       |                |
| 1.          | <b>Filtration, centrifugation and crystallization:</b><br>Theory of filtration, industrial filters including filter press, rotary press, rotary filter, edge filter, etc. Factors affecting filtration. Principles of centrifugation, industrial centrifugal filters and centrifugal sedimentary. Study of various types of crystallisers. Caking of crystals and its prevention. | 05    | 20             |
| 2.          | <b>Humidity control, refrigeration, and air-conditioning in pharma plants:</b><br>Basic concepts, definition, wet bulb and adiabatic saturation   | 05    | 15             |

|    |   |    |    |
|----|---|----|----|
|    | temperatures, psychometric chart and measurement of humidity, application of humidity measurement in pharmacy. Equipment for dehumidification operations, principle and applications of refrigeration and air conditioning.   |    |    |
| 3. | <b>Evaporation, distillation and drying in pharma plants:</b><br>Basic concepts of phase equilibrium, factors affecting evaporation, evaporators, film evaporators, single effect and multiple effect evaporators, simple & steam flash distillation, Azeotropic and extractive distillation and Moisture content, mechanism of drying, dryers used in pharmaceutical industries, special drying methods. | 05 | 15 |

### List of Practical

| Sr No | Name of Practical/Tutorial                 | Hours |
|-------|--|-------|
| 1     | Double Effect evaporator experiment        | 04    |
| 2     | Spray Dryer Experiment                     | 08    |
| 3     | Plate & Frame experiment                   | 04    |
| 4     | Composite Plate heat transfer experiment   | 08    |
| 5     | Simple Distillation experiment             | 08    |
| 6     | Steam distillation experiment              | 04    |
| 7     | Humidification and dehumidification set-up | 08    |
| 8     | Solid-liquid adsorption                    | 08    |
| 9     | Crystallization experiment                 | 08    |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of Practical which should be evaluated out of 20 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 20 marks.
- Practical performance/quiz/drawing/test of 30 marks during End Semester Exam.
- Viva/Oral presentation consists of 30 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, the students will be able to:

|     |   |
|-----|---|
| CO1 | Know various unit operations used in Pharmaceutical Industries.               |
| CO2 | Understand the material handling techniques.                                  |
| CO3 | Perform various processes involved in pharmaceutical manufacturing process    |
| CO4 | Comprehend significance of plant lay out design for optimum use of resources. |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

**Objective(s) of the Course:**

To help learners to

- To apply knowledge from calculus, differential equation, thermodynamics, general chemistry and material and energy balances to solve reactor design problems.
- To examine reaction rate data to determine rate laws and to use them to design chemical reactors.
- To accomplish the task of selecting, sizing and determining the optimal operating conditions for the reactor.

|-------------|---|-------|----------------|
| Module. No. | Content   | Hours | Weightage in % |
| 1.          | <b>Basics of Chemical Reactions</b><br>Scope and importance of Chemical Reaction Engineering; Chemical Kinetics; Classifications of Chemical Reaction; Basics of Reactor design; Rate of Chemical reaction- Reaction rate on various basis, Factors affecting Rate equation.                      | 05    | 15             |
| 2.          | <b>Kinetics of Homogeneous Reactions</b><br>Rate Expression; Concentration Dependent term; Rate constant; Reaction Mechanism; Elementary and Non-Elementary Reaction; Molecularity of reaction; Order of reaction; Temperature Dependent term of rate equation- Arrhenius law, Activation Energy. | 05    | 15             |
| 3.          | <b>Interpretation of Batch Reactor Data</b><br>Introduction; Data Collection; Method for analyzing kinetic data-Integral Method, Differential Method, Constant volume batch reactor, Integrated rate equation for different order reaction, Half-life Method.                                     | 05    | 20             |

| Section II |   |    |    |
|------------|---|----|----|
| 1.         | <b>Ideal Reactors</b><br>Features of Ideal reactor; Different types of reactor- Batch reactor, Semi batch reactor, Flow reactors, Multiphase reactor.   | 05 | 15 |
| 2.         | <b>Design of Single ideal Reactors</b><br>Performance design equations of ideal reactors- Batch reactor, CSTR, PFR; Space Time, Space velocity.   | 05 | 15 |
| 3.         | <b>Design for Single Reactions</b><br>Size comparison of single reactors; Comparison of CSTR with PFR for first order reaction; CSTR in series-Unequal size, Equal size, PFR in series, PFR in parallel; Reactors of different types in series. | 05 | 20 |

#### List of Practical

| Sr No | Name of Practical/Tutorial  | Hours |
|-------|---|-------|
| 1     | To determine the value of rate constant for the hydrolysis of ethyl acetate catalysed by hydrochloric acid.   | 08    |
| 2     | To study the hydrolysis of ester (ethyl acetate) by alkali (NaOH). Show the reaction is kinetically second order. Also calculate the velocity constant. | 08    |
| 3     | To calculate value of rate constant - K for the saponification of ethyl acetate with NaOH in batch reactor-I (where M=1).                               | 08    |
| 4     | To calculate value of rate constant - K for the saponification of ethyl acetate with NaOH in TFR.   | 08    |
| 5     | To calculate value of rate constant - K for the saponification of ethyl acetate with NaOH in Continuous Stirred Tank Reactor.                           | 08    |
| 6     | To calculate value of rate constant -K for the saponification of ethyl acetate with NaOH in packed bed reactor.   | 10    |
| 7     | To calculate value of rate constant - K for the saponification of ethyl acetate with NaOH in CSTR in series.  | 10    |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of Practical which should be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 marks.
- Practical performance/quiz/drawing/test of 15 marks during End Semester Exam.
- Viva/Oral presentation consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, the following course outcomes will be able to:

|     |   |
|-----|---|
| C01 | Explain basic concepts to distinguish chemical reactions.                             |
| C02 | Calculate rate, rate constant, activation energy and order of reaction.               |
| C03 | Interpret kinetic data to find order of reactions.                                    |
| C04 | Operate different reactors efficiently using basic knowledge about their functioning. |

**Level of Bloom's Revised Bloom's Taxonomy in Assessment**

CE: Continuous Evaluation, ESE: End Semester Exam

**Objective(s) of the Course:**

To help learners to

- To understand various design and development of plant with cost calculation and analysis of profitability in chemical process industries.

**Course Content:**

| Section I   |  |       |                |
|-------------|--|-------|----------------|
| Module. No. | Content  | Hours | Weightage in % |
| 1.          | <b>Introduction</b><br>Role of chemical engineers, Need for plant design, Process design, basic for good design  | 06    | 10             |
| 2.          | <b>Project Development</b><br>Objective of plant Project, Process evaluation stages and their importance, Pilot plant formation, Technical factors, Economics Factors, Legal phases  | 06    | 15             |
| 3.          | <b>Process Design</b><br>Selection of Process, Continuous v/s Batch Processing, shift and operating Schedule, Types of flow diagram, block diagram, Material and Energy Balance.   | 06    | 15             |
| 4.          | <b>Selection Process Equipment and materials</b><br>Selection of material and process equipment, selection of pumps and dryers.  | 07    | 15             |
| Section II  |  |       |                |
| 1.          | <b>Plant location and Layout</b><br>Factors to be considered in plant and site location, Primary factors, Specific factors, principles of plant layout, factors methods for plant layout, unit area concept, Two-dimensional | 07    | 15             |

|    |  |    |    |
|----|--|----|----|
|    | layout, scale models   |    |    |
| 2. | <b>Economic Evaluation of Project</b><br>Capital and Fixed cost, Working capital investment, Depreciation, Methods for determining depreciation, total product cost, Utilities, maintenance and repairs cost, Net and gross earnings, Profitability analysis, Percent Return on investment, Payout time, Break Even chart, Turn Over Ratio | 07 | 15 |
| 4. | <b>Optimum design</b><br>Procedure for determining optimum stage, Optimum economic design for insulation thickness, pipe diameter, Optimum Operation Design, Process Auxiliaries   | 07 | 15 |

**Course Evaluation:**

**Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course Coordinator.
- End Semester Examination consists of 60 marks.

**Course Outcome(s):**

After the completion of the course, the following course outcomes will be able to:

|     |   |
|-----|---|
| CO1 | Know and understand basic economic concept and apply this concepts in the project works undertaken and to chemical engineering situation by solving problem                                       |
| CO2 | Know, understand and Select appropriate process for a project Differentiate the equipment and able to prepare specification sheet.  |
| CO3 | Evaluate cost including capital investment, product cost, breakeven point, depreciation cost for equipment and the total project cost and solve problem on profitability and replacement analysis |

**Objective(s) of the Course:**

To help learners to

- To operate petroleum refinery and petro-chemical plant.

**Course Content:**

| Section I   |   |       |                |
|-------------|---|-------|----------------|
| Module. No. | Content   | Hours | Weightage in % |
| 1.          | <b>Basics of Petroleum</b><br>History, origin and formation of petroleum, world reserves of petroleum, Indian petroleum industries & types  | 02    | 10             |
| 2.          | <b>Composition of petroleum</b><br>Composition of Petroleum, Classification of Petroleum, Chemistry of petroleum, Exploration & production of petroleum methods of exploration, transportation of petroleum products, Evaluation of petroleum | 10    | 20             |
| 3.          | <b>Properties &amp; test methods of Petroleum</b><br>Gas, gasoline, Naphtha, kerosene, Diesel, Lube oil, Bitumen  | 10    | 20             |
| Section II  |   |       |                |
| 1.          | <b>Petrochemicals</b><br>Definition, History & Major petrochemical products, their Producers in India & raw materials for petrochemicals  | 03    | 10             |

|    |   |    |    |
|----|---|----|----|
| 2. | <b>C1,C2,C3,C4 compounds</b><br>Manufacturing of important C1 compounds: Methanol, Formaldehyde; Manufacturing of important C2 compounds: Ethylene dichloride, Vinyl chloride, Ethylene Oxide; Manufacturing of important C3 compounds: Polypropylene, Propylene oxide; Chemicals from aromatics: Manufacture of Linear Alkyl Benzene, Manufacture of Phenol by benzene sulfonate process | 10 | 20 |
| 3. | <b>Cracking</b><br>Introduction & definition of cracking, Chemistry & technology Catalytic cracking, Catalytic reforming, Coking Alkylation process & Isomerisation process, Polymer Gasoline Hydro cracking  | 10 | 20 |

#### List of Practical

| Sr No | Name of Practical  | Hours |
|-------|--|-------|
| 1     | Prepare a detail chart of petrochemical products   | 06    |
| 2     | To determine the Flash point of Different types of crude oil by Penskey Martin (closed up) apparatus | 06    |
| 3     | To determine the Fire point of Different types of crude oil by Penskey Martin (closed up) apparatus  | 06    |
| 4     | Measure softening point of Grease  | 06    |
| 5     | To measure Carbon residue (Conardson method) of Different types of crude oil                         | 06    |
| 6     | To determine the Cloud & Pour point of Different types of crude oil                                  | 06    |
| 7     | To measure the Penetration number of Different types of crude oil                                    | 06    |
| 8     | To determine the Smoke point of Different types of crude oil   | 06    |
| 9     | To determine the Aniline point of Different types of crude oil                                       | 06    |
| 10    | Measure Viscosity of lube oil by Redwood /Saybolt/Engler viscometer                                  | 06    |

**Course Evaluation:****Theory:**

- Continuous Evaluation consists of two tests each of 30 marks and 1 Hour of duration, which will be converted to 30 marks.
- Faculty evaluation consists of 10 marks as per the guidelines provided by the course coordinator.
- End Semester Examination consists of 60 marks.

**Practical:**

- Continuous Evaluation consists of performance of Practical which should be evaluated out of 10 marks for each practical and average of the same will be converted to 10 marks.
- Internal Viva consists of 10 marks.
- Practical performance/quiz/drawing/test of 15 marks during End Semester Exam.
- Viva/Oral presentation consists of 15 marks during End Semester Exam.

**Course Outcome(s):**

After the completion of the course, the following course outcomes will be able to:

|     |   |
|-----|---|
| C01 | To Design solutions for complex engineering problems and design system components or processes that meet the specified needs. |
| C02 | To understand about Origin formation & composition of petroleum, distillation of crude.                                       |
| C03 | Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues.           |
| C04 | To know about different treatment techniques.   |
| C05 | Create, select, and apply appropriate techniques, resources, and modern engineering.  |
